- * It links receipts from an alternative location in case of a shortage in the default location
- * It propagates changed sales order priorities to the pegged planned orders

- * It replaces fixed pegging relationships unless they have been created for stock
- * It enables the propagation of network alerts across the bill of materials structure

NEW QUESTION 55

Which technological advances enabled the development of SAP S/4HANA as the digital core?

There are 3 correct answers to this question.

Response:

- * Advances in the three-tier architecture approach
- * Big and affordable memory
- * Capability to add to server landscape and scale
- * Wide adoption of web standards such as Service oriented architecture
- * Multi core processors enabling parallelism of tasks

NEW QUESTION 56

MRP created a planned order for a material that has one single material from stock as a component. What happens to this dependent requirement when you convert the planned order into a production order?

- * It is converted into a production order.
- * It is converted into a reservation.
- * It is converted into a planned order.
- * It is converted into a schedule line.

NEW QUESTION 57

In which of the following master data objects can you define the production order default storage location for a material component?

There are 2 correct answers to this question.

Response:

- * Routing, in the component allocation
- * BOM, in the item for the material
- * Work center, in the production supply area
- * Material master of the finished product

NEW QUESTION 58

Which elements are included in the structure of the batch where-used list?

There are 3 correct answers to this question.

Response:

- * Stock transfers
- * Collective orders
- * Purchase orders
- * Transfers from batch to batch
- * Planned orders

NEW QUESTION 59

If you use floats to limit dispatching in capacity planning, what type of time element can be reduced by strategy settings while dispatching?

- * Queue time
- * Production time
- * Minimum wait time
- * Goods receipt processing time

NEW QUESTION 60

How Is the bill of material (BOM) exploded when you use a BOM explosion number?

Please choose the correct answer.

Response:

- * With respect to defined separate key dates for product and each assembly
- * With respect to a common key date for product and each assembly
- * With respect to a defined separate change status for product and each assembly
- * With respect to a common change status for product and each assembly

NEW QUESTION 61

Which time elements can be reduced by a reduction strategy? Note: There are 3 correct answers to this question.

- * Wait time
- * Goods receipt processing time
- * Float after production
- * Queue time
- * Move time

NEW QUESTION 62

Your client is asking for your advice on material master numbering in SAP S/4HANA. What do you need to consider? Note: There are 2 correct answers to this question.

- * The display template for material numbers applies to all clients.
- * The number of leading zeros for internal numbers is client-specific.
- * The maximum mater all number length is 40 for external numbers and 18 for internal numbers.
- * In Customizing you can decide by material type whether to use the long material number.

NEW QUESTION 63

How can you achieve a feasible production plan in case of capacity constraints? Note: There are 3 correct answers to this question.

- * Reduce the planning window.
- * Adjust the available capacity.
- * Execute a new production planning run.
- * Select an alternative mode on a resource.
- * Form optimum sequences to reduce setup times.

NEW QUESTION 64

For which data objects do you have to set up CIF integration models in S/4HANA to use them in advanced planning?

There are 2 correct answers to this question.

Response:

- * Material master
- * Work center
- * Production plant
- * Contract

NEW QUESTION 65

Your quality department detects a deviation in a raw material batch. Unfortunately, this batch has already been used in production. How can you identify all affected finished goods stocks?

- * Use the material staging report.
- * Use the batch information cockpit.
- * Use the material where-used report.
- * Use batch determination.

NEW QUESTION 66

You have maintained the parameters for simple discontinuation the material master of a component. Which business process will be affected if the available stock is zero and the discontinuation date is in the past?

- * Back flushing
- * Material requirements planning
- * Production order release
- * Kanban

NEW QUESTION 67

What is the correct sequence of the following Activate methodology phases?

Please choose the correct answer.

Response:

- * Prepare, Validate, Test, Go-Live
- * Prepare, Realize, Iterate, Continuous Improvement
- * Validate, Realize, Test , Deploy
