Take a Leap Forward in Your Career by Earning Huawei H13-711_V3.0-ENU

NEW QUESTION 308

User Rights Management Role-Based Access Control (RBAC), which provides visual multi-group unified user rights management in clusters.

- * True
- * False

NEW QUESTION 309

Which of the following descriptions of the characteristics of Kafka Partition copies are correct? (Multiple choice)

- * Follower synchronizes data from Leader by pulling
- * The master copy is called Leader, and the slave copy is called Follower
- * Both consumers and producers read and write data from Leader, and can also directly interact with Follower
- * Replicas are based on partitions. Each partition has its own master copy and slave copy

NEW QUESTION 310

If using Redis pairAn ordered collection is sorted, which data type?

- * string

- * Sat
- * Hash
- * sorted set

NEW QUESTION 311

What application scenarios is HBase not suitable for?

- * High throughput application scenarios
- * Application scenarios requiring full ACD characteristics
- * Semi-structured data application scenarios
- * Mass data (TB, PB) application scenarios

NEW QUESTION 312

Which of the following about the Install Fusioninsight HD installation process is correct?

- * Install Manager->Execute preinstall->LLD tool for configuration->Install cluster->Check after installation->Configure after installation
- * Configure with LLD tool->Execute preinstall->Install Managers->Install cluster->Check after installation->Configure after installation
- * Install Manager->LLD tool for configuration->Execute preinstall->Install cluster->Check after installation->Configure after installation
- * LLD tool for configuration -> execute preinstalls -> install cluster -> install Manager -> check after installation -> configure after installation

NEW QUESTION 313

RedisThe commands in are case-sensitive.

- * TRUE
- * FALSE

NEW QUESTION 314

The figure below shows the data transmission architecture of flume. What is the component at the  in the figure?

- * Interceptor
- * Channel processor
- * Channel selector
- * None of the aboveA. True

NEW QUESTION 315

Which of the following query scenarios is more appropriate to use column storage?

- * Conditional query
- * Group query
- * Aggregate query
- * point query

NEW QUESTION 316

Which of the following commands can be used to clear the data of all databases under the Redis instance?

- * dropall

- * Lflushall
- * flushdb
- * dropdb

NEW QUESTION 317

The data node is the working node of HDFS. Which of the following are its functions? (multiple choice)

- * Responsible for storing and reading data
- * Data storage and retrieval are performed according to the scheduling of the client or the name node
- * Records all operations for file creation, deletion, renaming, etC.
- * Periodically send the namenode a list of its own stored blocks.

NEW QUESTION 318

Flink is suitable for applications with high concurrency processing data and millisecond delay.

- * True
- * False

NEW QUESTION 319

Is the description of the role of the standby NameNode correct in the HDFS system?

- * Hot Standby for Primary NameNode
- * Standby NameNode) has no memory requirements
- * Help the main NameNode merge edit logs and reduce the startup time of the main NameNode
- * The standby NameNode should be deployed to the same node as the primary NameNode

NEW QUESTION 320

What query types does ElasticSearch have? (multiple choice)

- * full-text search
- * Term-based search
- * Search based on score
- * Retrieval based on metadata

NEW QUESTION 321

When using HBase for data reading services in Fusioninsight HD, you need to connect to HMaster.

- * True
- * False

NEW QUESTION 322

In the Fusioninsight HD system, which of the following methods cannot view the results of Loader job execution?

- * View the YARN Task Management
- * View through the Loader UI interface
- * View through Manager's alarm
- * View through NodeManager

NEW QUESTION 323

On the FusionInsight Manager interface, when a Kafka disk capacity shortage alarm is received, and the cause of the read alarm has been eliminated from the disk hardware failure, the system administrator needs to consider capacity expansion to solve this problem.

- * True
- * False

NEW QUESTION 324

Which of the following options is an important role for Spark

- * DateNode
- * Nodemanager
- * Driver
- * ResourceManager

NEW QUESTION 325

ApplicationMasters apply for and receive resources from ResourceManagerl through the RPC protocol in a polling manner.

- * True
- * False

NEW QUESTION 326

Which of the following descriptions of Flink key features are wrong?

- * Compared with Flink, SparkStreaming has lower latency
- * The Flink streaming engine can provide functions that support stream processing and batch processing applications at the same time
- * Compared with Streaming in FusionInght HD, Flink has higher throughput
- * checkpoint realizes Flink's fault tolerance

NEW QUESTION 327

The picture below shows Sparke&MapReduce performance comparison data, it can be concluded that compared with MapReducei computing, Spark uses()resources, get()double the performance?

- * 1/8, 3
- * 1/10, 3
- * 1/10, 4
- * 1/8, 4

NEW QUESTION 328

When the Loader of Fusioninsight HD creates a job, what is the function of the connector?

- * Determine what conversion steps are in place
- * Provide optimization parameters to provide data import and export performance
- * Configure how jobs connect to external data sources
- * Configure how jobs connect to internal data sources

NEW QUESTION 329

Tez is a distributed computing box that supports directed acyclic graphs. When Hive uses the Tez engine for data analysis, it parses the HQL statements submitted by users into corresponding Tez tasks and submits them to Tez for execution.

- * True

* False

NEW QUESTION 330

Which of the following components does the platform architecture of Huawei's big data solution include?

- * Hadoop layer
- * GaussDB 200
- * Datafarm layer
- * FusionInsight Manager

NEW QUESTION 331

Assuming that the data volume is about 200GB and the maximum fragment capacity is limited to 30GB, what is the appropriate design for the maximum number of fragments?

- * 9 or 10
- * 7 or 8
- * 3 or 4
- * 5 or 6
