Get The Most Updated JN0-250 Dumps To JNCIS-MistAI Certification Juniper Certified JN0-250 Dumps Questions Valid JN0-250 Materials

The Juniper JN0-250 exam is a certification exam for those who want to become proficient in Mist AI technology. This exam is designed for those who have a strong desire to learn about the latest advancements in Mist AI technology and want to become experts in this field. The exam is ideal for network engineers, administrators, and other IT professionals who want to advance their skills and knowledge in the field of AI.

QUESTION 12

A Mist access point is booting up, and will soon receive a channel assignment from the Mist Cloud. The channel assigned by the cloud is a DFS channel.

In this scenario, what must the AP do before broadcasting an SSID on the channel?

- * Validate client device support.
- * Listen for radar.
- * Transmit radar pulses for 60 seconds.
- * Validate available non-DFS channels.

QUESTION 13

How should a Mist AP43 be mounted?

- * mounted vertically above ceilings
- * mounted horizontally on a ceiling
- * mounted horizontally on a table
- * mounted vertically on a wall

QUESTION 14

What does 802.11ac (Wi-Fi 5) specify as the maximum channel width?

- * 160 MHz
- * 60 MHz
- * 20 MHz
- * 40 MHz

QUESTION 15

You have discovered an access point that is connected to a corporate network, but it is not under the corporation's control.

In this scenario, what is this type of access point called?

- * honeypot
- * air gap
- * rogue
- * neighbor

QUESTION 16

When designing for a multiple frequency deployment (5 GHz and 2.4 GHz), which statement is correct?

- * The coverage of the multiple bands at the same power will be identical.
- * 5 GHz is a higher frequency and so will travel further and penetrate walls better.
- * 5 GHz should generally be used for planning.
- * 802.11ac is available in both frequency bands so the design frequency is not important.

QUESTION 17

You are designing a wireless network that requires smooth roaming performance and redundant coverage from at least two access points at every location.

What ensures that both of these functional requirements are satisfied?

- * co-channel interference
- * secondary coverage
- * primary coverage
- * data rate

QUESTION 18

You have designed a WLAN to satisfy primary coverage, secondary coverage, and capacity requirements. However, you still do not

have enough BLE radios to satisfy your location requirements. You want to fill the gaps with a low cost, BLE-only device.

Which Mist device will satisfy this requirement?

- * AP41
- * BT11
- * AP32
- * AP43

QUESTION 19

Which statement is correct about the Mist API?

- * Proprietary tools are required to use the Mist API.
- * The Mist API is part of the basic subscription.
- * You need one AP connected to use the Mist API.
- * The Mist API requires calling support for access.

QUESTION 20

The DHCP server has run out of address leases on a site.

In this scenario, which SLE would be useful to what is happening?

- * capacity
- * throughput
- * roaming
- * successful connects

QUESTION 21

What are three valid administrator roles that you would be able to assign to a user within an organization? (Choose three.)

- * Super User
- * View
- * Root User
- * Network Admin
- * Helpdesk

QUESTION 22

Referring to the exhibit, what do you determine about the site's Time to Connect SLE metric?

- * Successful connect averaged 1.6 seconds.
- * Eighty percent of the Time to Connect failures are related to DHCP failures
- * All clients cannot connect to the Internet.
- * Time to Connect Association DHCP failures impacted 80% of users.

QUESTION 23

Mist Radio Resource Management makes dynamic changes to which resource?

- * RF template
- * channel width
- * channel
- * BLE channel

QUESTION 24

Which two statements are correct about Marvis? (Choose two.)

- * Marvis is the main configuration tool.
- * Marvis lets you ask questions about your network.
- * Marvis will send custom reports.
- * Marvis can be used as a proactive monitoring tool.

QUESTION 25

Which Mist device is designed exclusively for Bluetooth Low Energy?

- * AP63
- * BT11
- * AP43
- * AP12

QUESTION 26

Which statement is correct about Wi-Fi?

- * Wi-Fi operates at full-multiplex.
- * Only two devices can transmit on the same channel at the same time.
- * A user device can be connected on multiple frequency bands at the same time.
- * Wi-Fi operates at half-duplex.

QUESTION 27

Which two 802.11 amendments operate within the 2.4 GHz band? (Choose two.)

- * 802.11ax
- * 802.11ac
- * 802.11a
- * 802.11b

QUESTION 28

What would cause reduced Wi-Fi performance?

- * using 40 MHz channels on 5 GHz
- * using a PSK
- * using a single SSID
- * using too many SSIDs

QUESTION 29

Which Mist feature provides an overview of the user experience?

- * Service Level Expectations
- * Policy
- * Location Services
- * Insights

QUESTION 30

When using the Mist Cloud with Mist APs, which statement is correct?

- * User data is terminated in the cloud and run through a firewall.
- * User data is compressed and terminated in the cloud.
- * User data is terminated in the cloud and forwarded.
- * User data is bridged locally.

QUESTION 31

Which SLE would you use to determine Wi-Fi interference?

- * AP Uptime
- * Roaming
- * Successful Connects
- * Capacity

QUESTION 32

You are troubleshooting a signal strength issue when you notice that the signal strength changes from -70 to -73 dBm as you move from one room to another.

In this scenario, what is happening?

- * Signal strength has increased by 10x.
- * Signal strength has decreased by 10x.
- * Signal strength has doubled.
- * Signal strength has halved.

QUESTION 33

In a standard roam from one access point to another access point, what makes the decision to roam?

- * the controller
- * the access point
- * the client device
- * the cloud

QUESTION 34

What is the base subscription required to get started with a Mist access point?

- * Wi-Fi Management and Assurance
- * Virtual Network Assistant
- * Premium Analytics
- * Mist Edge

QUESTION 35

Which statement is correct about the Mist API?

- * Only SLE configurations are available from the API.
- * Only AP configurations are available from the API.
- * Everything seen in the GUI is available from the API.
- * Nothing seen in the GUI is available from the API.
