Get Jul-2022 updated C-PO-7521 Certification Exam Sample Questions  
C-PO-7521 Study Guide Cover to Cover as Literally

### SAP C-PO-7521 Exam Syllabus Topics:

TopicDetailsTopic 1- Explain the difference between Process Orchestration and Process Integration- Explain how to Use the SAP NetWeaver Administrator functionalityTopic 2- Integration Objects in the Integration Directory- Operations and Process Monitoring in SAP Process OrchestrationTopic 3- Basic Concepts System Landscape Directory (SLD) and Enterprise Service Repository- Define the Advanced Adapter Engine Extended (AEX)Topic 4- Basic Concepts for SAP Business Process Management Integration Flow (iFlow)- Business Processes Modeling and BPMN 2.0 (Business Process Management Notation)Topic 5- Describe SAP Business Rules Management (BRM)- Data Flow, Association, the Configuration of BPMN modelsTopic 6- Describe the use of the perspective in SAP NetWeaver Developer Studio- describe Software Catalog (Products and Software Components)Topic 7- Describe data objects and iFlows; List the available data types- Configuration of iFlows in NetWeaver Developer Studio (SAP NWDS)Topic 8- Explain how to configure a scenario in the Integration Directory- Explain how to create Message Mapping objects

**Q119.** The COMMIT WORK statement is required in another function module to write data in the database.

Determine whether this statement is true or false.

- \* True
- \* False

**Q120.** Which of the following XSLT tags allow you to import additional XSLT files?

Choose the correct answers.

- \* <xsl:Include>
- \* <xsl:param>
- \* <xsl:Import>

**Q121.** What are the three Business Process Management components

Choose the correct answers.

- \* Process Composer
- \* Process Context
- \* Process Desk
- \* ProcessServer

**Q122.** Which object do you import from the SLD before you start creating design objects in the ESR?

- \* Software catalog
- \* Product instance
- \* Business system
- \* Software component version

**Q123.** The &#8230; acts as a central point of information for all interfaces.

Choose the correct answer.

- \* Software component
- \* Enterprise Services Repository (ESR)
- \* Imported object

**Q124.** What is Rules Manager used for?

Choose the correct answers.

- \* Creating rules
- \* Modeling business processes
- \* Storing rules
- \* Testing rules

**Q125.** The standard function Value Mapping contains fixed value pairs in ESR.

Determine whether this statement is true or false.

- \* True
- \* False

**Q126.** Values and parameterized mappings are supported during the mapping import.

Determine whether this statement is true or false.

- \* True
- \* False

**Q127.** Which of the following operations can be performed during the creation of an operation mapping? Note: There are 2 correct answers to this question.

- \* Selection of source message type
- \* Selection of message mapping
- \* Selection of function library
- \* Selection of a target operation

**Q128.** Which multi-mapping option can you use to combine multiple messages into one message?

Choose the correct answers.

- \* n:1
- \* 1:n
- \* n:m

**Q129.** What do business rules define?

Choose the correct answer.

- \* A set application tasks and sequencing.
- \* A set of restrictions placed on the process model.
- \* A set of conditions with associated actions.
- \* A set of standard practices and policies.

**Q130.** The SuccessFactors (SFSF) adapter supports which message protocols?

Note: There are 3 correct answers to this question.

- \* EDI
- \* SFTP
- \* OData
- \* DSOAP
- \* EREST

**Q131.** What are the characteristics of a software component? Note: There are 3 correct answers to this question.

- \* It provides interfaces.
- \* It is installed on business systems.
- \* It can have multiple versions.
- \* It is a modular entity.
- \* It is based on Component Object Model.

**Q132.** Input masks are commonly used in technical processes in the business layer and are created using various technologies. Which of the following technologies is used in SAP BPM to create input masks?

Choose the correct answer.

- \* Visual Forms
- \* Web Dynpro
- \* Adobe Composer

**Q133.** What provides detailed information about tasks?

Choose the correct answer.

- \* Process Management
- \* Process Repository
- \* Process Visualization
- \* Task Management

**Q134.** The mail adapter enables you to connect e-mail servers to the Integration Engine (IE).

Determine whether this statement is true or false.

- \* True
- \* False

**Q135.** As a BPM user, what are the possible actions for tasks that you perform from the central workplace BPM inbox? Note There are 3 correct answers to this question.

- \* View
- \* Claim
- \* Archive
- \* Escalate
- \* Complete

**Q136.** You create user-defined functions in the Functionstab of the mapping editor.

Determine whether this statement is true or false.

- \* True
- \* False

**Q137.** Which tools can you use to create objects in the ESR? Note: There are 2 correct answers to this question.

- \* SAP NWDS (Eclipse) &#8211; SAP PI Designer Perspective
- \* SAPNWDS (Eclipse) &#8211; SAP PI Administration Perspective
- \* SAP NWDS (Eclipse) &#8211; SAP PI Runtime Perspective
- \* Enterprise Services Builder

**Q138.** Which methods can you use in SAP BRM to model complex rules? Note: There are 3 correct answers to this question.

- \* Gateways
- \* Decision tables
- \* Access management
- \* Routing rules
- \* Rule scripts

**Q139.** The SuccessFactors (SFSF) adapter supports which of the following message protocols?

Choose the correct answers.

- \* Simple Object Access Protocol (SOAP)
- \* OData
- \* Electronic Data Interchange (EDI)
- \* Representational State Transfer (REST)

**Q140.** What do rulesets define in SAP BRM?

- \* A collection of multiple connector rules for a specific business situation
- \* A collection of multiple associated rules for different business situations
- \* A collection of multiple rules for a specific business situation
- \* A collection of multiple graphical representation rules for a specific business situation

**Q141.** You have configured an Integrated Configuration Object (ICO). At runtime, System A sends a message to System B.

Which component of SAP Process Orchestration handles mapping and routing for the object?

- \* Advanced Adapter Engine
- \* Business Rule Engine
- \* Integrated Configuration Object
- \* Integration Engine

**Q142.** In which of the execution types is the function executed only once internally?

Choose the correct answer.

- \* All Values of Context
- \* Single Values
- \* All Values of Queue
