

Get Ready with E_BW4HANA211 Exam Dumps (2023) [Q24-Q46]

Get Ready with E_BW4HANA211 Exam Dumps (2023) Realistic E_BW4HANA211 Dumps are Available for Instant Access

SAP E_BW4HANA211 exam is an essential certification for professionals who want to stay up-to-date with the latest developments in SAP BW/4HANA. Passing E_BW4HANA211 exam demonstrates that the candidate has a deep understanding of the latest features and functionalities of SAP BW/4HANA and is capable of implementing and maintaining SAP BW/4HANA solutions. SAP Certified Application Specialist ? SAP BW/4HANA 2021 Delta certification is highly respected in the industry and is a valuable asset for individuals seeking career growth in the field of SAP BW/4HANA.

SAP E_BW4HANA211 exam is a delta exam, which means that it tests the knowledge and skills that have been added or updated since the last version of the exam. This ensures that individuals who pass the exam have the most up-to-date knowledge and skills in SAP BW/4HANA. E_BW4HANA211 exam covers a range of topics, including modeling and data acquisition, data provisioning, reporting and analysis, and administration and operations.

Q24. Which BW object type do you need to create a Badl Provider?

* DataStore object (advance) in Planning Mode

- * InfoObject
- * DataStore object (advance) with Direct Update
- * CompositeProvider

Q25. Why do you use the `Enhanced Master Data Update` setting in the definition of an InfoObject? Note: there are 2 correct answers to this question.

- * To enable transitive attributes
- * To enable XXL attributes
- * To enable parallel loading
- * To enable delta capability

Q26. Which effects do you expect for a BW Query if you set the SAP HANA runtime mode, called `Operations in SAP HANA`, to the value `[(Standard)]`? Note: There are 2 correct answers to this question.

- * A cluster of InfoProviders with a homogenous mapping is created (expert mode 3).
- * The user can manually choose the expert mode 3,8 or 9 by himself.
- * The system supports the calculation of condition (expert mode 9).
- * The system supports formulas with a complex currency or unite (expert mode 8).

Q27. You want to use a referential join for a combination of transactional data (left table) and master data (right table).

How will this referential join be processed? Note: there are 2 correct answers to this question.

- * It is executed only when columns from both tables are requested
- * It shows all transactional data with an existing master data record
- * It shows all master data to assure the referential integrity
- * It is an inner join that assumes that referential integrity is given

Q28. What do the Remote Conversion approach and the Shell Conversion approach have in common? Note: There are 3 correct answers to this question.

- * Both approaches uninstall the unsupported BW Add-ons from the sending BW system as the first activity
- * Both approaches convert unsupported object types during import into the new SAP BW/4HANA system
- * Both approaches result in a SAP BW/4HANA system which has a new system ID
- * Both approaches require the SAP BW/4HANA Starter Add-on to be installed on the sending system
- * Both approaches are setup by installing required SAP notes via the SAP BW Notes Analyzer

Q29. A customer uses an SAP BW 7.5 system powered by SAP HANA with the SAP BW/4HANA Starter Addon.

The system mode is set to `B4H mode`. How will the system be affected?

- * 3.x Data Flows can still be used if they are registered in the whitelist
- * Semantically Partitioned Objects (SPOs) can be maintained with the SAP BW/4HANA Modeling U Tools
- * SAP BW/4HANA Modeling Tools are needed to maintain BW Queries
- * MultiProviders are automatically converted into CompositeProviders

Q30. Which transformation rules do support SAP HANA Runtime? Note: There are 3 correct answers to this question.

- * ABAP end routine
- * SQL procedure in an SAP HANA FlowGraph
- * ABAP Field routine
- * SQL script field routine
- * Lookup from DataStore object (advanced)

Q31. What is a valid reason to run the program RODPS_OS_EXPOSE?

- * To use an SAP ABAP CDS View for ODP
- * To have an overview of ODP Consumers of a DataSource
- * To release a customer developed DataSource for ODP
- * To investigate extractor logic in an SAP delivered DataSource For ODP

Q32. You would like to implement a virtual scenario in your SAP BW/4HANA system. Which approach does SAP recommend for this kind of scenario? Note: There are 3 correct answers to this question.

- * Integrate external data into SAP BW/4HANA based on the Write Interface-enabled DataStore object.
- * Model a CompositeProvider which combines data from multiple SAP BW/4HANA InfoProviders and SAP HANA Views.
- * Generate external SAP HANA view of SAP BW/4HANA InfoProviders to consume SAP BW/4HANA data in SAP HANA.
- * Define an Open ODS View which integrates an SAP HANA table into SAP BW/4HANA.
- * Load SAP HANA data into SAP BW/4HANA InfoProviders based on the Operational Data Provisioning (ODP) framework.

Q33. You use an Open Hub Destination to distribute SAP BW/4HANA data to a table managed by an SAP database.

Which technologies can be used? Note: There are 2 correct answers to this question.

- * Operational Data Provisioning (ODP)
- * Database Connection (DBCON)
- * Smart Data Access (SDA)
- * Remote Function Call (RFC)

Q34. You use the SAP BW/4HANA Transfer Cockpit to prepare your SAP BW system for an in-place conversion to SAP BW/4HANA.

Which functions are provided by this cockpit? Note: There are 2 correct answers to this question.

- * Execute Pre-Checks
- * Transfer 3.x DataFlow into 7.x DataFlows
- * Transfer Bex Queries into BW Queries
- * Transfer Standard Authorizations

Q35. In SAP BW/4HANA you decide to switch on the External Tier (COLD Store) for a DataStore object (advanced) based on the Data Tiering Optimization (DTO) concept.

Where can the data be managed? Note: there are 2 correct answers to this question.

- * In an SAP IQ database
- * In SAP HANA on an extension node
- * In SAP HANA Native Storage Extension
- * In the file system of a Hadoop cluster

Q36. Which features have been removed from SAP BW/4HANA compared to SAP BW powered by SAP HANA?

Note: There are 2 correct answers to this question.

- * Analysis Process Designer (TC: RSANWB)
- * Analysis Authorizations (TC: RSECADMIN)
- * Customer Exit variable using RSR00001 (TC: CMOD)
- * Modeling option of secondary indices for DataStore objects (advanced)

Q37. Which of the following SAP BW/4HANA objects support the automatic generation of external SAP HANA views? Note: There are 2 correct answers to this question.

- * Open ODS View
- * BW Query
- * InfoObject Characteristic
- * DataSource

Q38. You plan to virtually consume data from an ABAP CDS View in SAP BW/4HANA and decide to use an Open ODS View. Which source type does SAP recommend?

- * Database Table or View
- * Virtual table using SAP HANA Smart Data Access
- * DataSource (BW)
- * HANA Calculation View

Q39. How does column-based storage enable data to be read faster in SAP HANA?

- * Individual columns contain all of the information for the record
- * Individual columns are read-optimized by writing into a main store and a delta store
- * Individual columns can be transferred to an SAP HANA optimized row-based format for faster access
- * Individual columns can be processed at the same time by different CPU cores

Q40. What is the recommended and supported way to virtually consume data in SAP BW/4HANA based on SAP ABAP CDS View?

- * Model a CompositeProvider which consumes an SAP HANA Calculation View which refers to the SAP ABAP CDS View.
- * Model a CompositeProvider which directly consumes the SAP ABAP CDS View.
- * Model an Open View of source type Database Table or View; which refers to the SAP ABAP CDS U View.
- * Model an Open ODS View of source type DataSource (BW); which refers to the SAP ABAP CDS U View
