After that, you need to make a payment for the exam. The first step is to visit the official website and login using your credentials. Once you complete the payment process, you will receive the login details.

NO.35 You removed entity types and I or attributes from the governance scope. Which consequences does this have for these objects?

There are 2 correct answers to this question.

- * They can be replicated and exported.
- * They are NOT changeable in a mass change.
- * They are temporarily removed from the data model.
- * They are NOT displayed in the UI.

NO.36 Which functions are offered by the Import app to perform master data consolidation of source records? Note:

There are 3 correct answers to this question.

- * Integrating SAP HANA Enterprise Cloud
- * Uploading data in CSV or Open Office XML format (XMLS)
- * Accessing SAP Information Steward
- * Checks for conflicts in source data tables
- * Starting the consolidation process directly

NO.37 What is the purpose of the Scope step during Fiori-based mass processing? Choose the correct answer.

- * To remove selected data from the current process
- * To select the range of fields
- * To check the record quality
- * To enter criteria to select the objects for editing

NO.38 What are the major enhancements in generic search?

- * The data model and entity type can be selected directly (this can also be preset by customizing or configuration).
- * For edition-based data, validity time can be used as search criteria, and is displayed in the result list.
- * The result list is more versatile. For example, you can filter by value, or personalize it.
- * FPM-based customizing and configuration are available.
- * Their visibility depends on customizing and selected entity type.

NO.39 What are use cases for SAP Master Data Governance consolidation? There are 3 correct answers to this question.

- * Analytical purposes
- * Initial load before central governance
- * Mergers and acquisitions
- * Financial contro
- * Monitor data quality

NO.40 You want to enable parallel processing of a single material in more than one change request at a time.

Additionally, you need to provide a step-specific user interface. What activities would you perform? Note:

There are 3 correct answers to this question

- * Select the Parallel Change Request (PCR) checkbox in Create Change Request Type and choose MATERIAL as main storage and use type 1 entity.
- * Configure a flex parallel workflow process for MATERIAL entity and implement U DYNAMIC_AGENT_DETERMINATION BAdI to enable parallel processing.
- * Select the required entities with storage and use type 4 related to the MATERIAL entity to be used in Scope on Entity Type Level.
- * Use the rule-based workflow and standard workflow in parallel for the same change request L-#8216; type with MATERIAL as the main entity.
- * Configure properties of the change request step by providing the step-specific user interface application and configuration ID for the change request type step.

NO.41 Your customer uses SAP Master Data Governance in a co-deployment scenario with NO additional target systems for the governed master data. Financial data is NOT included. What are the advantages?

There are 2 correct answers to this question.

- * Customizing synchronization is NOT required
- * Change request configuration effort is reduced
- * Data Replication configuration and monitoring is NOT required
- * Additional authorization concept is NOT required

NO.42 Which of the following Master Data Governance solutions and content are delivered by Utopia Inc.?

There are 3 correct answers to this question.

- * SAP Asset Information Workbench by Utopia
- * SAP Master Data Governance, enterprise asset management extension by Utopia
- * SAP Master Data Governance, classification system extension by Utopia
- * SAP Master Data Governance, healthcare extension by Utopia
- * SAP Master Data Governance, retail and fashion management extension by Utopia

NO.43 Your customer has a custom entity in the business partner data model. Some of the attributes from the entity are to be excluded from the governance scope. What activity would you perform?

- * Define governance status for the attributes in the governance scope.
- * Define a new change request step type and specify which fields should be governed.
- * Define the attributes on a new user interface building block to be hidden manually by the user.
- * Define validations to exclude the attributes from change request processing.

NO.44 Which of the following are basic principles of the SAP Master Data Governance solution?

There are 3 correct answers to this question.

- * Landscape: One central system for all master data domains
- * Workflow: Standardized but flexible processes including rules management and tracking
- * Governance: Change requests with built-in approval process
- * Architecture: Staging area to maintain inactive version of master data
- * Organization: Central team to ensure process-driven data quality

NO.45 What are the features of generic search configuration parameters?

- * The Search Criteria and Search Results areas can be configured by creating your own configuration for the Web Dynpro application USMD_SEARCH.
- * The Search Control area is included automatically. The visibility of it and its drop-down lists is controlled by parameterization and configuration.
- * Overall, three entity types are created. One for the design study name (ZHRCHNAME), one for the work packages (ZWPHIER), and one for the year (ZYEAR).
- * Additional UI elements are available that can be added to the single item maintenance UI in order to maintain information on higher level nodes and predecessors

NO.46 For which requirements should your customer use Multiple-Record Processing in SAP Master Data Governance, central governance?

