### QUESTION 10

Which of the following techniques can you use to improve the performance of calculation views?

There are 2 correct answers to this question.

Response:

- \* Implement union pruning
- \* Partition large tables
- \* Avoid aggregating data early in the data flow
- \* Minimize layering of calculation views

### QUESTION 11

What do we implement to restrict access to specific data rows of a calculation view?

Please choose the correct answer.

Response:

- \* HANA Database Procedure
- \* SQL permission
- \* Authorisation object
- \* Analytic privilege

### QUESTION 12

In SAP HANA Studio, what would you find in a Package?

There are 3 correct answers to this question.

Response:

- \* Analytic Privileges
- \* Calculation Views
- \* Procedures
- \* Tables

### QUESTION 13

What are features of SDA?

There are 2 correct answers to this question.

Response:

- \* Automatic data type translation

- \* Evaluation and execution of push down possibilities to remote sources
- \* Data cleansing
- \* Merging data from multiple sources

#### QUESTION 14

What enables the delta buffer technique to speed up both reads and inserts in SAP HANA?

Please choose the correct answer.

Response:

- \* Using row-based tables only
- \* Using both row-based and column-based tables
- \* Using column-based tables only
- \* Using only the insert-only technique

#### QUESTION 15

Why might you use the Keep Flag property in an aggregation node?

- \* To cache the results of the aggregation node for drill-down
- \* To ensure that the aggregation behavior defined in the aggregation node for a measure CANNOT be overridden by a query
- \* To include columns that are NOT requested by a query but are essential for the correct result
- \* To retain the correct aggregation behavior in stacked views.

#### QUESTION 16

A column in your table will be used for text search. Why do you define the column as a text type instead of a string type?

Please choose the correct answer.

Response:

- \* To enable a linguistic analysis
- \* To enable lower memory consumption
- \* To allow processing of multiple languages
- \* To enable the full set of SQL operations

#### QUESTION 17

You're creating a currency conversion. What options do you have for the Target Currency field?

There are 3 correct answers to this question.

Response:

- \* Select a table type.
- \* Select a column.
- \* Use the Derived from Table option.
- \* Use an input parameter.
- \* Select a fixed currency.

#### QUESTION 18

What can you determine using the hierarchy function in a calculation view?

There are 3 correct answers to this question.

Response:

- \* Number of siblings for a hierarchy node
- \* Distance between root and each hierarchy node
- \* Source attributes of a composite hierarchy node
- \* Hierarchy nodes that have no parent
- \* Time interval of hierarchy nodes

### QUESTION 19

What SAP HANA feature do you use to host multiple applications for different companies in single SAP HANA landscape while ensuring isolation?

Please choose the correct answer.

Response:

- \* SAP HANA as a distributed database
- \* Active/Active (read-enabled) mode
- \* Multitenant Database Containers (MDC)
- \* Extended storage

### QUESTION 20

You're given an old government paper form with lines, blocks, and fields. You're asked to create a report that looks like this form.

Which business intelligence tools do you use?

Please choose the correct answer.

Response:

- \* SAP Lumira, discovery edition
- \* SAP Lumira, designer edition
- \* SAP Crystal Reports for Enterprise
- \* SAP BusinessObjects Web Intelligence

### QUESTION 21

You want to show a male and female option to end users. What feature do you use?

There are 3 correct answers to this question.

Response:

- \* Input parameters
- \* Domain fix values
- \* Expressions

- \* Value help
- \* Variables

## QUESTION 22

You're working with a currency measure. What is decimal shift used for?

Please choose the correct answer.

Response:

- \* For currencies with more than two decimal places
- \* To avoid rounding errors during the conversion
- \* To increase the accuracy of the currency conversion
- \* To undo the decimal adjustment for ABAP

## QUESTION 23

You are a data analyst working with medical records that contain confidential patient information. Why do you use the anonymization node in a calculation view?

Note: There are 2 correct answers to this question.

- \* To restrict data access for specific users or roles
- \* To hide individual patients in groups of similar records
- \* To provide partial value such as #34343#34##
- \* To add noise to the data to hide the actual values

## QUESTION 24

What spatial data type would you use to store multiple shop locations?

Please choose the correct answer.

Response:

- \* ST\_Polygon
- \* ST\_MultiLineString
- \* ST\_MultiPoint
- \* ST\_Point

## QUESTION 25

What are the values for X, Y, and Z?

Please choose the correct answer.

Response:

- \* X = Customer 2, Y = 200, Z = 400
- \* X = Customer 2, Y = 400, Z = 800
- \* X = Customer 1, Y = 800, Z = 800
- \* X = Customer 1, Y = 400, Z = 400

### QUESTION 26

Using the table in the diagram, you need to create a cube calculation view. What is the simplest approach to create the output form the screenshot?

Please choose the correct answer.

Table A Output A

Year	Value	2014	2015	2016
------	-------	------	------	------

2014	100	300	500	200
------	-----	-----	-----	-----

2014	200
------	-----

2015	100
------	-----

2015	100
------	-----

2015	200
------	-----

2015	100
------	-----

2015	200
------	-----

Response:

- \* Create a restricted column for each year
- \* Create a filter expression that uses an OR operator
- \* Implement a union node and map each year as a separate column

### QUESTION 27

Your newly created analytic privilege does NOT want to build. What must you do?

Please choose the correct answer.

Response:

- \* Assign the ::access role to the HDI container user.
- \* Grant rights to the \_SYS\_REPO user.
- \* Change the Apply Privileges property of the view.
- \* Change the analytic privilege to use an SQL Expression.

### QUESTION 28

What restrictions apply to a Graph node that you include in a calculation view?

- \* It must be the first node in the dataflow.
- \* It must be the final node in the dataflow.
- \* Its data source must be provided by a projection node.
- \* It cannot be included in a calculation view of type dimension.

## QUESTION 29

Which of the following are types of calculation view?

There are 2 correct answers to this question.

Response:

- \* Composite
- \* Virtual
- \* Cube
- \* Dimension
