

## [Q21-Q41 ExamsLabs NS0-603 Real Exam Question Answers Updated [Jun 24, 2022]

ExamsLabs NS0-603 Real Exam Question Answers Updated [Jun 24, 2022]  
Easily To Pass New Network Appliance NS0-603 Dumps with 62 Questions

### **NEW QUESTION 21**

You are designing a multicloud architecture using Microsoft Azure and Amazon Web Services (AWS) The objective is to deploy NetApp Cloud Volumes ONTAP in both clouds and use SnapMirror for replication. You already deployed NetApp Cloud Manager and an associated Connector in Microsoft Azure. To connect your Cloud Manager to AWS, you are instructed to establish a site-to-site VPN between Microsoft Azure and AWS.

In this scenario, which two components are required to provision the AWS endpoint for the VPN connection?

(Choose two.)

- \* firewall rules to unblock UDP port 4500
- \* AWS Direct Connect
- \* a virtual private gateway in AWS
- \* a VPN connection in AWS

### NEW QUESTION 22

You want to manage access to your hybrid cloud resources centrally. You want to use single sign-on (SSO) to access your NetApp Cloud Central accounts using credentials from your corporate directory.

Which two open standards would you use to federate your identity to the company's SSO? (Choose two.)

- \* Security Assertion Markup Language 2.0 (SAML)
- \* Windows Active Directory (AD) authentication protocols
- \* Lightweight Directory Access Protocol (LDAP)
- \* OpenID Connect (OIDC)

### NEW QUESTION 23

You are designing a cloud storage solution for a customer in Microsoft Azure with strict security requirements.

They want to use Azure NetApp Files and they require Kerberos for all NFS traffic. The workload is highly concurrent and mostly sequential.

In this scenario, how will throughput be affected?

- \* Throughput will be significantly decrease
- \* Throughput will be slightly increased.
- \* Throughput will not be affected.
- \* Throughput will be slightly decreased.

### NEW QUESTION 24

You are using Cloud Volumes ONTAP to store persistent data in a multi-tiered Web application on AWS. In this scenario, which two architectures would improve application availability? (Choose two.)

- \* deployment of the Cloud Volumes ONTAP High Availability instances in a private subnet
- \* deployment of a AWS CloudHSM cluster in the same Availability Zone as a Cloud Volumes ONTAP single-node instance
- \* deployment of a Cloud Volumes ONTAP single-node instance on a single dedicated compute host
- \* deployment of Web servers behind a network load balancer

### NEW QUESTION 25

You are asked to design a monitoring solution for your Cloud Volumes ONTAP environment for AWS. You decide to enable the Monitoring service in Cloud Manager.

In this scenario, which two statements are correct? (Choose two.)

- \* You must configure alerts through the Cloud Insights user interface.
- \* The Monitoring service displays the performance of clusters using the Active IQ page in NetApp Cloud Manager.
- \* You must have a pre-existing NetApp Cloud Insights tenant to enable the Monitoring service.
- \* The Monitoring service deploys a virtual machine into your VPC.

### NEW QUESTION 26

A customer wants to design a solution that provides unique persistent storage when scaling a StatefulSet application. The customer proposes using a volume claim template in the StatefulSet definition to generate a unique persistent volume and use NetApp Trident to automate the provisioning of the persistent volume.

Which Kubernetes object would be used in this scenario?

- \* HorizontalPodAutoscaler
- \* CronJob
- \* StorageClass
- \* ConfigMap

### NEW QUESTION 27

You are designing for StorageGRID deployment.

In this scenario, what are two rules for the nodes? (Choose two.)

- \* You need two admin nodes per site.
- \* Each data center site must include at least four storage nodes.
- \* Each data center site must include at least three storage nodes.
- \* Only one admin node is permitted per site.

### NEW QUESTION 28

You are using Windows Virtual Desktops and storing user profiles on Azure NetApp Files by using the Premium storage service level. There will be 1000 contractors coming onboard for a short duration to assist with project work, and each one of them requires virtual desktop access.

In this scenario, which three actions address the short term performance demand without affecting the latency of existing users? (Choose three.)

- \* Use FlexCache.
- \* Increase the volume quota on Azure NetApp Files.
- \* Change the Azure NetApp Files service level to Ultra Storage.
- \* Increase the capacity pool on Azure NetApp Files.
- \* Enable encryption on Azure NetApp Files.

### NEW QUESTION 29

You are designing a solution to detect potential insider threats. Your corporate file shares are hosted on NetApp ONTAP arrays.

In this scenario, which two approaches using NetApp cloud services would be appropriate? (Choose two.)

