Conclusion
There's never a perfect time to make a career-changing decision. But this is certainly the best time to get ahead in your career using a reputable certification that will validate your competency in managing Juniper Networking solutions and products. It is a big decision that starts with choosing the right designation, preparing for the required exam, and passing it. And that exam today is the Juniper JN0-334, which covers all the aspects you need to build a fruitful career. This post has attempted to cover everything you need to know to clear JN0-334 exam. So, the remaining percentage is solely a personal decision. Make it happen today!

QUESTION 49

Click the exhibit button.

You are configuring security policies with Junos Space Security Director.

Referring to the exhibit, which two statements are true? (Choose two.)
* The host device has three rules assigned to it.
* The policy assigned to the host device is published.
* The policy assigned to the host device requires publishing.
* The host device has two rules assigned to it.

QUESTION 50

You are asked to convert two standalone SRX Series devices to a chassis cluster deployment. You must ensure that your IPsec tunnels will be compatibla with the new deployment.

In this scenario, which two interfaces should be used when binding your tunnel endpoints? (Choose two.)
* pp0
* reth
* lo0
* ge

QUESTION 51

You want to use Sky ATP to protect your network; however, company policy does not allow you to send any files to the cloud.

Which Sky ATP feature should you use in this situation?
* Only use on-premises local Sky ATP server anti-malware file scanning.

* Only use cloud-based Sky ATP file hash lookups.
* Only use on-box SRX anti-malware file scanning.
* Only use cloud-based Sky ATP file blacklists.

QUESTION 52

Which process describes the implementation of screen options on an SRX Series device?
* Configured screen options are applied only to the first packet that is processed in a stateful session.
* Configured screen options are only applied when traffic does not match a valid route.
* Configured screen options are applied to all packets that are processed by the stateful session firewall processor.
* Configured screen options are only applied when traffic does not match a valid policy.

QUESTION 53

You want to collect events and flows from third-party vendors. Which solution should you deploy to accomplish this task?
* Log Director
* JSA
* Policy Enforcer
* Contrail

QUESTION 54

After an SRX Series device processes the first packet of a session, how are subsequent packets for the same session processed?
* They are processed using fast-path processing.
* They are forwarded to the control plane for deep packet inspection.
* All packets are processed in the same manner.
* They are queued on the outbound interface until a matching security policy is found.

QUESTION 55

Click the Exhibit button.
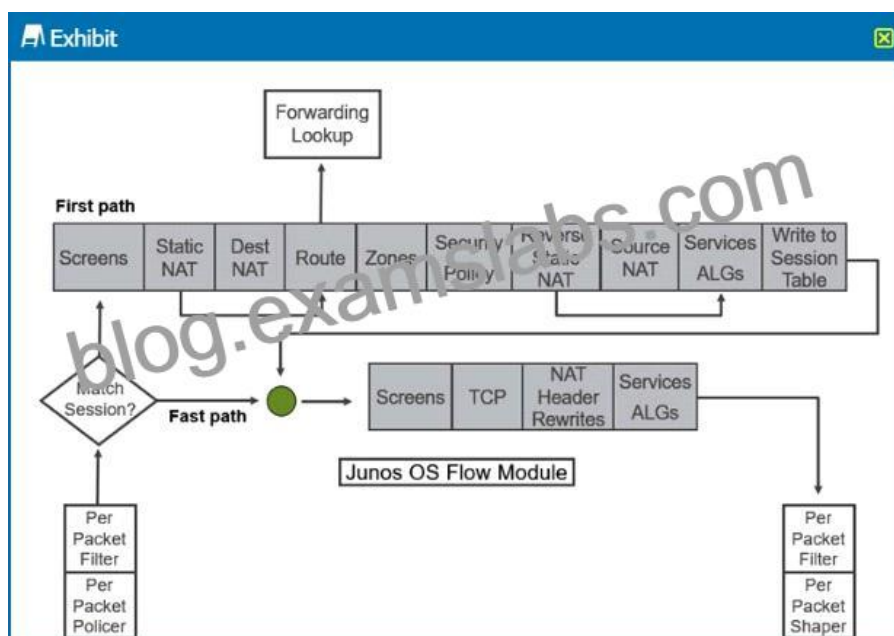

Referring to the SRX Series flow module diagram shown in the exhibit, where is IDP/IPS processed?
* Forwarding Lookup
* Services ALGs
* Screens
* Security Policy

