

## [2022 Get Top-Rated SAP C-IBP-2108 Exam Dumps Now [Q18-Q36]

[2022] Get Top-Rated SAP C-IBP-2108 Exam Dumps Now  
Passing Key To Getting C-IBP-2108 Certified Exam Engine PDF

**NO.18** You need to create time periods for the time profile in a planning area. What should you be aware of when executing the Create Time Periods application job?

- \* This application job cannot be scheduled for immediate start.
- \* A time profile has to be activated so that the application job can proceed.
- \* This application job can be run for multiple time profiles at once.
- \* The planning area with this time profile must be activated so that the application job can proceed.

**NO.19** What function would you use to configure a year-to-date calculation?

- \* Cumulative Aggregation
- \* Dynamic Rolling Aggregation
- \* Rolling Aggregation
- \* Last Period Aggregation

**NO.20** You create a planning filter using an SAP IBP Fiori app. Which of the following objects can it be applied to? Note: There are 2 correct Answers to this question.

- \* Planning view templates in the SAP IBP add-in for Microsoft Excel
- \* Supply chain graph in Supply Chain Network app
- \* Snapshot operator in the SAP IBP add-in for Microsoft Excel
- \* Jobs in the Applications Jobs app

**NO.21** What type of key figure requires a planning level to have all attributes as roots?

- \* The conversion key figure, such as exchange rate
- \* The special key figure marked as an aggregate key figure
- \* The time independent key figure, such as FCSTMAPE
- \* The attribute transformation key figure, such as PERIODID1

**NO.22** You are working on a mid-range plan that spans the seasonal peak and you are evaluating the need for additional crewing. Which of the following parameters can you model to plan production with extra shift(s)?

- \* Incremental production values
- \* Capacity expansion with additional costs
- \* Production source validity at the start of seasonal peak
- \* Adjusted production interactive values

**NO.23** While modeling for a large machine with high capital needs, you need it to run cost effectively with minimum utilization, even if it means producing more than demand. Which solution would apply to this scenario? Note: There are 2 correct Answers to this question.

- \* Capacity leveling will be possible for production and storage resources.
- \* Excess stock can be generated and will need to be staged in an overflow warehouse.
- \* Enough demands can be pulled forward and pull production will occur.
- \* Balance can be achieved between excessive prebuild and minimum utilization by incorporating violation costs.

**NO.24** For which of the following application jobs can you enter planning filters as parameters? Note: There are

2 correct Answers to this question.

- \* Purge Non-Conforming Data
- \* Create Time Periods for Time Profiles
- \* Purge Key Figure Data
- \* Purge Master Data

**NO.25** Which of the following stages can be modeled using scenarios from the S&OP planning cycle? Note:

There are 2 correct Answers to this question.

- \* Demand sensing stage
- \* Data input review for inventory
- \* Demand review
- \* Demand-supply balancing

**NO.26** Model configuration allows the attributes of a master data type to be assigned as key figures. Which features are relevant for this type of object?

- \* This object contains user-defined criteria that monitor execution of business plans.
- \* This object provides a single value for a unique planning combination.
- \* This type of key figure is not usually stored and it cannot be set to editable.
- \* This object is not exposed to the user in planning views or modeling.

**NO.27** Which property of an attribute will allow it to be used as an attribute as a key figure?

- \* Type TIMESTAMP
- \* Type NAVCHAR
- \* Type INTEGER
- \* Type DECIMAL

**NO.28** SAP is transitioning IBP customers to the new process of export/import. What are some of the features of this new process?

Note: There are 2 correct Answers to this question.

- \* You can choose to import only some of the items that were exported.
- \* You can move a transported item from one collection to another.
- \* You can create a collection of items and export it.
- \* You can export from a planning area that is on a different release.

**NO.29** Which of the following is one of the functions of multi-echelon inventory optimization?

- \* Ability to optimize delivery costs between different locations
- \* Ability to optimize lead times between different locations
- \* Ability to maintain high external service levels with low internal service levels
- \* Ability to maintain high external service levels with high internal service levels

**NO.30** Which conditions are prerequisites for key figure disaggregation?

- \* The key figure is calculated and editable.
- \* The key figure is calculated and aggregation mode is selected.
- \* The key figure is set to Not Editable.
- \* The key figure is stored and editable.

**NO.31** Analytics charts are created by the user in the Advanced Analytics application. What actions are possible in the Advanced Analytics app? Note: There are 2 correct Answers to this question.

- \* Group data.
- \* Merge charts together.
- \* Open graphics in Excel.
- \* Apply filters on your data.

**NO.32** Which calculations can be processed within the pre-processing step in the forecasting model? Note:

There are 2 correct Answers to this question.

- \* Rounding can be executed for the sales history.
- \* Missing Values can be substituted.
- \* Promotion Sales Lift Ups can be deleted.
- \* Correlations can be evaluated.

**NO.33** You define fixing for a key figure. Which of the following functions are available for this key figure? Note:

There are 2 correct Answers to this question.

- \* Fixing is possible for manually editable key figures.
- \* Fixing is possible for a certain quantity of a key figure value.
- \* Fixing is possible for a certain period, including all child values in the hierarchy.
- \* Fixing is possible for system editable key figures.

**NO.34** Which supply chain challenge is addressed by SAP IBP for demand?

- \* Inability to respond to short-term changes in supply and demand
- \* Inability to arrive at consensus demand

- \* Inability to synchronize supply and demand
- \* Inability to understand and shape actual demand

**NO.35** What setting is mandatory in the Manage Lifecycle Planning app when introducing a new product?

- \* Define which phase-in and phase-out profiles can be used within Lifecycle Planning
- \* Define which key figure can be used as sales history for new products
- \* Define at least one attribute of the planning area which represents the Product ID
- \* Define which is the attribute ID for the Lifecycle profiles

**NO.36** Which of the following solutions are feasible when using the time series supply optimizer? Note: There are 3 correct Answers to this question.

- \* Violation of minimum aggregated inventory values
- \* Not adhering to maximum transport values
- \* Not-fully satisfied demands
- \* Not respecting production capacity
- \* Violation of minimum resource utilization
