Pass Exam With Full Sureness - ISFS Dumps with 80 Questions

The Information Security Foundation based on ISO/IEC 27001 certification exam is designed to provide a broad understanding of the principles of information security management. It covers various topics such as confidentiality, integrity, and availability of information, risk management, and security controls. ISFS exam is designed to test the knowledge and skills required to implement and maintain an effective information security management system. It is an entry-level certification that is ideal for individuals who are new to the field of information security.

Q40. Logging in to a computer system is an access-granting process consisting of three steps: identification, authentication and authorization. What occurs during the first step of this process: identification?
* The first step consists of checking if the user is using the correct certificate.
* The first step consists of checking if the user appears on the list of authorized users.
* The first step consists of comparing the password with the registered password.
* The first step consists of granting access to the information to which the user is authorized.

Q41. Your organization has an office with space for 25 workstations. These workstations are all fully equipped and in use. Due to a reorganization 10 extra workstations are added, 5 of which are used for a call centre 24 hours per day. Five workstations must always be available. What physical security measures must be taken in order to ensure this?

* Obtain an extra office and set up 10 workstations. You would therefore have spare equipment that can be used to replace any non-functioning equipment.
* Obtain an extra office and set up 10 workstations. Ensure that there are security personnel both in the evenings and at night, so that staff can work there safely and securely.
* Obtain an extra office and connect all 10 new workstations to an emergency power supply and UPS (Uninterruptible Power Supply). Adjust the access control system to the working hours of the new staff. Inform the building security personnel that work will also be carried out in the evenings and at night.
* Obtain an extra office and provide a UPS (Uninterruptible Power Supply) for the five most important workstations.

Q42. A company moves into a new building. A few weeks after the move, a visitor appears unannounced in the office of the director. An investigation shows that visitors passes grant the same access as the passes of the companys staff. Which kind of security measure could have prevented this?

* A physical security measure
* An organizational security measure
* A technical security measure

Q43. What is a risk analysis used for?

* A risk analysis is used to express the value of information for an organization in monetary terms.
* A risk analysis is used to clarify to management their responsibilities.
* A risk analysis is used in conjunction with security measures to reduce risks to an acceptable level.
* A risk analysis is used to ensure that security measures are deployed in a cost-effective and timely fashion.

Q44. Which measure assures that valuable information is not left out available for the taking?

* Clear desk policy
* Infra-red detection
* Access passes

Q45. What action is an unintentional human threat?

* Arson
* Theft of a laptop
* Social engineering
* Incorrect use of fire extinguishing equipment

Q46. Which of the following measures is a corrective measure?

* Incorporating an Intrusion Detection System (IDS) in the design of a computer centre
* Installing a virus scanner in an information system
* Making a backup of the data that has been created or altered that day
* Restoring a backup of the correct database after a corrupt copy of the database was written over the original

Q47. You work in the office of a large company. You receive a call from a person claiming to be from the Helpdesk.

He asks you for your password. What kind of threat is this?

* Natural threat
* Organizational threat
* Social Engineering

Q48. You are a consultant and are regularly hired by the Ministry of Defense to perform analysis. Since the assignments are

irregular, you outsource the administration of your business to temporary workers. You don’t want the temporary workers to have access to your reports. Which reliability aspect of the information in your reports must you protect?

* Availability
* Integrity
* Confidentiality

Q49. You apply for a position in another company and get the job. Along with your contract, you are asked to sign a code of conduct. What is a code of conduct?

* A code of conduct specifies how employees are expected to conduct themselves and is the same for all companies.
* A code of conduct is a standard part of a labor contract.
* A code of conduct differs from company to company and specifies, among other things, the rules of behavior with regard to the usage of information systems.

Q50. Some threats are caused directly by people, others have a natural cause. What is an example of an intentional human threat?

* Lightning strike
* Arson
* Flood
* Loss of a USB stick

Q51. What action is an unintentional human threat?

* Arson
* Theft of a laptop
* Social engineering
* Incorrect use of fire extinguishing equipment

Explanation/Reference:

Q52. You are a consultant and are regularly hired by the Ministry of Defense to perform analysis.

Since the assignments are irregular, you outsource the administration of your business to temporary workers.

You don’t want the temporary workers to have access to your reports. Which reliability aspect of the information in your reports must you protect?

* Availability
* Integrity
* Confidentiality