There are 2 correct answers to this question.

- * For processing multiple complete data objects
- * For changing selected attributes of any number of records by one data specialist
- * For collaboration on a pre-defined data set by multiple processors
- * For a smaller number of records

NO.47 What are the hints for checking and activating the data model MM?

- * You can visualize the data model in a tabular format.
- * Since EhP6, you can check and activate data models using the Configuration Workbench, which offers a more intuitive user interface.
- * It is a root object of type Material (ID 194) [see also customizing activity:

Define Entity Type to Be Used by Business Object Type].

- * It does not support hierarchies.

NO.48 Your customer defined KPIs for the SAP Master Data Governance (MDG) processes. The change requests shall NOT exceed certain duration time limits. Which actions do you perform?

There are 3 correct answers to this question.

- * Set up an edition to control the maximum runtime of a change request
- * Define thresholds with the generic time management BAdI
- * Assign a service level agreement (SLA) to the change request type
- * Define change request priorities, reasons, and rejection reasons
- * Configure MDG analytical features to monitor the KPIs

NO.49 How do you configure customer-specific processes with parallel branches, step-specific user interfaces, and dynamic step management?

There are 2 correct answers to this question.

- * Use the rule-based workflow and standard workflow in parallel for the same change request type.
- * Create separate business activities and assign them to the relevant change request types.

- * Set up the flex mode to configure the parallel workflow branches.
- * Assign different UIs to each individual change request step.

NO.50 As the figure, Information Steward, illustrates, in addition to building a solid data foundation for reporting, the Data Services platform also provides a framework for ongoing governance of enterprise information assets.

The EIM 4.0 release includes a new interface for the business user – Information Steward. Once the data has been integrated and analyzed, Info Steward allows the data steward to easily share metrics with executives, and to monitor Key Performance Indicators, including what that are shown in the figure:

- * A scorecard that measures data quality
- * Duplication detection is based on SAP HANA.
- * Quality KPIs and associated metrics
- * The quality trend over time

NO.51 What are the data transfer available for data transfer in MDG for material?

- * Enterprise Services (inbound processing)
- * Out-of-the-box replication using Data Replication Framework (DRF)
- * The first step of a data transfer is the export of the master data to an IDoc-XML file
- * More data segments and object types

NO.52 What are the following further basics about defining key mappings?

- * Key mapping is required in communication if you work with unharmonized keys in your system landscape.
- * Key mapping can be used without any Customizing.
- * Review and enhance the basic mapping rules in customizing if required or you created your own Business Objects.
- * Support for ID-mapping, including key mapping of master data and value mapping of organizational data

NO.53 What must you do after you upgrade SAP Master Data Governance to SAP S/4HANA in regards to system landscape integration?

Please choose the correct answer.

- * Upgrade Data Replication to Service-/SOA-based communication.
- * Upgrade all connected SAP systems to SAP S/4HANA at the same time.
- * Activate customer vendor integration (CVI) on the receiving SAP systems for business partners.
- * Adapt key mapping if simplification item for long material numbers is activated and extended to more than 18 characters.

NO.54 What do you use to determine the next processors of a SAP Master Data Governance (MDG) change request without using ABAP coding?

There are 3 correct answers to this question.

- * The mail configuration where the SAP MDG mails can be monitored (TA SOST + SCOT)
- * The organizational management (TA PPOME) and the corresponding customizing
- * A specific assignment of a single user or a special user (for example previous processor or requester)
- * A direct assignment to a specific role (TA PFCG) in Business Rule Framework plus
- * A workflow step condition which is defined in the Workflow Builder (TA SWDD)

NO.55 Which data quality improvement check can you apply for SAP Master Data Governance – business partner with the integration of SAP and non-SAP external solutions?

Please choose the correct answer.

- * Duplicate checks with the Customer Vendor Integration (CVI)

- * Value added tax checks with the Service Mapping Tool (SMT)
- * Credit-worthiness check (for example via Duns & Bradstreet interface) with the Data Import Framework (DIF)
- * Address checks with the Enrichment Framework
