

SAP C_IBP_2202 Dumps Updated Nov 27, 2022 With 80 Questions [Q16-Q35]

SAP C_IBP_2202 Dumps Updated Nov 27, 2022 With 80 Questions [Q16-Q35]

SAP C_IBP_2202 Dumps Updated Nov 27, 2022 With 80 Questions View All C_IBP_2202 Actual Free Exam Questions Nov 27, 2022 Updated

SAP C_IBP_2202 Exam Syllabus Topics:

Topic 1- Use the Fiori Launchpad to customize the UI, work with Excel UI- Key Figures & Attributes
Topic 2- Create statistical forecast using historical data with basic methods- Planning Operators & Application Jobs
Topic 3- Optimize inventory in the supply chain utilizing algorithms that derive inventory targets- General Configuration of a Planning Area
Topic 4- Display, create, copy, edit, check, and activate a planning area- Analytics and Reporting
Topic 5- Describe the benefits of implementing SAP's Integrated Business Planning solution- Create and use key figures and attributes

NEW QUESTION 16

You are evaluating criteria for choosing the solver to support planning for a complex supply chain. What are some of the points that

should be reviewed? Note: There are 2 correct Answers to this question.

- * Planning results can be generated faster by the optimizer.
- * Prioritization of demand elements one by one is achieved by heuristics.
- * Push and Pull production models are used by the optimizer.
- * Finite heuristics can achieve demand prioritization and pegging.

NEW QUESTION 17

You want to display and edit data in different units of measure (UOM). Which of the following must you consider before you use UOM?

Note: There are 3 correct Answers to this question.

- * Analytics provide the user with the option to select the target unit of measure.
- * Unit of measure is an attribute of a master data type, such as Product.
- * Units of measure are usually not time-dependent.
- * Units of measure are usually not time-independent.
- * Conversion to the target unit of measure is handled by functionality of SAP IBP Excel UI

NEW QUESTION 18

What is a prerequisite for modeling outsourced manufacturers with production capacity?

- * Model production costs for internal and external production resources to model priority.
- * Model target inventory and stocks at the outsourced location.
- * Ensure that multiple modes of transportation are set up.
- * Use production lead times and offsets to manage components at the outsourced location.

NEW QUESTION 19

When can filter blocks appear in calculations? Note: There are 2 correct Answers to this question.

- * When using IFISNULL statements in the formula
- * When modeling cross-period calculations
- * When modeling attribute as a key figure
- * When modeling attribute transformations

NEW QUESTION 20

You are invited to review a problem with a customer's SAP IBP Excel template performance. What areas with the biggest potential performance impact would you focus on?

Note: There are 2 correct Answers to this question.

- * Number of local members and complexity of calculations
- * Complex calculation graphs for key figures
- * Excessive IBP formatting in Excel UI
- * Number of analytics charts displaying key figures' values

NEW QUESTION 21

Which of the following are the key features of SAP Supply Chain Control Tower? Note: There are 2 correct Answers to this question.

- * Ability to balance demand and supply and attain financial targets

- * Ability to create a feasible plan
- * Ability to use task and case management
- * Ability to create smart alerts

NEW QUESTION 22

Which of the following are features of lag-based snapshots? Note: There are 2 correct Answers to this question.

- * Target key figures for these snapshots are exposed to the user in planning views.
- * Lag-based snapshots are created in the Configuration app for a fixed time range.
- * Target key figures for these snapshots must have lag as a root attribute.
- * Lag-based snapshots are automatically assigned to a snapshot operator.

NEW QUESTION 23

What setting is mandatory in the Manage Lifecycle Planning app when introducing a new product?

- * Define which phase-in and phase-out profiles can be used within Lifecycle Planning
- * Define which key figure can be used as sales history for new products
- * Define at least one attribute of the planning area which represents the Product ID
- * Define which is the attribute ID for the Lifecycle profiles

NEW QUESTION 24

You are reviewing the master data types for supply planning. Which master data types are compound master data types? Note: There are 2 correct Answers to this question.

