

2022 Heroku-Architecture-Designer Premium Files Test pdf - Free Dumps Collection [Q103-Q118]

2022 Heroku-Architecture-Designer Premium Files Test pdf - Free Dumps Collection

Get ready to pass the Heroku-Architecture-Designer Exam right now using our Salesforce Architecture Designer Exam Package

Salesforce Heroku-Architecture-Designer Exam Syllabus Topics:

- Topic 1- Architect Solutions Using Apache Kafka On Heroku To Facilitate Streaming Communication Between Applications
- Topic 2- Including Various Add-Ons, Buildpacks, And Heroku Buttons- Architect Scalable Solutions That Are Performant Even During High Traffic Spikes
- Topic 3- Describe The Features Of Enterprise Teams- Recommend Architectures That Use The Twelve-Factor App Methodology Correctly
- Topic 4- Recommend When An App Should Run In The Private Space Runtime Versus The Common Runtime
- Topic 5- Demonstrate The Ability To Prescribe A Third-Party Add-On And Add-On Sharing
- Topic 6- Construct Architectures Which Leverage Heroku To Achieve Different Security Certifications- Describe The Compliance Features Of Heroku Shield
- Topic 7- Recommend Networking Solutions That Use Heroku Private Spaces Or The Common Runtime
- Topic 8- Role Of Buildpacks In Slug Creation- Demonstrate An Understanding Of The Basics Behind Building And Deploying Apps On Heroku
- Topic 9- Demonstrate Knowledge Of Heroku Postgres, Including Data Handling
- Topic 10- Architect And Deploy Solutions Using Add-Ons And Other Components From The Elements Marketplace

NEW QUESTION 103

A Field Technician from Universal Containers arrived onsite for an appointment, and unfortunately the customer was not present. UC wants to ensure they can track these customer no-show events for future process improvement.

What process should a Consultant recommend to handle this situation?

- * Set the existing Service Appointment status to Cannot Complete; Create a new Service Appointment against the same Work Order for the follow-up trip.
- * Set the existing Service Appointment status to Complete; Create a new Work Order and Service Appointment for the follow-up trip.
- * Set the existing Service Appointment status to In Progress; Create a new Work Order and Service Appointment for the follow-up trip.
- * Set the existing Service Appointment status to Cannot Complete; Create a new Work Order Line Item for the follow-up trip.

NEW QUESTION 104

Universal Containers has enabled Field Service Lightning and is looking to enable Entitlements for Work Orders.

What should a Consultant take into consideration?

- * Managing page layouts and milestone trackers can be done in the Salesforce mobile app.
- * Creating Entitlements for Cases and Work Orders must be separated.
- * Managing page layouts and validation rules can be done in Salesforce Lightning.
- * Creating Entitlements for Work Orders requires Lightning to be enabled.

NEW QUESTION 105

A manager at Cloud Kicks is importing Leads into Salesforce and needs to avoid creating duplicate records.

Which two approaches should the manager take to achieve this goal? (Choose two.)

- * Acquire an AppExchange Lead de-duplication application.
- * Implement Salesforce Matching and Duplicate Rules.
- * Run the Salesforce Lead Mass de-duplication tool.
- * Create a Workflow Rule to check for duplicate records.

NEW QUESTION 106

A client has data in a production Heroku Postgres database, and needs to quickly get access to a subset of that data for reporting needs.

Which two features does Heroku Dataclips provide to enable this? (Choose two.)

- * JSON export of query results, with CORS support
- * CSV export of query results
- * A simple REST API access to query results
- * Postgres dump file of query results

Explanation/Reference: <https://www.heroku.com/podcasts/codeish/8-sharing-data-with-dataclips>

NEW QUESTION 107

A Heroku application uses Heroku Connect to integrate with data from a Salesforce org. Since then, several fields from the Salesforce objects that were mapped using Connect have been removed. As a result, the development team will reload the mapping using Heroku Connect.

What is an implication of reloading the mapping?

- * The mapped tables in Heroku Postgres will continue to store the previously synchronized data, and synchronization will restart normally.
- * The mapped tables in Heroku Postgres will be truncated as part of the reload action. The data in removed fields will be lost, and synchronization will pause until manually restarted.
- * The mapped tables in Heroku Postgres will continue to store the previously synchronized data, but synchronization will pause until manually restarted.
- * The mapped tables in Heroku Postgres will be truncated as part of the reload action. The data in removed fields will be lost, and synchronization will restart normally.

NEW QUESTION 108

Universal Containers (UC) recently acquired another company, International Shipping. Each company has its own Salesforce org, and UC wants those orgs to remain separate for the foreseeable future. Given this scenario, which Heroku feature should an Architect recommend to provide additional value to UC following the acquisition?

- * Heroku Connect can be used to synchronize data directly between the two Salesforce orgs.
- * Both orgs can be attached to the same Heroku application as an add-on to ensure data residency in the application's region.
- * Heroku External Objects can expose read-only data from both Salesforce orgs to Heroku Postgres.
- * A Heroku Postgres database can sync data from both orgs for advanced querying capabilities.

NEW QUESTION 109

A client's Heroku web application displays data that is fetched from a back-end file storage system. The client now wants this data to be viewable, but not editable, from their Salesforce org.

Which recommendation should an Architect make in this scenario?

