

## 2V0-21.20PSE PDF Dumps 2022 Exam Questions with Practice Test [Q52-Q71]

## 2V0-21.20PSE PDF Dumps 2022 Exam Questions with Practice Test [Q52-Q71]

### 2V0-21.20PSE PDF Dumps 2022 Exam Questions with Practice Test Dumps for Free 2V0-21.20PSE Practice Exam Questions NEW QUESTION 52

An administrator runs third-party software in a virtual machine (VM). The third-party licensing agreement requires payment of a license fee for each host to which the VM migrates.

How can the administrator configure Distributed Resource Scheduler (DRS) to minimize licensing costs?

(Choose the best answer.)

- \* Create a &#8216;Virtual Machines to Virtual Machines&#8217; dependency rule.
- \* Create a &#8216;Virtual Machines to Virtual Machines&#8217; affinity rule.
- \* Create a &#8216;Should run Virtual Machines to Hosts&#8217; anti-affinity rule.
- \* Create a &#8216;Must run Virtual Machines to Hosts&#8217; affinity rule.

### NEW QUESTION 53

Which solution can be used to automatically deploy a fully configured VMware software-defined data center (SDDC)?

- \* vSphere Lifecycle Manager
- \* VMware Cloud Foundation
- \* vRealize Suite
- \* vCenter Server

### NEW QUESTION 54

How does vSphere handle memory allocation during the instant clone process? (Choose the best answer.)

- \* The first child virtual machine serves as a memory snapshot for any subsequent child virtual machines.
- \* An identical clone of the parent virtual machine's memory is created for each child virtual machine
- \* Memory is shared among all child virtual machines using a delta disk.
- \* A unique memory pool is created per child virtual machine using copy-on-write.

Explanation

[https://docs.vmware.com/en/VMware-vSphere/7.0/com.vmware.vsphere.vm\\_admin.doc/GUID-853B1E2B-76CE](https://docs.vmware.com/en/VMware-vSphere/7.0/com.vmware.vsphere.vm_admin.doc/GUID-853B1E2B-76CE)

### NEW QUESTION 55

An administrator wants to create a master copy of an existing virtual machine (VM) named 'TestApp' and deploy VMs from this master copy whenever a user requests one.

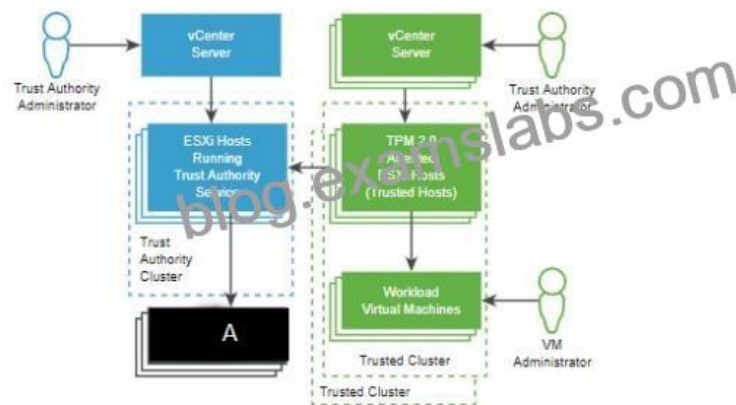

Which method can the administrator use to create a master copy of TestApp? (Choose the best answer.)

- \* Deploy from an Open Virtual Machine Format (OVF) template
- \* Convert a template to a VM
- \* Clone the VM to a template
- \* Create a new VM

### NEW QUESTION 56

Refer to the exhibit.

Figure 8-1. vSphere Trust Authority Architecture

Which trusted infrastructure component is missing and represented by the area labeled 'A'?

- \* Attestation Service
- \* Key Provider Service
- \* vSphere Virtual Machine Encryption
- \* Key Management Server

### NEW QUESTION 57

A company has a vSphere environment consisting of the following characteristics:

- \* A content library named &#8216;CORP&#8217; is published at corporate headquarters on a vCenter Server named &#8216;vcenterCorp&#8217;.
- \* A regional data center contains a set of hosts managed by a vCenter Server named vcenterR1.
- \* vcenterR1 subscribes to the CORP content library.

The administrator wants to create a new virtual machine image to use on vcenterR1. What are two possible ways the administrator can accomplish this task? (Choose two.)

- \* Configure vcenterR1 to download all library content immediately.
- \* Upload the new image to the CORP library on vcenterR1.
- \* Publish the CORP content library on vcenterR1.
- \* Upload the new image to the CORP library on vcenterCorp.
- \* Upload the new image to a local content library on vcenterR1.

