NEW QUESTION 17

What is SmartEdit’s Navigation Management page useful for? Note: There are 2 correct answer to this question.
* It can define more than one navigation hierarchy, each accessed by a different component on the page.
* It allows you to manipulate a hierarchy of CMSNavigationNode items, each of which may contain a CMSNavigationEntry.
* It allows you to manipulate a parent-child hierarchy of CMSLinkComponent objects.
* It is used to configure automatic mapping of the Product Catalog’s category hierarchy to the navigation bar displayed on site pages.

NEW QUESTION 18

You need to create a new custom promotion based on customer reviews for a product. You create a customPromotion extension with a new Rule Aware Object to keep customer reviews. In which file will you define this new Rule Aware Object?
* In the customPromotion-backoffice-config.xml file
* In the customPromotion-spring.xml file

* In the customPromotion-beans.xml file
* In the customPromotion-items.xml file

NEW QUESTION 19

Your solution has been live for a significant period of time. Now you need to update project data across multiple environments, but this update should only be executed once. What is the recommended approach for updating the project data?
* Create a class that extends AbstractPatchesSystemSetup and configure any data patches, which can run an import of your ImpEx files during an update.
* Extract a SQL script of all the changes in a single environment, which a OBA can then run directly against the database for all remaining environments.
* Create a class that extends AbstractSystemSetup and use the @SystemSetup annotation with TYPE.PROJECT, which can run an import of your ImpEx files during an update.
* With each deployment, manually import the ImpEx files via the hybris Admin Console or via the ant importimpex target.

NEW QUESTION 20

You are creating an extension with a web module. What do you need to ensure? Note: There are 2 correct answer to this question.
* An extension with a web module can only be extended with an addon.
* An extension with a web module must have a web folder.
* An extension with a web module must always have a core module.
* The web root must be set in the web module directive in the extensioninfo.xml file.

NEW QUESTION 21

When you define an aspect in your manifest.json file, what types of information should you provide? Note: There are 2 correct answer to this question.
* properties
* addons
* webapps
* extensions

NEW QUESTION 22

In SmartEdit, what can you do with variations defined for a customization? Note: There are 3 correct answer to this question.
* Assign the customer a custom search profile if a variation is in effect.
* Apply a variation to customers who belong to a combination of segments.
* Show different content in a slot if a variation is in effect.
* More than one variation in a customization can be triggered at the same time.
* Give the customer a coupon if a variation is in effect.

NEW QUESTION 23

Which features does the Cloud Hot Folders module support? Note: There are 2 correct answer to this question.
* Direct configuration of Hot Folders in the Cloud Portal
* Media using external URLs in uploaded ImpEx
* Zip archives with Impex, media and CSV files
* Data export into Azure Blob storage.

NEW QUESTION 24

Your system contains a search restriction with the following parameters: Type: Product User: anonymous. Restriction: 1=0. There is a product “Candle” in the online catalog and a variant product “PinkCandle” in the online catalog. The system renders the Product Detail Page for Pink Candle using the following flexible search query: “SELECT {pk} FROM {VariantProduct} WHERE {code}=”PinkCandle”. What happens next?

* The flexible search query returns a null value.
* The flexible search query returns “PinkCandle”.
* The flexible search query returns an SQL exception.
* The flexible search query returns an empty list. Question

NEW QUESTION 25

In an Accelerator-based storefront, which of the following would allow you to display a custom CMS Component? Note: There are 2 correct answer to this question.

* Create a JSP named [componentTypeCode].jsp that pulls data from a [ComponentTypeCode]Data object.
* Configure a custom controller bean and redefine the DefaultCMSComponentController alias to point to it.
* Configure a renderer in the cmsComponentRendererRegistry that doesn’t need to use a data object or a view.
* Create a controller for this component and register it in the cmsComponentControllerRegistry.

NEW QUESTION 26

What are the advantages of using classification attributes? Note: There are 2 correct answer to this question.

* Cached classification attributes provide better performance than fixed properties.
* Classification attributes are applied dynamically in response to customer actions.
* Business users can create or modify classification attribute definitions using the Backoffice.
* Rebuilding and redeployment are NOT required.

NEW QUESTION 27

Which of the following items are configured via a direct relation to a BaseStore? Note: There are 3 correct answer to this question.

* A list of Content Catalogs providing the pages, slots, and other CMSI terns shown to Customers
* A list of Product Catalogs providing the product info shown to Customers
* A list of customers associated with the BaseStore.
* A list of warehouses that support the delivery
* A list of points of service that represent local branches

NEW QUESTION 28

What happens when you use a deployment tag in the items.xml file? Note: There are 2 correct answer to this question.

* All instances of the enclosing type are stored in the specified database table.
* Only non-inherited properties of the enclosing type are stored in the deployment table.
* The deployment typecode is used as part of the primary key (PK) of that type’s items.
* The name of the deployment table is generated automatically.

NEW QUESTION 29

Which order-splitting strategies are provided in the basecommerce extension? Note: There are 3 correct answer to this question.

* Split by payment method
* Split by order date
* Split by named delivery date

* Split by stock availability
* Split by warehouse

NEW QUESTION 30

Which of the following is a mechanism used by WCMS to position components on a page?
* The Page item has a position map that links each component to the component in the page that the item should be displayed in.
* The ContentSlot item’s code property is used to determine which slot in the page that the item should be displayed in.
* The component’s CurrentPosition attribute is used to determine which component within the page the item should be displayed in.
* The position attribute in the ContentSlotForTemplate item is used to identify the slot in the page that the item should be displayed in.

NEW QUESTION 31

You are implementing a new custom promotion action that changes the delivery mode of an order. What steps are required to make sure that the effects of this action are reverted as soon as the condition that triggered it is NO longer fulfilled? Note: There are 2 correct answer to this question.
* Implement the undo method in your custom rule action strategy
* Define a new session attribute to store the original delivery mode
* Implement your custom action item so that it can store the original delivery mode
* Create a promotion that uses the inverse action if the condition is NOT fulfilled

NEW QUESTION 32

You are creating a new ancillary catalog for your site. Which of the following principles should you consider? Note: There are 2 correct answer to this question.
* Restrict the read and write access of this catalog in its permission tab in Backoffice.
* A catalog version has a hierarchy of categories, containing products.
* A catalog must have at least 2 versions: staged and online.
* You can create an unlimited number of catalog versions under this catalog.

NEW QUESTION 33

When a customer places an order using the default order management process defined in the yacceleratorfulfilmentprocess extension, when does the fulfillment process send the notification that the order has been placed?
* After the order has been fraud checked
* After the order has been completely sourced
* At the first stage of the fulfillment process
* After the payment has been processed
