## [Jun-2022] Verified SAP Exam Dumps with C\_HANATEC\_17 Exam Study Guide [Q134-Q150]

[Jun-2022] Verified SAP Exam Dumps with C\_HANATEC\_17 Exam Study Guide  
Best Quality SAP C\_HANATEC\_17 Exam Questions ExamsLabs Realistic Practice Exams [2022]

**NO.134** You need to analyze the high CPU load of running thread in more detail in the Thread Monitor. Which parameters do you need to change? Note: There are 2 correct answers.

- \* threshold\_cpu\_time
- \* cpu\_time\_measurement\_mode
- \* load\_monitor\_granularity
- \* enable\_tracking

**NO.135** What is a characteristic of the Delta Data Shipping operation mode in SAP HANA system replication? There are 2 correct answers to this question.

- \* Delta data shipping takes place in addition to continuous log replay.
- \* Delta data shipping takes place with continuous read-only access to the secondary system.
- \* Delta data shipping takes place in addition to continuous log shipping.
- \* Delta data shipping takes place every 5 minutes.

**NO.136** You plan to migrate a non-SAP database to SAP HANA using the database migration option (DMO) of the Software Update Manager. Which advanced DMO options can you adjust to speed up the migration? There are

2

correct answers to this question.

- \* SAPup processes
- \* TP processes
- \* SQL processes
- \* R3trans processes

**NO.137** The data storage of your productive SAP HANA instance crashed and you need to recover the database. The log storage is still intact. You have a full data backup that is 9 hours old and an incremental backup that is 4 hours old To which point in time you can recover to minimize the data.

- \* the latest incremental backup
- \* the latest log backup
- \* the last full data backup
- \* the last committed transaction

**NO.138** Which of the following statements are true about SAP HANA Live? There are 2 correct answers to this question.

- \* SAP HANA Live for SAP Business Suite focuses on Enterprise Data Warehouse cases, and not on live operational reporting.
- \* SAP HANA Live for SAP Business Suite is a Rapid Deployment Solution.
- \* SAP HANA Live for SAP Business Suite is an accelerator.
- \* SAP HANA Live for SAP Business Suite comprises of an Analytical Model.
- \* SAP HANA Live for SAP Business Suite comes with a comprehensive set of predefined models from across the SAP Business Suite.

**NO.139** Which script can you trigger from SAP HANA cockpit to collect diagnosis information?

- \* HanaHwCheck.py
- \* fullSystemInfoDump.py
- \* hanachecker.py
- \* hanadumpviewer.py

**NO.140** Which migration features are supported when using the Database Migration Option (DMO) feature of SAP Software Update Manager (SUM)? There are 2 correct answers to this question.

- \* The source and target database system are of the same type
- \* The Primary Application Server can be moved to a target system Landscape
- \* The target database is SAP Adaptive Server Enterprise (ASE)
- \* The source system is Application Server (AS) Java-base

**NO.141** Which R3load mode is used during an inplace SUM database migration option procedure?

- \* Socket
- \* File
- \* Network
- \* Pipe

**NO.142** Which action do you perform when the data area in an SAP HANA database is running out of space?

- \* Create a new tenant database
- \* Extend the file system size in the operating system level
- \* Extend the size of the database volume

- \* Create a new database volume

**NO.143** Which SAP HANA cockpit application can you use to investigate a system offline situation? Please choose the correct answer.

- \* CPU usage monitor
- \* Troubleshoot unresponsive system
- \* Full system information dump
- \* Out-of-memory event monitor

**NO.144** How are hosts assigned to the shared storage in an SAP HANA scale-out system? There are 2 correct answers to this question.

- \* The master name server is assigned to its master data volume.
- \* The master server is assigned to all data volumes.
- \* The slave servers are assigned to their own data volumes.
- \* The standby server is assigned to the master data volume.

**NO.145** You investigate a hung SAP HANA database, and you CANNOT identify the blocking transactions. What causes could lead to this behavior? Note: There are 2 correct answers.

- \* A wrong role of a service in a failover situation
- \* An issue with the delta merge
- \* A setting to restrict CPU usage
- \* A long savepoint duration

**NO.146** Where are the R3load processes located when performing the Database Migration Option (DMO) procedure using the in-place migration? Please choose the correct answer.

- \* On the Additional Application Server (AAS) host
- \* On the source and target host
- \* On the remote target database host
- \* On the Primary Application Server (PAS) host

**NO.147** What is the first node limit for planning an SAP S/4HANA scale-out system? There are 2 correct answers to this question.

- \* >= 6TB
- \* >= 8TB
- \* >= 8cpu
- \* >= 12cpu

**NO.148** What are the advantages of the DMO procedure? There are 3 correct answers to this question.

- \* DMO is an inplace procedure by default, keeping the application server host.
- \* DMO allows an easy reset during the procedure.
- \* DMO allows a lower target release on SAP HANA database.
- \* DMO combines several steps into one procedure.

**NO.149** To ensure that the database can be restored to the most recent committed state after a restart which of the following Indexserver components make sure such consistency and maintain durable changes?

- \* Storage Engine
- \* Disk Storage
- \* Relational Engines
- \* Request Processing

**NO.150** Which checks are executed when you run the Hardware Configuration Check Tool (HWCCT)? There are 3 correct answers

to this question.

- \* Validation of the operating system configuration settings for the Linux kernel
- \* Measurement of the data throughput between CPU and DRAM
- \* Validation of the LPAR configuration settings on IBM Power servers
- \* Measurement of data throughput between SAP HANA nodes and storage
- \* Measurement of data throughput between the Linux kernel and CPU
