100% Free SAP Certified Development Associate C_CPE_13 Dumps PDF Demo Cert Guide Cover

QUESTION 24

You want to connect an SAP backend system to the SAP BTP using the SAP Cloud Connector. Which additional SAP BTP services are required for the connection? Note: There are 2 to choose.

* SAP Destination service
* SAP Keystore service
* SAP Connectivity service
* SAP Cloud Transport Management service

QUESTION 25

What are some principles of continuous integration? Note: There are 2 to choose.

* Automated tests
* Automated deployment to the productive system
* Automated builds

* Automated code change pushes

QUESTION 26

What are some features of the SAP Cloud Connector? Note: There are 2 to choose.
* Monitoring requests
* Securing the activation of traffic traces
* Configuring trust
* Managing HTML5 applications

QUESTION 27

Which management tool can you use to deploy a CAP project into a space of your SAP BTP subaccount?
* Cloud Foundry command line interface
* APIs for SAP BTP
* SAP BTP command line interface

QUESTION 28

What are some characteristics of OData? Note: There are 2 to choose.
* OData builds on HTTP, AtomPub, and JSON using URIs to address and access data feed resources.
* OData is RESTful.
* OData uses the SOAP protocol.
* OData is an architectural design template for hypermedia information systems.

QUESTION 29

What are the relationships? (Drag and drop the labels at the bottom onto the framed locations of the image above.)

QUESTION 30

Your CAP project contains an entity called Books. You want to extend the Books entity with the managed aspect. You have already imported the aspect from the '@sap/cds/common' package (see attached graphic).

```
using {managed} from '@sap/cds/common';

entity Books {
    key ID: UUID @(Core.Computed : true);
    title : String;
    author: String;
}
```

Which is a valid way to extend the entity with the aspect?

```
○  entity Books : managed {
        key ID : UUID @(Core.Computed : true);
        title : String;
        author : String;
    }
○  entity Books {
        key ID : UUID @(Core.Computed : true);
        title : String;
        author : String;
    }

    aspect managed : Books {}

○  entity Books {
        key ID : UUID @(Core.Computed : true);
        title : String;
        author : String;
        aspect : managed;
    }
```

* Option A
* Option B
* Option C

QUESTION 31

Which of the following SAP Fiori pages areas are mandatory? Note: There are 2 to choose.
* Header
* Content
* Toolbars
* Footer

QUESTION 32

Your customer presents you with the following UI requirements: The same visualizations for all users. Extraction of key information

to identify a root cause. Searching, filtering, and sorting of items. Which SAP Fiori elements floorplan do you recommend they use?

* Worklist
* Object page
* Analytical list page
* List report

QUESTION 33

What are some characteristics of CAP event handling? Note: There are 2 to choose.

* You can register only one event handler for a specific event.
* You must use the handler registration API srv.emit(<event>) to de-register event handlers.
* You can register event handlers with instances of cds.service to add custom logic.
* You can register multiple event handlers for each event phase.

QUESTION 34

You have set up a pipeline in the SAP Continuous Integration and Delivery service with automated deployment. A build was initiated and failed. What do you check to find out which step of the pipeline failed?

* The webhook of your version control system
* The webhook event receiver
* The stages of the failed job run
* The stages in the config.yml in the .pipeline folder

QUESTION 35

How can you bring your company’s user base into your SAP BTP subaccount?

* Create the users manually in the security section of your subaccount.
* Establish a trust relationship with your corporate identity provider.
* Import the users via .csv file upload in the SAP BTP cockpit.
* Establish a trust relationship with the default identity provider.

QUESTION 36
