# [Sep-2022 Updated CCP-V 1Y0-312 Exam Questions BUNDLE PACK [Q48-Q67

[Sep-2022 Updated CCP-V 1Y0-312 Exam Questions BUNDLE PACK Master The Citrix Content 1Y0-312 EXAM DUMPS WITH GUARANTEED SUCCESS!

Get guide about the procedure to register for Citrix 1Y0-312 Exam

The registration for the Citrix 1Y0-312 Exam follows the steps given below.

Step 1: Visit to Pearson Exam Registration

Step 2: Signup/Login to Pearson VUE account

Step 3: Search for Citrix 1Y0-312 Certification Exam

Step 4: Select Date, time and confirm with a payment method

Citrix 1Y0-312 Exam Syllabus Topics:

TopicDetailsTopic 1- Separate Policies for Users- Admins, Citrix Cloud Connector Scalability ConsiderationsTopic 2- Using Citrix Gateway SmartAccess and SmartControl with Citrix Virtual Apps and Desktops- Site Database Redundancy OptionsTopic 3 - Optimizing the Performance of Windows workloads- StoreFront Server RedundancyTopic 4- Replicating Subscriptions between Stores in a Server Group- Delivery Controller ScalabilityTopic 5- Citrix Security and Control Policy Template- Multi Zone: Registration Communication ProcessTopic 6- Configuring Subscription Synchronization- StoreFront Server ScalabilityTopic 7- Determine Redundancy Requirements for Machines Running the Virtual Delivery Agent- VDA Registration Process and MethodsTopic 8- Assess the Performance of Machines Running the Virtual Delivery Agent- Citrix

Cloud Connector Redundancy

NEW QUESTION 48

Which two statements are true when Citrix App Layering is used with Citrix Virtual Apps and Desktops? (Choose two.)
* Citrix App Layering offers all the same functionality as Citrix Provisioning (PVS).
* Citrix App Layering simplifies application deployments and updates.
* Citrix App Layering reduces management of multiple golden images.
* Citrix Machine Creation Services (MCS) catalogs can be updated within the Citrix App Layering Management console.
https://docs.citrix.com/en-us/tech-zone/design/reference-architectures/app-layering.html

NEW QUESTION 49

Scenario: A Citrix Engineer has configured a Provisioning Services environment where all target devices are using the cache on device hard drive method and have a persistent disk attached to them. The engineer enabled Citrix Profile Management for all users and installed new applications while the target device was started in Standard mode.

The new data will be stored _____ and _____. (Choose the correct option to complete the sentence).
* On the vDisk, does NOT persist between restarts
* In the profile; persists between restarts
* In the write cache; does NOT persist between restarts
* On the persistent drive; persists between restarts
https://docs.citrix.com/en-us/provisioning/7-1/pvs-product-wrapper-6-2/pvs-technology-overview- vDisk-modes-merrimack.html

NEW QUESTION 50

Which three layers can a Citrix Engineer include in an image template? (Choose three.)
* Platform
* OS
* User
* Application
* Elastic
https://docs.citrix.com/en-us/citrix-app-layering/4/publish/create-image-template.html

NEW QUESTION 51

A Citrix Engineer can use _____ and _____ to optimize the performance of Windows workloads.
* Citrix Workspace Environment Management (WEM)
* Citrix Studio
* Citrix Optimizer
* Citrix Director
* Citrix App Layering
https://www.citrix.com/blogs/2020/01/23/optimize-the-user-experience-for-your-citrix-workspace/

NEW QUESTION 52

Which three minimum permissions should a Citrix Engineer configure for a user or group in the security settings of the User Layer folder? (Choose three.)

* Modify Folder
* Create Folder/Append Data
* Write Attributes
* Read Attributes
* List Folder/Read Data

NEW QUESTION 53

Scenario: A Citrix Engineer administering a Citrix Virtual Apps and Desktops environment is experiencing inconsistency with Virtual Delivery Agent (VDA) registration. After much investigation, the engineer determined the issue is resulting from intermittent problems with the Windows services on the VDA machine and the Delivery Controller.