- \* Configure Cloud Insights with an Automated Response Policy.
- \* Configure Cloud Data Sense service to assign Azure Information Protection (AIP) labels automatically to all files that match the criteria that are defined in a policy.
- \* Configure Cloud Backup service for your corporate file share, and ensure that the target is not in the same cloud provider as the source.
- \* Configure a Cloud Secure agent with a User Directory Connector.

### NEW QUESTION 30

You want to deploy NetApp Cloud Volumes ONTAP In AWS using NetApp Cloud Manager.

In this scenario, which two network protocols need to be specified in the security group rules to initiate a connection with your AWS tenant? (Choose two.)

- \* LDAP

- \* SSH
- \* ICMP
- \* HTTPS

### NEW QUESTION 31

You are designing a new deployment of Cloud Volumes ONTAP in Azure using a highly available configuration.

In this scenario, which two statements are true? (Choose two.)

- \* Each node has access to its own storage only.
- \* NFSv4 is supported.
- \* NFSv4 is not supported.
- \* Each node has access to the other node's storage.

### NEW QUESTION 32

Your customer wants to migrate from an on-premises backup and recovery architecture to a public cloud target solution.

Which two factors should be considered when designing this solution? (Choose two.)

- \* recovery point objective
- \* recovery time objective
- \* media format
- \* mean time to repair

### NEW QUESTION 33

Your customer wants to demonstrate data privacy compliance by monitoring as many platforms as possible across on-premises and the public cloud with NetApp Cloud Data Sense (formerly Cloud Compliance).

In this scenario, which two data sources are supported? (Choose two.)

- \* Microsoft Exchange
- \* Oracle Database
- \* Amazon S3
- \* DB2

### NEW QUESTION 34

A company realizes that multiple departments are using different cloud providers for mission-critical workloads. They are experiencing poor performance on workloads across different cloud providers and notice that there are deployment inconsistencies.

In this scenario, what are two ways to correct the problem? (Choose two.)

- \* Use infrastructure as code (IaC) to ensure deployments satisfy design specifications.
- \* Use storage services that can scale dynamically with workload demands.
- \* Consolidate data for applications into volumes on a single cloud provider.
- \* Ensure that all virtual machines use Reserved Instances to maximize performance.

### NEW QUESTION 35

You are asked to deploy NetApp Cloud Volumes ONTAP In a Google Cloud environment. You set up a NetApp Cloud Central account. You want the storage administrator to be able to log in to the NetApp Cloud Central account and deploy a connector from

the SaaS Cloud Manager before deploying NetApp Cloud Volumes ONTAP.

In this scenario, what are two requirements to accomplish this task? (Choose two.)

- \* The storage administrator must be set up as an administrator in Google Cloud.
- \* The storage administrator must be set up as a workspace admin in NetApp Cloud Central.
- \* The GCP user who deploys the connector from NetApp Cloud Central should be associated with a custom role.
- \* The required APIs must be enabled in the Google Cloud project.

### NEW QUESTION 36

You are designing a disaster-recovery solution for a customer who is running a critical workload on Azure NetApp Files. You suggest cross-region replication. In this scenario, which two statements are true? (Choose two.)

- \* Cross-region replication depends on Global VNet Peering.
- \* Cross-region replication can be used to replicate SMB workloads.
- \* Cross-region replication can replicate data between any two Azure regions
- \* Cross-region replication works only between designated region pairs.