QUESTION 56

Which of the following lists the correct order that the Sky ATP pipeline evaluates traffic?
* Cache lookup. Static Analysis. Dynamic Analysis. Antivirus Scanning
* Static Analysis. Cache lookup. Antivirus Scanning, Dynamic Analysis
* Cache lookup. Antivirus Scanning, Static Analysis, Dynamic Analysis

QUESTION 57

When considering managed sessions, which configuration parameter determines how full the session table must be to implement the early age-out function?
* session service timeout
* high waremark
* low watermark
* policy rematch
Explanation

QUESTION 58

Which three features are parts of Juniper Networks’ AppSecure suite? (Choose three.)
* AppQoE
* APBR
* Secure Application Manager
* AppQoS
* AppFormix

QUESTION 59

Which two statements about JIMS high availability are true? (Choose two.)
* JIMS supports high availability through the installation of the primary and secondary JIMS servers.
* SRX clients are configured with the shared virtual IP (VIP) address of the JIMS server.
* SRX clients are configured with the unique IP addresses of the primary and secondary JIMS servers.
* SRX clients synchronize authentication tables with both the primary and secondary JIMS servers.

QUESTION 60

Which security log message format reduces the consumption of CPU and storage?
* WELF

* BSD syslog
* binary
* structured syslog

https://www.juniper.net/documentation/en_US/junos/topics/concept/security-binary-logging-understanding.html Security log messages can also be maintained in text-based formats. Because security logging can produce large amounts of data, however, text-based log files can quickly consume storage and CPU resources. Depending on your implementation of security logging, a log file in a binary-based format can provide more efficient use of on-box or off-box storage and improved CPU utilization. Binary format for security log messages is available on all SRX Series devices.

QUESTION 61

Which two statements are correct about server-protection SSL proxy? (Choose two.)
* The server-protection SSL proxy intercepts the server certificate.
* The server-protection SSL proxy is also known as SSL reverse proxy.
* The server-protection SSL proxy forwards the server certificate after modification
* The server-protection SSL proxy acts as the server from the client’s perspective

QUESTION 62

Which two statements are true about virtualized SRX Series devices? (Choose two.)
* vSRX cannot be deployed in transparent mode –
* cSRX can be deployed in routed mode.
* cSRX cannot be deployed in routed mode.
* vSRX can be deployed in transparent mode

QUESTION 63

Which feature supports sandboxing of zero-day attacks?
* Sky ATP
* SSL proxy
* ALGs
* high availability

QUESTION 64

What are two types of attack objects used by IPS on SRX Series devices? (Choose two.)
* protocol anomaly-based attacks
* spam-based attacks
* signature-based attacks
* DDoS-based attacks
Explanation

https://www.oreilly.com/library/view/juniper-srx-series/9781449339029/ch13.html

QUESTION 65

Which two statements are true when implementing source NAT on an SRX Series device? (Choose two.)
* Source NAT is applied before the security policy search.
* Source NAT is applied after the route table lookup.

* Source NAT is applied before the route table lookup.
* Source NAT is applied after the security policy search.

QUESTION 66

You are deploying the Junos application firewall feature in your network.

In this scenario, which two elements are mapped to applications in the application system cache? (Choose two.)
* destination port
* source port
* destination IP address
* source IP address

QUESTION 67

What is the maximum number of supported interfaces on a vSRX hosted in a VMware environment?
* 4
* 10
* 3
* 12

QUESTION 68

Which two statements describe how rules are used with Juniper Secure Analytics? (Choose two)
* When a rule is triggered. JSA can respond by sending an e-mail to JSA administrators.
* Rules are defined on Junos Space Security Director, and then pushed to JSA log collectors
* A rule defines matching criteria and actions that should be taken when an event matches the rule
* When a rule is triggered. JSA can respond by blocking all traffic from a specific source address

QUESTION 69

Exhibit.

```
user@srx> show log messages | match RT_FLOW_SESSION
Jun 3 00:36:41 vSRX-1 RT_FLOW: RT_FLOW_SESSION_CREATE: session created
172.18.2.1/
57929->10.10.101.10/21 0x0 junos-ftp 172.18.2.1/57929->10.10.101.10/21 0x0 N/A
N/A N/A N/A 6 untrust-to-trust(global) untrust trust 19307 N/A(N/A) ge-0/0/3 0
UNKNOWN UNKNOWN UNKNOWN N/A N/A -1
```

The output shown in the exhibit is displayed in which formal?

* syslog
* sd-syslog
* binary
* WELF

QUESTION 70

Which two solutions provide a sandboxing feature for finding zero-day malware threats? (Choose two)

* Sky
* ATP
* JATP
* UIPS