Explanation

[https://docs.vmware.com/en/VMware-vSphere/6.5/com.vmware.vsphere.vm\\_admin.doc/GUID-254B2CE8-20A8](https://docs.vmware.com/en/VMware-vSphere/6.5/com.vmware.vsphere.vm_admin.doc/GUID-254B2CE8-20A8)

### NEW QUESTION 58

An administrator is tasked with upgrading an existing vSphere environment to version 7.0. The current configuration is using an external Platform Services Controller.

Which two statements are true regarding this upgrade? (Choose two.)

- \* The external Platform Services Controller needs to be decommissioned following the deployment of the new vCenter Server Appliance.
- \* The external Platform Services Controller needs to be converged into an embedded vCenter Server Appliance.
- \* The external Platform Services Controller needs to be powered down while a new vCenter Server Appliance is deployed.
- \* The external Platform Services Controller backup can be restored to a new embedded vCenter Server Appliance.
- \* The external Platform Services Controller needs to be upgraded after the vCenter Server Appliance.

### NEW QUESTION 59

What is the minimum number of ESXi hosts required to support vCenter High Availability? (Choose the best answer.)

- \* 6
- \* 3
- \* 2
- \* 4

### NEW QUESTION 60

An administrator can attach a baseline to which two inventory objects? (Choose two.)

- \* Resource pools
- \* Data centers
- \* Datastores
- \* Templates
- \* ESXi hosts

### Explanation

<https://docs.vmware.com/en/VMware-vSphere/6.0/com.vmware.vsphere.upgrade.doc/GUID-5EA28531-0813-4B>

### NEW QUESTION 61

An administrator is tasked with upgrading an existing vSphere environment to version 7.0. There are existing VMFS3 and VMFS5 datastores in the environment.

Which statement is true regarding this upgrade? (Choose the best answer.)

- \* An ESXi 7.0 host will NOT recognize a VMFS3 datastore.
- \* VMFS3 is supported with ESXi 7.0 to store boot configurations only.
- \* A VMFS5 datastore CANNOT be upgraded; a new VMFS6 datastore is required.
- \* An ESXi 7.0 host can automatically upgrade a VMFS5 datastore.

### NEW QUESTION 62

An administrator is running a variety of vSphere 6.5 cluster configurations and is tasked with upgrading to vSphere 7.0.

Which two conditions could cause potential conflicts or outages to the virtual machines (VMs)? (Choose two.)

- \* The use of a Windows vCenter Server system
- \* Datastores attached to the hosts based on VMFS3
- \* The upgrade of a vSphere Distributed Switch with VMs attached
- \* The upgrade of an external platform services controller
- \* The use of third-party custom vSphere Installation Bundles (VIBs) installed on the ESXi hosts

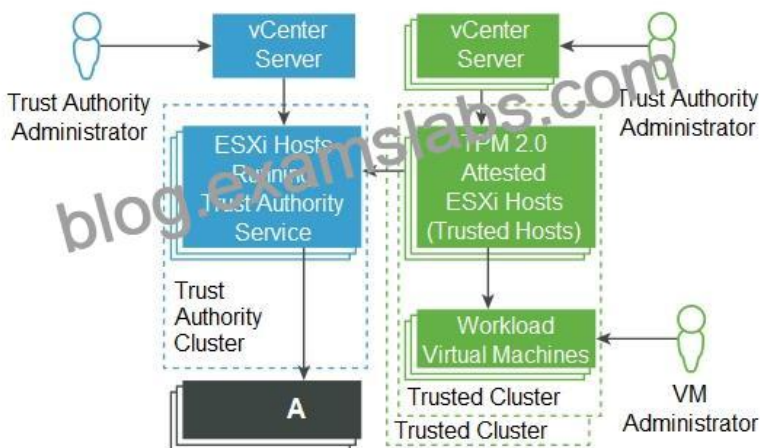

### Explanation

[https://www.vmware.com/content/dam/digitalmarketing/vmware/en/pdf/techpaper/vmfs-5\\_upgrade\\_consideratio](https://www.vmware.com/content/dam/digitalmarketing/vmware/en/pdf/techpaper/vmfs-5_upgrade_consideratio)

### NEW QUESTION 63

Refer to the exhibit.

**Figure 8-1. vSphere Trust Authority Architecture**

Which trusted infrastructure component is missing and represented by the area labeled 'A'? (Choose the best answer.)

- \* Key Management Server
- \* vSphere Virtual Machine Encryption
- \* Key Provider Service
- \* Attestation Service

#### NEW QUESTION 64

Which feature can an administrator use for site availability with minimal effort and a low recovery point objective (RPO)?

