Dumps for Free SAP C_SEN_2011 Practice Exam Questions [Dec 05, 2022 C_SEN_2011 Dumps PDF And Certification Training

SAP C_SEN_2011 Exam Description:

The "SAP Certified Application Associate - SAP Enable Now" certification exam validates that the candidate possesses the fundamental and core knowledge required of the Application and Implementation consultant profile. This certification proves that the candidate has an overall understanding and in-depth technical skills to participate as a member of a project team in a mentored role. This certification exam is recommended as an entry level qualification.

SAP C_SEN_2011 Exam Syllabus Topics:

TopicDetailsTopic 1- Show different publication opportunities- explain different ways on how learners can access contentTopic 2- Demonstrate an overall, component spanning expert knowledge- In-App Help Creation & LocalizationTopic 3- Demonstrate advanced know-how in the creation of performance support content- In-App Help ImplementationTopic 4- Collaborative Production Environment Setup- Implementation and Configuration- Content Maintenance & Deployment

Q28. A Learning Management System (LMS) does NOT receive any results or scores from the processed SAP Enable Now course. What could be the reason for this issue? Note: There are 2 correct answers to this question.

- * The LMS does not provide an SAP Enable Now interface.
- * The tracking back end from the playback settings was set to SCORM (automatic).
- * The configuration of the Result Type option does not meet the LMS requirements.
- * The tracking back end from the playback settings was set to Manager.

Q29. Which file exists for all SAP Enable Now objects at the file system level?

- * The entity descriptor entity.xml
- * The preview.png
- * The reference to the workarea
- * The slide.xml

Q30. Which file exists for all SAP Enable Now objects at the file system level? Choose the correct answer.

- * The entity descriptor entity.xml
- * The preview.png
- * The slide.xml
- * The reference to the workarea

Q31. How can you deliver a role-based Desktop Assistant? Note: There are 2 correct answers to this question.

- * Activate the Desktop Assistant Tracking option in the Desktop Assistant playback settings.
- * Publish several content packages via role-filtered publishing of subtrees.
- * Connect Desktop Assistant with the target application and use the roles provided by the application.
- * Use the Roles field in Producer and publish one Desktop Assistant for all users so users can select their roles manually.

Q32. What actions are possible with hidden objects in the project explorer? Note: There are 2 correct answers to this question.

- * Link to the hidden object and open it in the library.
- * Create an object reference that is visible.
- * Define a time range for the object to be hidden.
- * Use the hidden objects to generate documents.

Q33. You open an outdated workarea without Manager connection in Producer of your on-premise edition of SAP Enable Now. How do you migrate the workarea to the current version? Choose the correct answer.

- * You can use the Migrate function in the Workarea menu.
- * You will be automatically prompted by a dialog to migrate.
- * You can use the Migrate function in the Tools menu.
- * You can use the Migrate function in the context menu of the Resource object.

Q34. What are typical characteristics of the Desktop Assistant cache? Note: There are 3 correct answers to this question.

- * The lesson.js date is the base for the cache update.
- * Only requested files will be cached.
- * When a new Desktop Assistant version is installed, the cache must be deleted manually on every end user machine.
- * It reduces the network load.
- * The update frequency cannot be changed.

Q35. Web Assistant and Desktop Assistant are used as in-app help, but there are differences to consider.

Which properties apply only to the Web Assistant? Note: There are 3 correct answers to this question.

- * It works for all applications.
- * It provides default SAP content for SAP S/4 HANA and SAP SuccessFactors.

- * It works on Apple computers and tablets.
- * It requires client installation.
- * It offers a dedicated What

Q36. In what scenario should you use automated re-recording?

- * If the interface is the same, but the process changed completely
- * When the interface changed, and the process changed only slightly
- * If you re-record a simulation that was recorded in Quick Recording mode
- * When the interface changed, but the process is still the same

Q37. What are SAP best practices in a knowledge content production scenario? Note: There are 2 correct answers to this question.

- * Cover the entire end-to-end process in a single recording.
- * Keep the content granular and avoid redundancies.
- * Use metadata and tagging to keep it maintainable.
- * Use a separate workarea for each project.

Q38. How can you deliver a role-based Desktop Assistant? Note: There are 2 correct answers to this question.

- * Use the Roles field in Producer and publish one Desktop Assistant for all users so users can select their roles manually.
- * Publish several content packages via role-filtered publishing of subtrees.
- * Connect Desktop Assistant with the target application and use the roles provided by the application.
- * Activate the Desktop Assistant Tracking option in the Desktop Assistant playback settings.

