QUESTION 42

Company A purchased 80% of Company B for 80 million in December of 2022. Company B’s equity is 50 million. What accounting entries should be generated when consolidation is run for December of 2022?

Note: There are 2 correct answers to this question.
* Debit goodwill 50 million
* Credit investment 64 million
* Debit goodwill 40 million
* Credit investment 80 million
When Company A purchases 80% of Company B for 80 million, the accounting entries generated when consolidation is run for December of 2022 should be: – Debit goodwill 40 million (80 million purchase price – 80% of 50 million equity) – Credit investment 80 million (reflecting the purchase price)

QUESTION 43

When there is a balance sheet and income statement posting in a group journal entry, what creates the offsetting entries?
* The data validation task
* Selected FS items for automatic posting
* Selection objects
* The calc net income task

QUESTION 44

You have the following hierarchy and intercompany transactions:

How many elimination entities are generated?
* 5
* 6
* 3
* 4

There are 3 elimination entities generated. The elimination entities are created at the lowest common parent level in the hierarchy where intercompany transactions occur. In this case, E1 is the parent of C1 and C2, E2 is the parent of C3 and C4, and E3 is the parent of C5. Thus, three elimination entities are generated.
