**Q21.** You need to edit data in a table. You are currently using the following statement:

```
INSERT INTO product (productId, productName) VALUES (3, 'Apple');
```

What is the issue?

- \* You should be using an UPDATE statement.
- \* You forgot the WHERE clause in your statement.
- \* You should be using a CREATE statement.
- \* You should be using an EDIT statement.

**Q22.** You want to evaluate an expression by using a loop.

Which option should you use?

- \* a!forEach()
- \* a!for()
- \* a!while()
- \* a!do()

**Q23.** A form has 5 rule inputs, as follows:

- 1 CDT variable
- 3 Text variables
- 1 Integer variable

According to best practices, how many process variables are required in the process model's user input task?

- \* 1
- \* 3
- \* 5
- \* 6

**Q24.** What is a Foreign Key?

- \* The key that cannot be used in any other table.
- \* The key that joins two tables together.
- \* The key that uniquely identifies a record.
- \* The key that uniquely identifies a record when joined with another column.

**Q25.** In a process model, a user input task is configured as a Quick Task.

What happens when the process is started?

- \* Assignees can reassign the task to someone else.
- \* The task automatically has priority over other active tasks.
- \* The user only has one hour to complete the task form.
- \* The task will not show up on Tempo.

**Q26.** Match each sprint ceremony to its appropriate objective. Each objective may be used once, more than once, or not at all.

### Sprint Retrospective

Select a match

The ceremony is designed for the Product Owner and Development Team to meet and review the prioritized Product Backlog.  
The Development Team showcases all of the work that has been completed during the sprint, allowing stakeholders to see the application and adapt the product going forward.  
This ceremony provides the team with a platform to discuss what is going well, what could go better, and some suggestions for changes going forward.  
The Development Team estimates the difficulty of developing a feature by using an abstract, but agreed upon, measurement of effort required to implement it.

### Story Pointing

**Q27.** Which two filter types should you apply to limit the record list by default? (Choose two.)

- \* Default filters
- \* Source filters
- \* User filters
- \* Filter by search field

**Q28.** Review the following expression:

```
a!forEach(  
  items: {100,200,300},  
  expression: fv!item+fv!index  
)
```

What will this expression return?

- \* {200,400,600}
- \* {101,202,303}
- \* {101,200,300,1,2,3}
- \* {101,1,200,2,300,3}

**Q29.** You are configuring a record type and utilizing data sync.

Appian does NOT have write access to the source database table, and will not make updates. Which data sync option is most appropriate for your situation?

- \* Hourly Sync
- \* Manual Sync
- \* Daily Sync
- \* Immediate Sync

**Q30.** Which scenario would most commonly use a related action?

- \* Running a process every Friday morning that sends a reminder email to employees who haven't submitted their timesheet
- \* Starting a company-wide annual performance review process that tasks every employee to fill out a self-assessment
- \* Resetting the password on an employee who has forgotten their login credential
- \* Updating the status of an IT service request to 'Closed', because an IT response is not necessary

**Q31.** In a process model, you want all outgoing flows to start once all incoming flows have reached the node.

Which gateway is most appropriate to use?

- \* NAND
- \* OR
- \* XOR
- \* AND

**Q32.** What is a way to start a process from an interface?

- \* Start Process Smart Service
- \* Process Start Event

- \* Process Messaging
- \* Start Process Link

**Q33.** What is the most appropriate interface component to display tabular data?

- \* Rich Text
- \* Column Layout
- \* Editable Grid
- \* Read-only Grid

**Q34.** Who is responsible for estimating the level of effort for Product Backlog items?

- \* Product Owner
- \* Testers
- \* Developers
- \* Scrum Master

**Q35.** At what stage are you most likely to regularly refine the backlog?

- \* Optimize
- \* Release
- \* Build
- \* Initiate

**Q36.** What type of variable can only be used within the context of a particular expression, and can only be accessed within the function that defines them?

- \* Local Variable
- \* Process Variable
- \* Rule Input Variable
- \* CDT Variable

**Q37.** What are the different data sources for Appian record types?

- \* Database and Process only
- \* Database, Process, and Other Web Service
- \* Database, Process, Salesforce, and Other Web Service
- \* Process and Other Web Service only

**Q38.** In the scrum lifecycle of a project, when should the team agree on the requirements for the Definition of Done?

- \* Before getting started on the project
- \* During the sprint retrospective
- \* During the backlog refinement
- \* After the sprint planning

**Q39.** When setting the assignment of a User Input task, you need the task to be assigned to the person who started the process.

Which option is appropriate to use to accomplish this goal?

- \* pp!name
- \* pm!creator
- \* pp!initiator
- \* pm!name
