[Jun 25, 2023] New Huawei H35-460-ENU Dumps with Test Engine and PDF (New Questions) [Q112-Q133]

[Jun 25, 2023 New Huawei H35-460-ENU Dumps with Test Engine and PDF (New Questions) Pass Your H35-460-ENU Exam Easily - Real H35-460-ENU Practice Dump Updated QUESTION 112

The calculation formula of the absolute frequency of gNodeB cell is similar to that of LTE, and the value of ?F is also the same.

- * True
- * False

QUESTION 113

Which of the following objects cannot be occluded with BLK?

- * SCTPLNK
- * NRCELL
- * CPRIPORT
- * ETHPORT

QUESTION 114

What is the broadcast period of MIB messages in NR?

- * 40ms
- * 160ms
- * 20ms
- * 80ms

QUESTION 115

In the NSA networking scenario, gNodeB does not need to configure the X2 interface.

- * Correct
- * Errors

QUESTION 116

Which of the following modules supports 64T64R?

- * AAU5613
- * AAU5612
- * RRU3939
- * AAU5616

QUESTION 117

Under the EN-DC architecture, the eNodeB/gNodeB only supports the configuration of the X2 finger based on the EndPoint method.

- * True
- * False

QUESTION 118

DCDU-12B is a DC power distribution unit. How much DC power input is provided for each component in the cabinet?

- * 24V
- * 48V
- * -24V
- * -48V

QUESTION 119

When debugging the NR base station through the near end of the USB flash drive, which of the following conditions will cause the RU indicator of the main control board to be in the 'load failed' state?

- * The data profile loaded by the network element through the USB flash drive last time is consistent with the data profile in the USB flash drive
- * The base station recognizes that the base station corresponding to the USB flash drive is not the current base station
- * The data in the USB flash drive is not protected by integrity protection and encryption
- * The file format or self-recording in the USB flash drive is illegal

QUESTION 120

What is the maximum rate supported by the addition of Ethernet ports to the gNodeB main control board?

- * 1Gbps
- * 100Gbps
- * 10Gbps

QUESTION 121

During the 5G test, if the PC is directly connected to the LAN port of Huawei CPE through the network cable, the IP address must be manually configured on the PC to be normal

- * Correct
- * Errors

QUESTION 122

What are the networking methods between the BBU and the RF unit? (Multiple Choice)

- * Chain networking
- * Star networking
- * Tree networking
- * Ring networking

QUESTION 123

What is wrong with the description of AAU5613?

- * Can operate in the C-band band
- * The horizontal half-wave power angle is 30°
- * The vertical half-wave power angle is 15°
- * It belongs to an active antenna system

QUESTION 124

Which of the following half-width 5G baseband boards are supported by the BBU5900 in the V100R015 version?

- * UBBPg3
- * UBBPfw1
- * UBBPg2a
- * UBBPd

QUESTION 125

What is the fiber pulling capacity between AAU and BBU using eCPRI schemes

- * 5KM
- * 500M
- * 1KM
- * 10KM

QUESTION 126

What is wrong with the description of the Mandarin Duck Line test on the U2000?

- * It is a high-risk order
- * Can be applied to multi-RRU cells
- * It is recommended that the standing wave ratio is less than 2.5, otherwise it will affect the accuracy of the decision
- * The typical configuration scenario for which the command applies is the sector of 2T2R

QUESTION 127

What data configuration tools can gNodeB use to complete the station? (Multiple choice)

- * LMT
- * MML
- * CME
- * OSS

QUESTION 128

Which description of NR time domain resources is correct?

- * 1 slot fixed contains 14 symbols
- * 1 subframe is fixed at 1ms
- * 1 slot is fixed at 0.5ms
- * 1 subframe fixed contains 2 slots

QUESTION 129

Regarding the DMRS of the PDSCH, what are the correct descriptions of the following? (Multiple Choice)

- * Divided into pre-DMRS and additional DMRS, pre-DMRS is mainly used in high-speed scenes
- * The maximum number of ports supported by Type2 is 12
- * The maximum number of ports supported by Type1 is 8
- * It is divided into two types, Type1 and Type2, and the maximum number of ports supported is different

QUESTION 130

In the steps of replacing UMPT, which of the following needs to be done first?

- * Tell the site engineer to replace the veneer at the proximal end
- * All cells corresponding to the occluded base station
- * Back up configuration files and licenses
- * Query the base station alarm to obtain the alarm list

QUESTION 131

In the 5G RAN2.0 version, what is the maximum number of 100MHz 64*64 cells supported by a single BBU900?

- * 18
- * 3
- * 6
- * 9

QUESTION 132

5G RAN 2.0 version gNodeB logical cells and sector devices use the command ANDD NRDUCELLTRP to complete the binding.

- * True
- * False

QUESTION 133

Which device makes the judgment on the change of auxiliary station under the NSA architecture?

- * MeNodeB
- * S-SgNodeB
- * T-SgNodeB

* MRS