Q39. How do you edit course assignments in Manager once they have been set up? Note: There are 2 correct answers to this question.

- * Select the object the course was created for and select the course tab.
- * Select Assignments in the Administration menu.
- * Search all folders in the workarea to locate the course.
- * Use the Filter function and enter the object name the course was created under.

Q40. What must you consider when you customize resources? Note: There are 2 correct answers to this question.

- * Modify the existing default styles instead of creating customer specific styles.
- * Finish customization before content production.
- * Assign customizing permissions to all authors.
- * Do NOT modify standard style resources.

Q41. You have exported one translation file. You see that one bubble object that you want to translate is NOT on the file. What should you do to have it on the exported file? Choose the correct answer.

- * Activate the Interactive Mode option in the bubble properties.
- * Check the translate manually flag.
- * Add `“_Translate”` to the end of the object name.
- * Deactivate the Show in Document option in the bubble properties.

Q42. A customer wants to use Desktop Assistant for a non-SAP target application that is not listed in the Product Availability Matrix (PAM) and asks you whether this is possible. What do you reply?

- * Desktop Assistant can be rolled out for an application, but will support the application context only.
- * Because the application is not listed in the PAM, Desktop Assistant cannot be rolled out for this application.
- * The PAM shows the limitations for SAP applications. Non-SAP applications are supported out-of-the-box.
- * Because the application is not listed in the PAM, it is not officially supported. You must evaluate whether the application will work.

Q43. You implement SAP Enable Now and want to use the customer's existing data and applications. What does SAP recommend you do? Note: There are 2 correct answers to this question.

- * Connect SAP Enable Now with the customer
- * Use the customer
- * Use the customer
- * Import existing customer content via SCORM into SAP Enable Now Manager.

Q44. Your customer uses SAP Enable Now, cloud edition and the Desktop Assistant. They want to use an on-premise web server to deliver the content. What must they consider?

- * MIME type .inav must be supported by the web server.
- * A specific .xdnt file pointing to the web server must be created and uploaded to the Manager.
- * Desktop Assistant on-premise must be installed on each end-user machine.
- * The web server must be Microsoft IIS.

Q45. What must you do before you update SAP Enable Now on-premise? Note: There are 2 correct answers to this question.

- * Edit the workarea resources entity.xml files manually.
- * Back up the file repository and database.
- * Preview the new version of SAP Enable Now and test the content.
- * Download the SAP Enable Now installers from SAP Service Marketplace.

Q46. You implement SAP Enable Now and want to use the customer's existing data and applications. What does SAP recommend you do? Note: There are 2 correct answers to this question.

- * Import existing customer content via SCORM into SAP Enable Now Manager.
- * Use the customer's Learning Management System (LMS) for courseware delivery and tracking.
- * Connect SAP Enable Now with the customer's incident management system.
- * Use the customer's Business Process Model data as a starting point for the Library design.

Q47. What are SAP best practices when creating book page content? Note: There are 2 correct answers to this question.

- * Create book pages based on templates.
- * Use shapes to create buttons with links.
- * Use descriptive, individual names for objects.
- * Always insert images directly into the book page.

Q48. How can you address a pre-filtered view of a structure in a published library?

- * By cloning the structure and deleting the unwanted duplicates
- * By adding the end user filter directly to library.html
- * By activating the author filter and applying it for end users
- * By adding the filter-specific library.txt infix to the URL

Q49. What kind of objects, structures or elements can be referenced? Note: There are 3 correct answers to this question.

- * Media objects
- * Groups
- * Text units
- * Resources
- * Workareas

Q50. You are planning an SAP Enable Now on-premise implementation. What must you do to ensure network security compliance? Note: There are 2 correct answers to this question.

- * Add the Upload Active Content permission to all users.
- * Contact network administrators to confirm that the network security restrictions allow the required MIME types.

- * Use standard ports only.
- * Adapt the password policy of the Manager to the password policy of the customer.

Q51. Which of the following multitier architectures are possible with SAP Enable Now Manager, HANA option on premise? Note: There are 2 correct answers to this question.

- * Three-tier: application server, file storage, and HANA database all on different machines
- * Two-tier: application server and file storage on one machine; HANA database on a second
- * One-tier: all components installed on the same machine
- * Two-tier: application server and HANA database on one machine; file server storage on a second