### NEW QUESTION 37

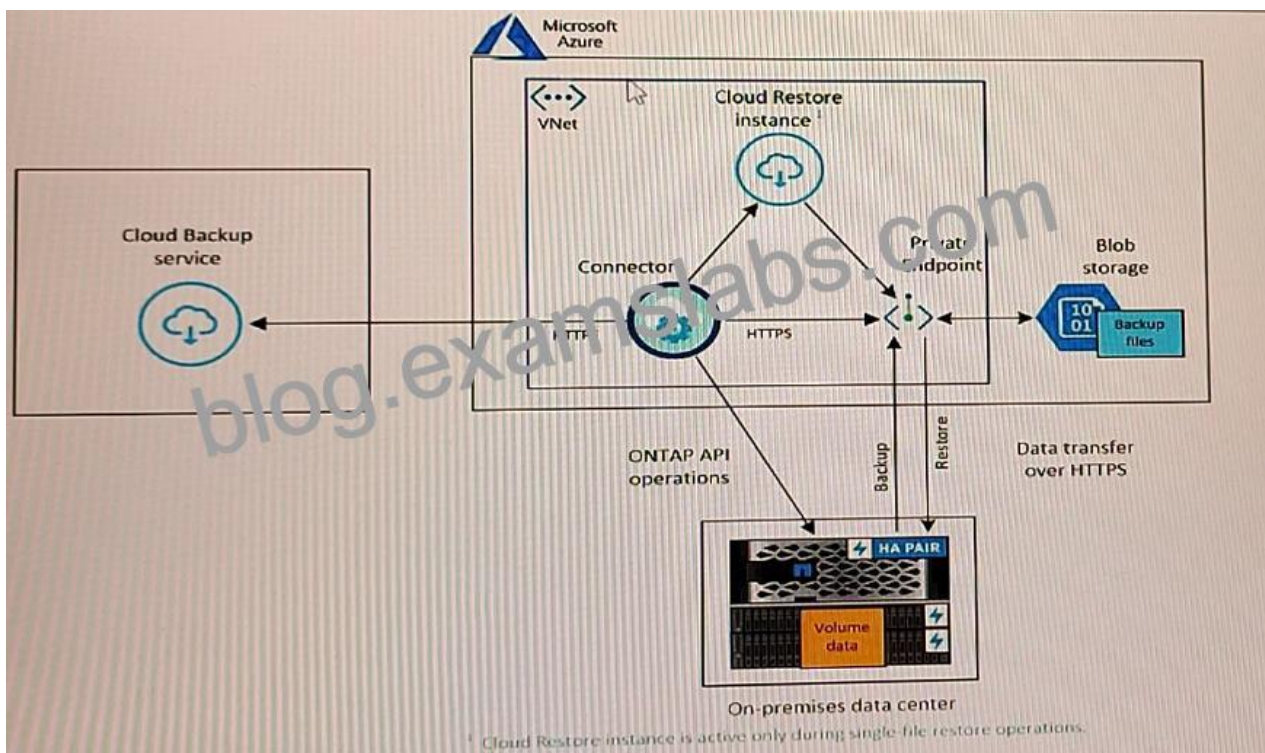

You are deploying NetApp Cloud Volumes ONTAP to support a relational database workload. You must protect data from an intermittent loss of network connectivity to a single zone in a public cloud data center.

Which Cloud Volumes ONTAP feature accomplishes this task?

- \* end-to-end encryption
- \* multi-zone high-availability (HA)
- \* ONTAP storage efficiencies
- \* intelligent cold-data tiering to object storage

### NEW QUESTION 38

Exhibit.

You are designing a NetApp Cloud Backup solution for your on-premises ONTAP clusters to Azure Blob storage.

Referring to the exhibit, which two statements are true? (Choose two.)

- \* An inbound connection is required from the Connector.
- \* A connection between the cluster and the Cloud Backup service is not required.
- \* An outbound connection is required to the Connector.
- \* A connection between the cluster and the Cloud Backup service is required.

#### **NEW QUESTION 39**

A customer has a multi-cloud environment and wants to deploy Cloud Volumes ONTAP in both AWS and Azure.

In this scenario, which two statements are true? (Choose two.)

- \* The customer must provide a private subnet with only VPC or VNet routing for any Connector.
- \* The customer must provide outbound Internet access for any Connector.
- \* The customer must deploy a single Connector for either AWS or Azure and create a VPN connection to the other cloud.
- \* The customer must deploy one Connector for AWS and a second Connector for Azure.

#### **NEW QUESTION 40**

You are designing a new hybrid cloud solution. The nonfunctional requirements state that you must be able to integrate identity management for SSO authentication.

In this scenario, what are two supported identity management providers? (Choose two.)

- \* OAuth
- \* SAML
- \* YAML
- \* Azure Active Directory

#### **NEW QUESTION 41**

Your customer wants to move from hosting all workloads in a public cloud to infrastructure-as-a-service (IaaS) on-premises.

In this scenario, which two benefits would you present to the customer? (Choose two.)

- \* scalability
- \* data sovereignty
- \* agility
- \* data security

### Network Appliance NS0-603 Exam Syllabus Topics:

TopicDetailsTopic 1- Demonstrate knowledge of the NetApp Cloud Controls portfolio- NetApp Hybrid Cloud SolutionsTopic 2- Demonstrate knowledge of the NetApp Public Cloud Services portfolio- Describe cloud cost management considerations  
Topic 3- Describe sizing workload characteristics for different business requirements- Demonstrate knowledge of the NetApp Hybrid Cloud Storage portfolioTopic 4- Describe how to secure NetApp Hybrid Cloud control planes- Demonstrate knowledge of using the NetApp Hybrid Cloud
