- * Approver, administrator, reviewer, tester

NEW QUESTION 50

If a business analyst (BA) asks questions during the job shadowing with a subject matter expert, which approach is being used?

- * Active Observation Approach
- * Contextual Inquiry Observation
- * Inactive Observation Approach
- * Passive Observation Approach

NEW QUESTION 51

When planning business analysis information management, what are the factors that influence storage and access decisions?

- * Organizational values and procurement strategy
- * Business rules and change strategy
- * Business policies and methodology adopted
- * Organizational standards and tool availability

Business analysis information can be stored in many ways. Storage decisions depend on many factors such as who must access the information, how often they need to access it, and what conditions must be present for access. Organizational standards and tool availability also influence storage and access decisions. The business analysis approach defines how various tools will be used on the initiative and how the information will be captured and stored within those tools. Tools may shape the selection of business analysis techniques, notations to be used, and the way that information is organized.

NEW QUESTION 52

<https://www.fast2test.com/ECBA-practice-test.html> 13

Valid Fast2test ECBA Exam PDF Dumps – New ECBA Real Exam Questions

- * Flowchart

A data flow diagram illustrates the movement and transformation of data between externals (entities) and processes. The output from one external or process is the input to another. The data flow diagram also illustrates the temporary or permanent repositories (referred to as data stores or terminators) where data is stored within a system or an organization. The data defined should be described in a data dictionary.

NEW QUESTION 64

When initially assigned work, understanding the scope of elicitation is important in order to:

- * review the project charter.
- * identify the stakeholders.
- * discover the requirements.
- * plan the business analysis approach

NEW QUESTION 68

When do the participants start generating ideas during a collaborative game?

- * Closing step
- * Exploration step
- * Opening step
- * Iteration step

NEW QUESTION 69

Which core concept defines a specific way of satisfying one or more needs in a context?

- * Value
- * Change
- * Solution
- * Priority

A solution is a specific way of satisfying a need in a context.

NEW QUESTION 70

In the define design options task, which of the following relates to the identify improvement opportunities element?

- * Assess issues, define risks, confirm elicitation results
- * Create flow diagrams, purchase solutions components, secure resources
- * Increase efficiencies, identify additional capabilities, improve access to information
- * Define change strategy, analyze current state, prioritize requirements

Identify Improvement Opportunities When proposing design options, a number of opportunities to improve the operation of the business may occur and are compared. Some common examples of opportunities include:

Increase Efficiencies: automate or simplify the work people perform by re-engineering or sharing processes, changing

responsibilities, or outsourcing. Automation may also increase consistency of behaviour, reducing the likelihood of different stakeholders performing the same function in distinctly different fashions.

Improve Access to Information: provide greater amounts of information to staff who interface directly or indirectly with customers, thereby reducing the need for specialists.

Identify Additional Capabilities: highlight capabilities that have the potential to provide future value and can be supported by the solution. These capabilities may not necessarily be of immediate value to the organization (for example, a software application with features the organization anticipates using in the future).

NEW QUESTION 71

Which task is performed when the business analyst (BA) ensures that stakeholders have a shared understanding of the outcomes of elicitation?

- * Conduct elicitation
- * Manage stakeholder collaboration
- * Communicate business analysis information
- * Confirm elicitation results

The International Institute of Business Analysis (IIBA) offers a range of certifications to business analysts, including the Entry Certificate in Business Analysis (ECBA). Entry Certificate in Business Analysis (ECBA) certification is designed for individuals who are new to the field of business analysis and want to demonstrate their knowledge and understanding of foundational concepts and techniques.

The ECBA exam aims to assess the knowledge and skills of individuals in understanding and applying the business analysis core concepts and techniques, business analysis key competencies, and the foundational knowledge areas. ECBA exam is an entry-level certification that demonstrates a candidate's commitment and competence in understanding the business analysis framework and essential analytical techniques. Moreover, ECBA certification is the first step towards advancing into other IIBA certification levels such as Certified Business Analysis Professional (CBAP) and Certification of Competency in Business Analysis (CCBA).
