SAP C_TS460_2021 Exam Description:

The "SAP Certified Application Associate - SAP S/4HANA Sales 2021 Upskilling" certification exam validates that the candidate possesses the fundamental and core knowledge required of the SAP S/4HANA Sales profile. This certification proves that the candidate has an overall understanding and in-depth technical skills to participate as a member of a project team in a mentored role. This certification exam is recommended as an entry level qualification. This certification exam is appropriate for those who are certified in any of the certification exams: "SAP Certified Application Associate - Sales and Distribution, ERP 6.0 EhP7" / "SAP Certified Application Associate - Sales and Distribution, ERP 6.0 EhP6" / "SAP Certified Application Associate - Order Fulfillment with SAP ERP 6.0 EHP5

Q20. Which elements may be considered when determining the available quantity in an available-to-promise (ATP) check for a sales order item? Note: There are 3 correct answers to this question.

- * Reservations
- * Billing documents
- * Sales documents
- * Warehouse orders
- * Production orders

Q21. Which elements are used during the automatic shipping point determination in a sales order? Note: There are 3 correct answers to this question.

- * Delivering plant from the sales order schedule line
- * Shipping conditions
- * Transportation group
- * Delivering plant from the sales order item
- * Loading group

Q22. Sales order scheduling uses several lead times. What are the source objects for these lead times? Note: There are 2 correct answers to this question.

- * Sold-to party
- * Route
- * Shipping point
- * Plant

Q23. In the event of a material shortage, your customer wants you to ship as much material as possible on the requested date, while still requiring eventual delivery of the full ordered quantity. What do you set to achieve this requirement?

- * The Partial Delivery Allowed indicator
- * The Complete Delivery indicator in the sales order header
- * The Unlimited Tolerance indicator
- * The Only Complete Delivery Allowed indicator

Q24. What are some of the advantages of the SAP Fiori user experience? Note: There are 2 correct answers to this question.

- * SAP Fiori apps have a different look and feel, depending on the role of the user
- * SAP Fiori apps can be arranged in groups to allow for personalization
- * SAP Fiori apps are role-based and therefore built around the user, not the function
- * SAP Fiori apps provide single, complex transactions for use by multiple job roles.

Q25. You want the system to copy the entire source document to the target document and issue a message when someone tries to

change the order quantity or delete an item. You can achieve this by selecting the Complete Reference indicator. Where do you do this?

- * In the header-level copy control
- * In the source item category
- * In the item-level copy control
- * In the source document type

Q26. What characterizes the Intelligent Enterprise? Note: There are 2 correct answers to this question

- * The enterprise system enables users to work with live data and embedded analytics
- * The transactional and analytical components of the enterprise system have been separated
- * Embedded real-time monitoring delivers full visibility of all core sales processes
- * Users execute multiple reports to understand performance against their KPIs.

Q27. You want your organization to support cross-division sales. Where do you set this in Customizing?

- * Item category
- * Distribution channel
- * Sales organization
- * Sales document type

Q28. What can you do in the SAP Fiori app Sales Order Fulfillment Issues? Note: There are 2 correct answers to this question.
