## New 2023 Guaranteed Success with ExamsLabs 101 Dumps F5 PDF Questions [Q130-Q146]

New 2023 Guaranteed Success with ExamsLabs 101 Dumps F5 PDF Questions  
Exceptional Practice To Application Delivery Fundamentals Exam Pass the First Time

### QUESTION 130

A site has six members in a pool. All of the servers have been designed, built, and configured with the same applications. It is known that each client's interactions vary significantly and can affect the performance of the servers. If traffic

should be sent to all members on a regular basis, which loadbalancing mode is most effective if the goal is to maintain a relatively even load across all servers.

- \* Ratio
- \* Priority
- \* Observed
- \* Round Robin

### QUESTION 131

**CORRECT TEXT**

The layer 3 security feature \_\_\_\_\_ Cookies protects against SYN floods, DoS, and DDoS attacks. (Fill in) contain / include

**QUESTION 132**

If the BIG-IP device is NOT always located between the client and the server, it will NOT provide full optimization and security.

- \* True
- \* False

**QUESTION 133**

How is persistence configured?

Persistence Table		
All entries for the one virtual server and pool		
Persistence Values	Member	Age (Seconds)
200.10.0.0	10.10.20.1:80	63
201.12.0.0	10.10.20.3:80	43
153.15.0.0	10.10.20.2:80	76
205.12.0.0	10.10.20.4:80	300
195.64.0.0	10.10.20.3:80	22
198.22.0.0	10.10.20.5:80	176
214.77.0.0	10.10.20.1:80	43

Web_Pool Statistics					
Member	Member Ratio	Member Priority	Outstanding Layer 7 Requests	Connection Count	Status
10.10.20.1:80	3	5	6	18	Available
10.10.20.2:80	3	5	6	12	Available
10.10.20.3:80	3	5	12	5	Disabled
10.10.20.4:80	1	1	8	19	Offline
10.10.20.5:80	1	1	4	9	Available

Virtual Server, Pool and Persistence Profile Settings					
VS_Web_Pool Settings		Web_Pool Settings		Source Persist Settings	
Destination	172.160.22.3:80	Load balancing	Least Connections	Mode	Source Address
Profile(s)	TCP	Priority Activation	Less than 2	Netmask	255.255.0.0
Pool	Web_Pool	Montitir	Done	Timeout	360 seconds
iRules	None				
Persistence	Source_Persist				

- \* Persistence is an option within each pool's definition.
- \* Persistence is a profile type; an appropriate profile is created and associated with virtual server.
- \* Persistence is a global setting; once enabled, load balancing choices are superceded by the persistence method that is specified.
- \* Persistence is an option for each pool member. When a pool is defined, each member's definition includes the option for persistence.

**QUESTION 134**

DRAG DROP

Match the security-related term with the correct definition.

1. OWASP Top 10
2. Secure Socket Layer (SSL)
3. Bot
4. Certificate
5. Content scrubbing

Select and Place:

Obfuscating identify information to prevent confidential information from being sent in a web application response.	OWASP Top 10
A list of the 10 most dangerous current Wseb application security flaws, along with effecte methods of dealing with those flaws.	Secure Socket Layer (SSL)
Malicious software placed on o he people's computers to perform automated tasks over the Internet.	Bot
A cryptographic protocol used to secure communications over the Internet.	Certificate
A digitally signed statement issued by a trusted organization that contains information about an entity and the entity's public key.	Content scrubbing

	<b>A list of the 10 most dangerous current Wseb application security flaws, along with effective methods of dealing with those flaws.</b>
	<b>A cryptographic protocol used to secure communications over the Internet.</b>
	<b>Malicious software placed on other people's computers to perform automated tasks over the Internet.</b>
	<b>A digitally signed statement issued by a trusted organization that contains information about an entity and the entity's public key.</b>
	<b>Obfuscating identify information to prevent confidential information from being sent in a web application response.</b>

### QUESTION 135

When using only LTM in redundant pairs, a customer can load balance to multiple data centers.

- \* True
- \* False

### QUESTION 136

Which of the following business benefits does storage tiering offer to customers?

- \* Reduces time for backups because data on the secondary tier can have a less time intensive backup policy applied to it.
- \* All of the above.
- \* Enables customers to apply a more aggressive RTO/RPO for business critical Tier-1 unstructured data.
- \* Reduces money spent on storage since the majority of data can be moved to less expensive secondary tier storage.

### QUESTION 137

in which scenario would an SSL VPN solution have an advantage over an IPSec VPN?

- \* when users are unable to install software on their PC
- \* when users require a secure connection to the corporate network
- \* when users work remotely
- \* when users require the ability to RDP to internal resources

### QUESTION 138

Which of the following statements best describes the ARX architecture?

- \* The ARX's split path architecture has a data path that handles the most common operations, and a control path that

handles other operations requiring deeper inspection and updating of the index.

- \* The ARX's architecture has redundancy built in, allowing a single ARX to be deployed in most use cases which provides a huge cost savings to customers.
- \* All of the above.
- \* It is a software agent that installs on the storage device.

Explanation/Reference:

### QUESTION 139

WebAccelerator uses three tiers to improve performance. What are the three tiers?

- \* Bandwidth offload
- \* Client offload
- \* Application offload
- \* Protocol offload
- \* Web server offload
- \* Network offload

Explanation/Reference:

Explanation:

### QUESTION 140

Which two of the following LTM load balancing methods require the least amount of resources? (Choose two.)

- \* Round robin
- \* Ratio
- \* Observed
- \* Fastest
- \* Predictive
- \* Least connections

Explanation/Reference:

### QUESTION 141

LTM can only load balance outbound traffic by using iRules

- \* True
- \* False

### QUESTION 142

Which two of the following LTM load balancing methods require the least amount of resources?

(Choose two.)

- \* Round robin
- \* Ratio
- \* Observed
- \* Fastest
- \* Predictive
- \* Least connections

### QUESTION 143

Which of the following is NOT a logging option within an APM access control entry?

- \* Packet
- \* Verbose
- \* Nominal
- \* Summary
- \* None

Explanation/Reference:

Explanation:

#### QUESTION 144

If a customer has an application that uses a customized protocol, what LTM feature can help optimize the traffic from the application?

- \* iRules
- \* Networkvirtual servers
- \* HTTP classes
- \* Packet filtering
- \* Transparent virtual servers

Explanation/Reference:

Explanation:

#### QUESTION 145

In IPv4 the loopback IP is 127 0.0.1. or IPv6, what is the loopback address?

- \* FEBO::1
- \* FF8Q 0.0 : :1
- \* 2001 :: 127 : : 1
- \* : : 1

#### QUESTION 146

APM provides access control lists at which two OSI layers? (Choose two.)

- \* Layer 5
- \* Layer 4
- \* Layer 7
- \* Layer 6
- \* Layer 2