Which set of Citrix services should the engineer troubleshoot to find the root cause?
* BrokerAgent.exe and BrokerService.exe
* BrokerAgent.exe and Citrix.Host.exe
* BrokerService.exe and Citrix.Host.exe
* PicaSvc2.exe and BrokerService.exe
Explanation

https://support.citrix.com/article/CTX139415

NEW QUESTION 54

Scenario: A Citrix Engineer needs to use Citrix App Layering to create layered images for use with a Citrix Virtual Apps and Desktops environment.

The environment requires the following (MCS) Machine Creation Services-provisioned images:

* Windows 10 Virtual Delivery Agent (VDA) machines with App A, App B, and App C installed

* Windows Server 2016 VDA machines with App A, App B, and App C installed The environment is in the middle of long-term hypervisor migration and uses both Citrix Hypervisor and Microsoft Hyper-V to host VDA machines. The images must be available on both hypervisor types.

The engineer has determined that Elastic and User Layers will NOT be used in this environment.

In this scenario the engineer will needlayered image(s) andOS Layer

(s) to meet the image requirements while minimizing administrative effort.
* 4; 4
* 4; 1
* 2; 1
* 2; 2
* 4; 2
* 2; 4

NEW QUESTION 55

Scenario: A Citrix Engineer is maintaining a Citrix Virtual Apps and Desktops environment and has deployed Workspace Environment Management (WEM) within the infrastructure to provide resources to users in their sessions. The engineer initially

deployed a Network Printer and it is working correctly for all users in their sessions. Recently, the engineer added a second resource, a Network Share Drive, and users are reporting that it is never available in their sessions.

The engineer verified the Action for this Network Share Drive to ensure it is correctly configured, and the required Conditions are listed under the WEM Filters node. The Everyone group has already been added to the Assignments node within the WEM console.

What should the engineer enable from the Advanced Settings node to correct this issue?

* The Agent Options to Enforce Network Drives Filters Processing
* The Agent Actions option to Process Virtual Drivers
* The Agent Actions option to Process Network Drivers
* The Agent Options to Enforce Virtual Drives Filters Processing

https://docs.citrix.com/en-us/workspace-environment-management/current-release/user-interface-description/advanced-settings.html

NEW QUESTION 56

Which two statements are true regarding the Citrix App Layering Management Console? (Choose two.)

* It is only supported as an on-premises solution for Citrix App Layering.
* It is used to manage system settings for Citrix App Layering.
* It is used to add layered images into Citrix Studio.
* It is a web-based console that runs on the Enterprise Layer Manager (ELM) server.
* It coordinates all communications within the Citrix App Layering environment.

NEW QUESTION 57

Scenario: A Citrix Engineer is managing a large Citrix Virtual Apps and Desktops environment with three sites. Users connecting to applications and VDI machines in these sites are using a common Citrix ADC Gateway. The engineer wants to configure peripheral federation and port redirection policies for secure access to the site resources.

Which feature should the engineer use to configure policies centrally only once and avoid configuring them on each site?

* SmartAccess
* SmartCheck
* SmartTools
* SmartControl

Explanation

https://docs.citrix.com/en-us/netscaler-gateway/12/integrate-web-interface-apps/smart-control.html

NEW QUESTION 58

Scenario: A Citrix Engineer is working on ICA policies to restrict sharing of client clipboard data to user sessions. However, the engineer wants to allow some specific formats to be shared.

Which two policies should the engineer configure to allow this? (Choose two.)

* Client clipboard write allowed formats
* Restrict session clipboard write
* Restrict client clipboard write
* Session clipboard write allowed formats

Explanation/Reference: https://docs.citrix.com/en-us/citrix-virtual-apps-desktops/policies/reference/ica-policy-settings.html

NEW QUESTION 59

Which two components directly communicate with each other during the process of resource launch, when Federated Authentication Service (FAS) is used? (Choose two.)

