

The New C-S4FCF-2020 2022 Updated Verified Study Guides & Best Courses [Q42-Q65]

The New C-S4FCF-2020 2022 Updated Verified Study Guides & Best Courses Authentic C-S4FCF-2020 Exam Dumps PDF - 2022 Updated

Invest in your future by earning an SAP Certified Application Associate Certification

It is a given that SAP Certified Application Associate certifications are important in the marketplace. These days, many organizations are looking for professionals who have proven skills. Certification can enhance your marketability and strengthen your resume. They aren't cheap though, and the exam process, not to mention the cost of training materials, can be daunting to those on a budget. One way to find good value for your money is to see if you can get a discount on your certification by purchasing through a third-party vendor such as Amazon or eBay. This is becoming increasingly common as more people seek out bargains using the Internet. Object update is correct for types of bundle strategy and change of syllabus is free demo PDF. To do this, you will need to research the specific certification(s) you have in mind. **SAP C_S4FCF_2020 Dumps**, SAP C_S4FCF_2020 Covers All The Topics, SAP C_S4FCF.

As you do so, you should note whether or not there is an official training program offered by SAP AG, or whether the only way to study for the exams is through third-party providers such as Amazon or other online retailers and resellers of training materials. If there are no official training programs available, you may want to consider just saving up a little longer and purchasing your exam preparation materials directly from SAP itself.

What is the exam cost of the SAP C_S4FCF_2020 Exam

The cost of the SAP C_S4FCF_2020 Exam is \$350 USD.

Q42. What is the recommended deployment option for SAP Landscape Transformation?

- * On SAP Cloud Platform
- * On the Central Finance system
- * On the source system
- * On a separate instance

Q43. Which transactional data is posted to the defined substitution accounts during the FI/CO initial load? Note:

There are 2 correct answers to this question.

- * Offsetting entries of balances
- * Open item entries
- * Offsetting entries of open items
- * Balance entries related to reconciliation accounts

Q44. Which of the following are standard characteristics for document splitting? (Choose two.)

- * Company code
- * Functional area
- * Segment
- * Profit center
- * Business area

Q45. Which of the following steps are key factors for a successful Central Finance implementation? (Choose two.)

- * Involve business process owners during system design.
- * Reorganize source systems.
- * Migrate from a two-tier architecture to a three-tier architecture.
- * Define strong master data governance processes.

Q46. Which activities must you complete before you can activate real-time replication? Note: There are 2 correct answers to this question.

- * Configure the Application Interface Framework
- * Delete the extract of the initial load data.
- * Configure the VCFIN SOURCE_SET view in the corresponding source systems.

Q47. Where are mapping errors recorded during real time replication?

- * In Application Interface Framework in the source system
- * In Application Interface Framework of the Central Finance system
- * In the SAP Landscape Transformation system
- * In the SAP Master Data Governance system

Q48. In SAP S/4HANA, if PCA is active, the profit center field is mandatory. Is it true or false?

- * True
- * False

Q49. Which functionality allows you to investigate dispute cases in Central Finance, although NO logistic documents are replicated?

- * Read-view on staging tables
- * Drill back
- * Back posting
- * Link to source dispute case

Q50. Which of the following are advantages of running SAP HANA Live embedded in the SAP Business Suite?

(Choose three.)

- * It allows using generic virtual data models
- * It provides real-time replication
- * It provides real-time operational reporting
- * It uses the generic capabilities of SAP HANA such as the XS Engine
- * It runs in older versions of the SAP Business Suite

Q51. What is an example of a selective data load using SAP Landscape Transformation?

- * Selected data for a range of years is loaded into SAP HANA.
- * Selected data field values are randomized and loaded into SAP HANA.
- * Selected data for transformation is split into portions.
- * Selected units or currencies are converted into recalculated amounts or values and loaded into SAP HANA.

Q52. In a calculation view you define a calculated column and set the Calculate Before Aggregation flag. Which of the following activities is mandatory to activate the view?

- * Mark the column as hidden
- * Set the column type to Attribute
- * Add a new aggregation node
- * Select the aggregation type

Q53. Which types of calendar are available for time attribute views in SAP HANA? (Choose two.)

- * Fiscal
- * Julian
- * Factory
- * Gregorian

Q54. You need to set up an SAP Landscape Transformation configuration for Central Finance. What must you do before you can start? Note: There are 2 correct answers to this question.

- * Create a technical user.
- * Set up RFC destinations.
- * Create database connections.
- * Activate pre-delivered SAP objects.

Q55. You have an SAP NetWeaver Business Warehouse (SAP NetWeaver BW) on SAP HANA system installed on multiple nodes. Which of the following information objects are stored on the master node?

- * ABAP system tables
- * Persistent Staging Area (PSA) tables
- * DataStore Objects (DSOs)
- * SAP NetWeaver BW master data tables

Q56. On which level can you maintain and differentiate global data types during value mapping? Note: There are 3 correct answers to this question.

- * Source system
- * Client
- * Company code
- * List ID
- * Validity date

Q57. By which customizing entity is the mapping determined for the CO-PA COGS split?

- * Settlement rule of the Central Finance system
- * Cost component structure of the Central Finance system
- * Splitting schema of the source system
- * Costing sheet of the source system

Q58. In a graphical calculation view you specify the default client to be dynamic. How the client value is determined when the view is used?

- * By reading the client of the tables in the view
- * By applying the filtering conditions on the client field
- * By executing a procedure in the user's own schema
- * By checking the session client of the user accessing the view

Q59. Which mapping can also create the necessary master data automatically in Central Finance?

- * Mapping of source systems
- * Value mapping
- * Cost object mapping
- * Key mapping

Q60. Replicating data from a non-ABAP source system is similar to replicating data from ABAP systems. Which generated objects of both scenarios are in the source system? Note: There are 2 correct answers to this question.

- * Reading engine
- * Logging table
- * Database trigger
- * Mapping and Transformation engine

Q61. Which tasks can you perform with the data provisioning view in the SAP HANA studio? (Choose two.)

- * Suspend replication of tables
- * Filter replicated data
- * Start replication of tables
- * Apply data transformations

Q62. Which of the following sequences of steps is required before you can create a report on an analytic view using replicated SAP ERP data?

- * Create a business layer -> Set up replication from ERP -> Create an analytic view -> Create analytic privileges
- * Create an analytic view -> Create analytic privileges -> Set up replication from ERP -> Create a business layer
- * Set up replication from ERP -> Create an analytic view -> Create analytic privileges -> Create a business layer
- * Create an analytic view -> Set up replication from ERP -> Create analytic privileges -> Create a business layer

Q63. Which activities must you perform to reset the initial load in the Central Finance? There are 2 correct answers.

- * Reset all relevant transactional data.
- * Start a report to clear the log data the initial load has created.
- * Stop SAP Landscape Transformation replication for AUFK tables.
- * Reset the generated mapping table entries.

Q64. Which feature is supported by the backup and recovery process within the standard delivery of SAP HANA?

- * Information model recovery
- * Automatic backup of archiving log files scheduled within SAP HANA
- * Point-in-time recovery
- * Incremental backup

Q65. When you try to delete an attribute view you receive the error message “One or more objects are dependent upon this object”. Which of the following functions can you use to find out which objects depend on this view?

(Choose two.)

- * Auto Documentation function
- * History function
- * Where-Used function
- * Display XML function
