QUESTION 11

You are setting up Jira Software Cloud for an organization of 250 employees. Product access is already configured to grant new users access to Jira Software by default. You now need to configure site access so that it meets these 3 conditions:

1. Minimum administration overhead is required
2. Access is granted to the entire organization at the same time
3. Access is restricted only to your organization

Which solution meets these requirements? (Choose one)

- * Set the global mode to public and enable CAPTCHA on sign up
- * Create an invite link and share it with all current and future employees
- * Enable existing users to send invitations to all current and future employees
- * Add all your company's domains as approved domains
- * Approve any domain in the site access settings

QUESTION 12

You need to implement a change to several classic projects in your Jira instance

- * A defined set of users needs to be able to create issues on behalf of other users It is important to note that
- * Project administrators should be able to decide which users are able to perform this operation
- * Some projects use a shared permission scheme

Which combined use of two administrative items will meet this requirement? (Choose two)

- * Project role
- * Global permission
- * Project permission
- * Individual users
- * User group

QUESTION 13

A new user needs access to all applications of your Atlassian Cloud site to configure projects without consuming any user licenses.

Select two items which, when combined, will satisfy this requirement? (Choose two)

- * Trusted user role
- * Administration access
- * Individual users
- * User groups
- * Site access
- * Product access

QUESTION 14

You are the site and organization admin of a Jira Software and Confluence instance.

You are the only administrator and you don't have any Trusted users.

Users currently cannot send invitations to anyone. You need to control the number of licenses used.

Therefore, you want to either invite individual users or approve individual user requests.

Which site access setting will meet this requirement? (Choose one)

- * Approve any domain
- * Approve your organization domain only
- * Don't approve any domain

- * Enable Jira Software and Confluence invite links
- * Enable existing users to send invitations to anyone

QUESTION 15

Your management team needs to see a list of only those issues that were resolved in the previous week, from Sunday to Saturday. The list needs to be sent to them each week on Tuesdays. You plan to create a saved filter and filter subscription to do this.

Which JQL query will return the correct results?

- * resolved endOfWeek(1)
- * resolved ,= startOfWeek(-1) AND resolved startOfWeek(0)
- * status changed TO RESOLVED BEFORE startOfWeek()
- * resolved >= startOfDay(-7) AND resolved < startOfDay()

QUESTION 16

Henry was recently assigned multiple issues in a classic software project. He has not received any email notifications about the assignment of these issues but he received notifications about other changes to issues from this and other projects.

Identify two possible reasons (Choose two)

- * The Issue Updated event does not list the current assignee as a recipient in the project's notification scheme
- * The Issue Assigned event does not list the current assignee as a recipient in the project's notification scheme
- * Henry is missing the Browse Projects project permission in the Jira project
- * Henry adjusted his personal email notification preference to not notify him when he is the assignee of an issue
- * Henry is missing the Assignable User project permission in the Jira project

QUESTION 17

You are a site administrator.

You have created an account for Ashley

You need to log in as Ashley to ensure his permissions are set correctly. Identify why you are unable to log in as Ashley (Choose one)

- * You are not an organization admin
- * Ashley has not accessed your site yet
- * Ashley does not have a managed account
- * Ashley has the role of site admin

QUESTION 18

You set up an incoming mail server and a mail handler to create a new issue or add a comment to an existing issue

Which three additional options can you set with the mail configuration?

- * Set the environment system field
- * Set a custom field
- * Set watchers
- * Create new users based on the From address
- * Set a default reporter

QUESTION 19

You created a new project and need to configure notifications.

Managers should be notified when

- * Someone mentions them while adding or editing a comment
- * The issue assignee or reporter is changed
- * Issue links are added or deleted

You assume that users have not turned off any notifications through their Personal settings Identify the two notification events to which managers should definitely be added (Choose two)

- * Issue Updated
- * Issue Deleted
- * Generic Event
- * Issue Assigned
- * Issue Commented

QUESTION 20

Users have been adding sensitive information into the Description field of issues in a particular project. You must secure the project by any means necessary so that only members of the Managers group can view the contents of the Description field.

Which approach will definitively satisfy this requirement? (Choose one)

- * Remove everyone from the browse projects permission
- * Remove the description field from the screen used by the view operation
- * Remove everyone except the managers group from every project permission
- * Hide the description field in the field configuration
- * Remove everyone except the managers group from every project role

QUESTION 21

In his personal settings, Bob has the setting 'Email notifications for issue activity' set to 'Don't send me email notifications';

Identify two reasons why Bob continues to receive some email notifications from Jira (Choose two)

- * Bob has the Watch your issues setting enabled
- * Bob has been subscribed to several filters
- * Bob was added as a watcher of an issue
- * Bob is mentioned directly in a comment
- * Bob was sent an email via the Send email feature in Jira