- \* vSphere vMotion
- \* vSphere Fault Tolerance
- \* vSphere Replication
- \* vSphere High Availability

#### NEW QUESTION 65

An administrator wants to be able to log in to the vSphere Client and view the inventories of two vCenter Server instances. What must the administrator do to meet this requirement?

- \* Connect each vCenter Server instance to the same vCenter Single Sign-On domain during deployment.
- \* Connect each vCenter Server instance to the same vCenter Single Sign-On domain using the vSphere Client.
- \* Configure the vCenter Server Management Interface to view both vCenter Server instances.
- \* Configure Enhanced Linked Mode on each vCenter Server instance after deployment is complete.

#### NEW QUESTION 66

An administrator runs a two-node vSphere cluster, which contains two domain controller virtual machines (VMs). The administrator wants to ensure that VMs run on separate hosts without interfering with normal maintenance operations.

How should the administrator configure Distributed Resource Scheduler (DRS)? (Choose the best answer.)

- \* Create a 'Must run Virtual Machines to Hosts' anti-affinity rule.
- \* Create a 'Virtual Machines to Virtual Machines' anti-affinity rule.
- \* Create a 'Virtual Machines to Virtual Machines' dependency rule.
- \* Create a 'Should run Virtual Machines to Hosts' anti-affinity rule.

#### NEW QUESTION 67

Which local only host utility is used for primary, real-time performance monitoring in vSphere?

- \* esxCop
- \* top
- \* resxtop
- \* vSphere Command-Line Interface (CLI)

#### NEW QUESTION 68

What is a requirement of Storage I/O Control? (Choose the best answer.)

- \* Storage connected through Fibre Channel
- \* Management by a single vCenter Server
- \* Datastores with multiple extents
- \* Automated storage tiering capabilities

### NEW QUESTION 69

Which step is required when adding an existing hard disk that is configured as a boot disk during virtual machine creation? (Choose the best answer.)

- \* Enable Secure Boot.
- \* Select 'RDM Disk' from the 'Add New Device' drop-down menu.
- \* Remove the existing disk before adding the boot disk.
- \* Set the boot delay to at least 5,000 milliseconds.

Explanation

[https://docs.vmware.com/en/VMware-vSphere/7.0/com.vmware.vsphere.vm\\_admin.doc/GUID-79116E5D-22B3](https://docs.vmware.com/en/VMware-vSphere/7.0/com.vmware.vsphere.vm_admin.doc/GUID-79116E5D-22B3)

### NEW QUESTION 70

Which two VMware features are supported in a virtual machine using Intel Software Guard Extensions (Intel SGX) technology? (Choose two.)

- \* vSphere vMotion
- \* Storage I/O Control
- \* Virtual machine suspend and resume
- \* VM encryption
- \* Fault tolerance

### NEW QUESTION 71

An administrator is tasked with upgrading an existing vSphere environment to version 7.0. The environment consists of mounted NFS v3 datastores. The new design requires configuration of NFS v4.1 datastores.

Which statement is true regarding this upgrade? (Choose the best answer.)

- \* The NFS v3 datastores can be unmounted and remounted using NFS v4.1.
- \* A new VMKernel port for NFS v4.1 needs to be created before the upgrade.
- \* Following first boot, NFS v3 datastores are automatically converted to NFS v4.1 by ESXi 7.0
- \* ESXi 7.0 does NOT support NFS v4.1.

What are the benefits of VMware 2V0-21.20PSE Exam certified professional?

VMware 2V0-21.20PSE certifications help employees to gain self employment and improve the skills of IT experts to get a better job in the market. The employee will be able to solve problems more quickly by learning how to configure, install, deploy and maintain the products that are required for a certain projects or tasks to be completed successfully. When someone has acquired sufficient knowledge about VMware technology and solutions then it becomes easy for them to achieve their full potential as an expert in their field. **VMware 2V0-21.20PSE Dumps** are designed by the experts from the industry who have been working with the latest version of VMware technologies. Account Manager helps in developing the best exam study material that will definitely

help you pass VMware 2V0-21.20PSE exam easily. Then you will be able to prove your skills to the world that you are the best. So, start preparing for the VMware 2V0-21.20PSE exam. Our practice exams help employees to gain self employment and improve the skills of IT experts to get a better job in the market. The employee will be able to solve problems more quickly by learning how to configure, install, deploy and maintain the products that are required for a certain projects or tasks to be completed successfully. VMware 2V0-21.20PSE exam with our practice exams.

**Check your preparation for VMware 2V0-21.20PSE On-Demand Exam:**