- * LOCATIONFR
- * sourcelocation
- * SOURCECUSTOMER
- * SOURCEPRODUCTION

NEW QUESTION 25

You are working on a mid-range plan that spans the seasonal peak and you are evaluating the need for additional crewing. Which of the following parameters can you model to plan production with extra shift(s)?

- * Incremental production values
- * Capacity expansion with additional costs
- * Production source validity at the start of seasonal peak
- * Adjusted production interactive values

NEW QUESTION 26

What are some of the prerequisites for configuring a planning area that results in a successful consistency check? Note: There are 2 correct Answers to this question.

- * Configure at most two input key figures on the same planning level in a key figure calculation.
- * Assign the compound master data type and its component master data types.
- * Specify a planning horizon in the planning area for each level of the assigned time profile.
- * Configure at least one calculated key figure for the planning area.

NEW QUESTION 27

Which of the following are functions of SAP IBP for demand? Note: There are 3 correct Answers to this question.

- * Detailed statistical analysis of demand data using the supply chain algorithm library
- * Embedded, on-the-fly demand analytics
- * Demand sensing of demand data using the supply chain algorithm library
- * Detailed statistical analysis of demand data using predictive analytics tools
- * Demand sensing of demand data using predictive analytics tools

NEW QUESTION 28

A time profile is defined with the levels of day, technical week, week, month, quarter, and year.

What condition in configuration will allow you to have a different value in the current week, versus all other buckets?

- * IF(;“PERIODID2” =”,\$\$PERIODID2CU\$\$…)
- * IF(;“PERIODID5” =”,\$\$PERIODID5CU\$\$…)
- * IF(;“PERIODID4” = “,\$\$PERIODID4CU\$\$…)
- * IF(;“PERIODID3” =”,\$\$PERIODID3CUSS…)

NEW QUESTION 29

Which header name displays are available in the Report Options menu of the SAP IBP Excel interface? Note:

There are 2 correct Answers to this question.

- * Changed member names that the user had created
- * Caption, as defined in configuration for the default name
- * Business meaning, as defined in configuration
- * Full unique name including the dimension and technical name

NEW QUESTION 30

NO.23 You are redesigning planning for supply chain that is facing the issue of variability. What is the best solution for dampening variability via demand classification?

- * SAP IBP for Demand
- * SAP IBP for Demand Driven Replenishment
- * SAP IBP for Inventory
- * SAP IBP for Sales and Operations Planning

NEW QUESTION 31

Which of these conditions must be met to create a Local Member key figure?

- * A key figure is created in the Planning Area app.
- * Use Excel Cell References in Report Editor is selected.
- * A key figure is selected in the Key Figures tab in the Microsoft Excel add-in.
- * Activate Local Member Recognition is selected.

NEW QUESTION 32

Which of the following can be used as inputs for inventory level optimization? Note: There are 2 correct Answers to this question.

- * Target inventory level
- * Lead time variability
- * Lot sizes
- * Reorder point

NEW QUESTION 33

Which conditions are prerequisites for key figure disaggregation?

- * The key figure is calculated and editable.
- * The key figure is calculated and aggregation mode is selected.
- * The key figure is set to Not Editable.
- * The key figure is stored and editable.

NEW QUESTION 34

You want to set up demand sensing to analyze demand changes in execution or close to execution windows.

Which of the following conditions must you consider during the setup? Note: There are 2 correct Answers to this question.

- * At setup test the system to run the demand sensing (full) algorithm weekly and the demand sensing (update) on a daily basis.
- * The result generates sensed demand data at the monthly time granularity for the full time horizon
- * Set up the forecast model to be executed at product-location level.
- * It is mandatory to load historical lag-based snapshot data.

NEW QUESTION 35

You have set up a planning area and data is available. You adjust the necessary time profile settings and run the consistency check.

Which settings can you change and still run a successful consistency check?

Note: There are 2 correct Answers to this question.

- * Change the past and future horizon of the levels in the time profile.
- * Remove an attribute assigned to the time profile level if the attribute is used in a planning level.
- * Add a new time profile level to the time profile.
- * Change the description of the attributes in the time profile.
