

[Q47-Q66 Best Quality C-BW4H-211 Exam Questions SAP Test To Gain Brilliant Result!]

[Q47-Q66] Best Quality C-BW4H-211 Exam Questions SAP Test To Gain Brilliant Result!

Best Quality C-BW4H-211 Exam Questions SAP Test To Gain Brilliant Result!

Preparations of C-BW4H-211 Exam 2023 SAP Certified Application Associate Unlimited 80 Questions

Q47. Which tasks are part of the Business Blueprint and Data Model Definition phase in an SAP BW/4HANA project? Note: There are 3 correct answers to this question.

- * Monitor batch jobs and data volume
- * Check the availability of data
- * Design the data layer concept
- * Implement transport routes and layers
- * Specify necessary data conversion

Q48. What are the prerequisites for deleting master data (for example, cost centers) in SAP BW/4HANA?

Note: There are 2 correct answers to this question.

- * There must be no hierarchy for the cost centers.
- * There must be no BW analysis authorizations defined that use any of the cost centers.
- * There must be no transaction data referring to the cost centers.

* There must be no BW query that uses cost center as a free characteristic.

Q49. You create a transformation from a DataSource to a DataMart DataStore object (advanced). All key figures are updated as Sum. Which Delta methods indicate that the DataSource provides consistent information for this target? Note: There are 2 correct answers to this question.

- * ADD
- * ABR
- * AIE
- * AIM

Q50. In SAP Web IDE for SAP HANA, you have imported a project including an HDB module with calculation views. What do you need to do in the project settings before you can successfully build the HDB module?

- * Change the schema name
- * Generate the HDI container
- * Define a package
- * Assign a space

Q51. The Database Explorer in the Web IDE for SAP HANA provides a data file import wizard to create a table in SAP HANA from a flat file. What are possible actions after the system suggests the target structure?

Note: There are 3 correct answers to this question.

- * Switch the table type between row store and column store.
- * Change the order of the fields in the target table.
- * Define sorting properties for a target table field.
- * Remove leading zeroes for a target table field.
- * Adjust the suggested data type of the target table fields.

Q52. Which join types can you use in a CompositeProvider? Note: There are 3 correct answers to this question.

- * Referential join
- * Inner join
- * Hierarchy join
- * Text join
- * Full Outer join

Q53. In a BW query with cells, you need to overwrite the initial definition of a cell. For which cell types does this option exist? Note: There are 2 correct answers to this question.

- * Selection cell
- * Formula cell
- * Help cell
- * Reference cell

Q54. Which of the Augmented Analytics Smart Features in SAP Analytics Cloud generates fully populated, multi-tabbed stories?

- * Smart Predict
- * Smart Discovery
- * Search to Insight
- * Predictive Forecast

Q55. Which disadvantages should you keep in mind when you set the High Cardinality flag for a characteristic? Note: There are 2 correct answers to this question.

- * SID numbers are created at runtime which might negatively affect the reporting performance.

- * You cannot load more than 2 billion master data records for this characteristic.
- * You cannot use this characteristic as a navigation attribute for another characteristic.
- * You cannot use navigation attributes for this characteristic.

Q56. For test purposes, you want to combine an existing SAP BW/4HANA Data Model with virtual data from a new non-SAP source system. Which approach should you consider for rapid prototyping?

- * Field-based modeling
- * InfoObject based modeling
- * Business content activation
- * Generate Data Flow

Q57. You want to run a BW query, but you only have partial authorization for the data selection. What happens related to the BW query in this scenario?

- * The BW query does not start running.
- * The BW query starts and the unauthorized values are 0.
- * The BW query starts and shows an error message.
- * The BW query starts and only the authorized data is displayed.

Q58. You want to build a web-based dashboard with interactive visualizations using Javascript. Which SAP tool can you use to create this?

- * SAP Analytics Cloud, analytics designer
- * SAP Smart Business Cockpits
- * SAP Crystal Reports
- * SAP BusinessObjects Web Intelligence

Q59. You open an SAP Analysis for Microsoft Office workbook. On which Design Panel tabs can you verify the filter values? Note: There are 2 correct answers to this question.

- * Design Rules
- * Information
- * Analysis
- * Components

Q60. What can you leverage using the live data connections of SAP Analytics Cloud with SAP BW/4HANA?

Note: There are 2 correct answers to this question.

- * Process chain streaming functionality
- * BW data models for analysis
- * Existing authorization concepts
- * BW data models for planning scenarios

Q61. For which requirements do you suggest an SAP HANA modeling focus rather than an SAP BW/4HANA modeling focus?

Note: There are 2 correct answers to this question.

- * Reporting on a harmonized set of master data
- * Enhancing existing SAP HANA content models
- * Leveraging SQL in-house knowledge
- * Loading snapshots or deltas from different sources on a periodic basis

Q62. Where is the button that automatically generates a process chain?

- * In the SAP GUI transaction for Process Chain Maintenance
- * In the editor of the Data Flow object

- * In the Process Chain Editor app
- * In the Process Variant Editor app

Q63. For a report, you would like to highlight the deviation from predefined threshold values for a key figure. Which BW query feature do you use?

- * Reference cell
- * Exception
- * Condition
- * Key figure property

Q64. You are involved in an SAP BW/4HANA project focusing on General Ledger reporting and want to use the SAP ERP Standard DataSource OFI_GL_14 (New GL Items). Which transactions can be used to activate this DataSource? Note: There are 2 correct answers to this question.

- * Transaction RSO2 (Maintain Generic DataSource) in the SAP source system
- * Transaction RSA5 (Installation of DataSource from Business Content) in the SAP source system
- * Transaction RSA1 (BI Content) in the SAP BW/4HANA system
- * Transaction ODQMON (Monitor Delta Queues) in the SAP source system

Q65. What foundation is necessary to use SAP S/4HANA embedded analytics?

- * Generated external SAP HANA Calculation Views
- * SAP Agile Data Preparation
- * SAP HANA optimized business content
- * ABAP CDS view based virtual data model

Q66. You have created a custom characteristic with the technical name “COSTOBJ”. Depending on the controlling area, you need to have different attribute values assigned. How do you design the model?

- * Compound the characteristic for Controlling Area with the characteristic “COSTOBJ”.
- * Define characteristic “COSTOBJ” as a navigation attribute for Controlling Area.
- * Compound characteristic “COSTOBJ” with the characteristic for Controlling Area.
- * Define Controlling Area as a navigation attribute for the characteristic “COSTOBJ”.