* Certificate Authority and Domain Controller
* FAS Server and Delivery Controller
* FAS Server and Citrix ADC
* FAS Server and Virtual Delivery Agent (VDA)

NEW QUESTION 60

Which two statements are true when Citrix App Layering is used with Citrix Virtual Apps and Desktops?

(Choose two.)

* Citrix App Layering offers all the same functionality as Citrix Provisioning (PVS).
* Citrix App Layering simplifies application deployments and updates.
* Citrix App Layering reduces management of multiple golden images.
* Citrix Machine Creation Services (MCS) catalogs can be updated within the Citrix App Layering Management console.

NEW QUESTION 61

What is a Citrix App Layering recipe?

* Documented sequence of steps for integrating applications into Citrix App Layering
* Scripts to automate the deployment of a Citrix App Layering infrastructure
* Scripts to automate the deployment of applications into Citrix App Layering
* Documented sequence of step for installing a Citrix App Layering infrastructure

https://docs.citrix.com/en-us/citrix-app-layering/4/layer/app-layering-recipes.html

NEW QUESTION 62

A Citrix Engineer wants to enable the “Log Off Web Portal When Session is Launched” feature within Workspace Environment Management (WEM) transformer settings.

What does the engineer need to do prior to enabling this feature?

* Set Workspace control to NOT automatically reconnect to the sessions when users log onto StoreFront.
* Set Workspace control settings to log off from session when users log off from StoreFront.
* Set Workspace control to automatically reconnect to the sessions when users log onto StoreFront.
* Set Workspace control settings to NOT log off a session when users log off from StoreFront.

“”If you wish to use this setting, ensure you configure workspace control to not log off a session when the Web interface is logged off”

(https://wilkyit.com/2017/06/12/citrix-workspaceenvironment-manger-wem-transformer-setting-overview/)

NEW QUESTION 63

Which tool should a Citrix Engineer use to change the priority of an application layer to meet business requirements?

* PowerShell on ELM server
* ELM Management console
* PowerShell on Delivery Controller
* LayerPriority Utility

Reference:

https://support.citrix.com/article/CTX225934

NEW QUESTION 64

Which command should a Citrix Engineer use to review recent connections and brokering attempts within a Citrix Virtual Apps and Desktops site?
* Get-BrokerConnection
* Get-BrokerSession
* Get-BrokerConnectionLog
* Get-BrokerSessionLog

NEW QUESTION 65

Which two FlexCast Management Architecture (FMA) services will have an additional connection to a secondary database apart from having a connection with the Site database? (Choose two.)
* Citrix Configuration service
* Configuration Logging service
* Monitoring service
* Broker service
Explanation

https://docs.citrix.com/en-us/xenapp-and-xendesktop/7-6-long-term-service-release/xad-change-db-location.html

NEW QUESTION 66

Scenario: There are two domains in an organization: Domain A and Domain B. A Citrix Engineer configured SAML authentication for Domain A, without implementing Citrix Federated Authentication Service (FAS).

While launching the Citrix apps, the Single Sign-on will.
* work for users from Domain A and NOT for users from Domain B
* work for users from Domain B and NOT for users from Domain A
* work for the users from Domain A and Domain B
* NOT work for the users from Domain A and Domain B
Explanation

“With SAML, Citrix Gateway and StoreFront do not have access to the user’s password and thus cannot perform single sign-on to the VDA. FAS works around this limitation by using issuing certificates that can be used to logon to the VDA.” – Reference:

https://www.carlstalhood.com/citrix-federated-authentication-service-saml/

NEW QUESTION 67

Scenario: A Citrix Engineer is maintaining a Citrix Virtual Apps environment. The engineer has recently noticed two single-threaded applications consistently consuming 25% of the CPU resources, causing substantial performance issues for users of these servers. The engineer has deployed Workspace Environment Management (WEM) within the infrastructure and enabled CPU Spikes Protection.

What else can the engineer enable within WEM to address this issue?
* Exclude Specified Processes and add the two problem applications

* Process Affinity and add the two problem applications
* CPU Clamping and set it to 10% for the two problem applications
* Limit Sample Time and set it to 10% for the two problem applications