- * Replicate the files to tables in a Heroku Postgres database, and use Heroku Connect to synchronize the tables to the Salesforce org.
- * Store all file URLs in a Heroku Postgres table, and use Heroku Connect to synchronize the table to the Salesforce org.
- * Replicate the files to tables in a Heroku Postgres database, and use Heroku External Objects to expose the tables to the Salesforce org.
- * Replicate the files to the application's local filesystem, and use worker dynos to periodically sync them to the Salesforce org.

NEW QUESTION 110

Universal Containers is developing a new application that has a lightweight Node.js front end. They will also be using a Java-based API, which combines data with Salesforce customer data. All of the data, and the API, is highly confidential.

What should an Architect suggest to enforce security?

- * Deploy the apps into either Heroku runtime. Force the Java app to use a CDN, and point the Node.js app to its appname.herokuapp.com domain.
- * Deploy all of the apps to the Common Runtime. Force the Java app to use SSI/TLS sessions, and point the Node.js app to its appname.herokuapp.com domain.
- * Deploy all of the apps to a Heroku Private Space. Force the Java app to use SSI/TLS sessions, and point the Node.js app to its appname.herokuapp.com domain.
- * Deploy all of the apps to a Heroku Private Space. Deploy the Java app with Internal Routing enabled.

Deploy the Node.js app without Internal Routing enabled.

NEW QUESTION 111

A client wants to secure their web application using SSL/TLS. They do not have specific requirements regarding using a particular version of SSL/TLS.

Which two Heroku features should an Architect recommend as options? (Choose two.)

- * Heroku Private Spaces
- * Automated Certificate Management
- * Heroku SSL
- * Heroku Shield Private Spaces

Explanation/Reference: <https://devcenter.heroku.com/articles/ssl>

NEW QUESTION 112

Upon arrival for a Service Appointment, the Field Service Technician reports that a team of people is required to resolve the issue.

How can the Dispatcher ensure that the required staff is assigned to the project?

- * Assign the existing Work Order to a Crew.
- * Assign the existing Service Appointment to a Crew.
- * Assign the existing Work Order to each staff member.
- * Create a new Service Appointment and assign a Crew.

NEW QUESTION 113

Technicians earn certifications that must be renewed periodically to ensure their skills remain up-to-date.

How can these certifications be managed on the Resource?

- * Add the Resource Skill and create Absence once expired.
- * Add the Resource Skill and track certification using reminder.
- * Add the Resource Skill and set the End Date.
- * Add the Resource Skill and remove from the Service Territory once expired.

Explanation

NEW QUESTION 114

DreamHouse Realty has a Salesforce deployment that manages Sales, Support, and Marketing efforts in a multi-system ERP environment. The company recently reached the limits of native reports and dashboards and needs options for providing more analytical insights.

What are two approaches an Architect should recommend? (Choose two.)

- * Weekly Snapshots
- * Einstein Analytics
- * Setup Audit Trails
- * AppExchange Apps

NEW QUESTION 115

A healthcare client is creating a web portal for their customers on Heroku, which is sourced from a Salesforce instance. Some of the Salesforce data they wish to display falls under HIPAA compliance, and their auditors have determined this data must be stored

encrypted-at-rest. To satisfy this requirement, they have enabled Platform Encryption on Salesforce.

They are investigating Heroku Shield Private Spaces, Shield Dynos, Shield Postgres, and Shield Heroku Connect.

How will Shield Heroku Connect interact with the encrypted fields in Salesforce?

- * Shield Heroku Connect will be able to access only cypher text in the fields from Salesforce. They will need to import the encryption key from Salesforce to decrypt to store in Shield Postgres.
- * Shield Heroku Connect will be able to synchronize data from fields in Salesforce without additional customization, but any writes will need to be encrypted using the Salesforce encryption key first before being written.
- * Shield Heroku Connect requires customization on the Salesforce side to decrypt the data before transmitting to Heroku.
- * Shield Heroku Connect will be able to synchronize data bidirectionally without additional customization.

NEW QUESTION 116

A financial reporting application, hosted on an on-premise server, uses a native library (wkhtmltopdf) to convert its HTML reports into PDFs. The app is being migrated to Heroku.

What option should an Architect recommend to enable the Heroku application to use wkhtmltopdf?

- * Ensure that the Heroku app fetches the wkhtmltopdf library from cloud storage on dyno restart.
- * Install the dependency using `sudo apt install wkhtmltopdf` from `.profile` in the project root.
- * Continue to host wkhtmltopdf on-premise, and build a REST API so the library can be invoked from the Heroku app.
- * Use a custom buildpack to install wkhtmltopdf using `apt`.

NEW QUESTION 117

Which is an effect of `locking`; an application that belongs to a Heroku Enterprise Team?

- * New members of the Enterprise Team are granted no automatic permissions for the application.
- * The application cannot be deployed until it is unlocked.
- * Members of the Enterprise Team who are not administrators have their permissions for the application revoked.
- * Members of the Enterprise Team cannot be granted new permissions for the application until it is unlocked.

NEW QUESTION 118

A client has an existing Heroku Connect integration. They would like to extend the integration to add Attachments (which are related binary files) from a mapped Salesforce object. What advice should an Architect provide?

- * A file storage system needs to be added to the Heroku Connect mapping to sync binary files.
- * Heroku Connect does not support binary files: therefore migration must be done using another method
- * A column of type Binary String must be added manually to the Heroku Postgres table and amend Attachments before binary transfer can be enabled.
- * An additional object mapping must be added for the Attachments table in Heroku Connect.

Explanation

`locking`;
