Latest [Dec 01, 2023] Sitecore-10-NET-Developer Exam Questions – Valid Sitecore-10-NET-Developer Dumps Pdf Sitecore-10-NET-Developer Practice Test Questions Answers Updated 52 Questions

To be eligible to take the Sitecore-10-NET-Developer Exam, candidates must have a strong understanding of .NET development and experience working with the Sitecore platform. Sitecore-10-NET-Developer exam covers topics such as Sitecore MVC, Sitecore Forms, Helix architecture, and Sitecore Commerce. Candidates will need to demonstrate their ability to design and develop solutions that meet business objectives, leverage Sitecore's capabilities, and follow best practices.

Sitecore is a powerful and flexible digital experience platform that enables organizations to deliver personalized and engaging content across multiple channels. As the Sitecore platform continues to evolve, it is important for developers to keep up with the latest features and best practices. The Sitecore-10-NET-Developer (Sitecore 10 .NET Developer) Certification Exam is designed to test the skills and knowledge required to develop and maintain Sitecore solutions.

NO.26 Which statement best describes the purpose of the Sitecore Container Registry (SCR)?

- * The SCR provides base container images for Sitecore environments for both production and development purposes.
- * The SCR provides Sitecore-approved images submitted by the Sitecore MVP community.
- * The SCR only provides base container images for Sitecore environments for development purposes only.
- * The SCR only provides base container images for add-on modules, such as SXA, JSS, and SPE.

NO.27 As you create templates and add standard values, you know items created from the templates should automatically have the Title field populated with the name of the item. What should you do to ensure this occurs?

- * Add \$name token to the template's standard values Title field.
- * Set \$name token in the new item's content Title field.
- * Set_name token in the new item's content Title field.
- * Add _name token to the template's standard values Title field.

NO.28 Currently, a Content Author has three rendering options with a complex datasource query. However, in order to swap the existing rendering for a new one, the author has to copy the datasource query, remove the old rendering, insert the new rendering, and paste the datasource query into the datasource field. According to Sitecore best practices, what should you do to reduce the chance of user error when an author needs to change out the rendering?

- * Split the renderings into smaller pieces so the Content Authors can add each field of the data source separately as desired.
- * Merge all three renderings into one and have the Content Author select display mode through rendering parameters.
- * Create a custom Experience Editor button and script the replacement.
- * Add each rendering definition item to the Compatible Renderings option within each of the renderings.

NO.29 While developing using Sitecore MVC, you modify a file in your Visual Studio project outside of the webroot folder. What can you do to see the changes within the Sitecore installation?

- * Publish the file using the Sitecore Rocks Publish file command.
- * Copy the file to the webroot using Visual Studio's Publish command.
- * Use the Sitecore Global Publish to publish everything.
- * Publish the entire site when you are in the Content Editor.

NO.30 You want to control the order in which patch files load. Which element could you use in the Layers.config file to accomplish this?

- * <configLayer>
- * <loadOrder>
- * <configLoad>
- * <patchOrder>

NO.31 Which four statements are true about developing with the SitecoreASP.NET Core Rendering SDK? (Choose four.)

- * It enables the Content Delivery instance to handle all of the development workload.
- * It allows you to create independent applications that render Sitecore content.
- * It helps you build small, lightweight .NET Core applications for Sitecore.
- * It enables you to remove ASP.NET from your solution.
- * It allows you to extend Sitecore pipelines using .NET Core.
- * It depends on the Sitecore Layout Service.
- * It enables you to preview your code changes without having to restart the Sitecore environment.

NO.32 Which of the following is considered a complex field and should not be rendered using the Html.Sitecore().Field() method when developing with Sitecore MVC?

- * Number
- * Image
- * Check box
- * Single-line text

NO.33 Which view type would you develop for structural components with multiple placeholders when using the ASP.NET Core Rendering SDK?

- * Standard view components
- * Model-bound components
- * Custom view components
- * Partial view components

NO.34 If the path of a specific module file is not set in the sitecore.json file, what will happen when you run standard serialization commands?

- * When you run push or pull serialization commands, the tool will search for your module to access the includes.
- * You will receive a warning advising you some modules are not included and ask if you wish to include them in the serialization attempt.
- * The paths and related items included in the module will not be serialized when you run a push or pull command.
- * Only selected items in the specific module will be serialized, but it will not include all of them.

NO.35 Which of the following is considered a complex field and should not be rendered using the `Html.Sitecore().Field()` method when developing with Sitecore MVC?

- * Number
- * Image
- * Check box
- * Single-line text

NO.36 If the Sitecore Content Management instance can be accessed by multiple host names, what would you do to enable users for each site to be able to log in to the Sitecore shell?

- * Patch the web.config for the Content Management instance with the required permission groups.
- * Update the role for each user group to include the appropriate site permissions.
- * Remove all specific host names from the Identity Server configuration settings file and replace them with wild-card options.
- * Add AllowedCorsOriginsGroup for each site to the Identity Server configuration.

NO.37 What is the purpose of a Sitecore Support Package?

- * To help Sitecore replicate an issue without needing to access the environment directly.
- * To let Sitecore Support Services access active logs running directly in the environment.
- * To make it easier for you to download update packages and install them into your environment.
- * To give Sitecore direct access to your environment for support purposes.

NO.38 What do you do if the serialization command is not available when working with the Sitecore CLI?

- * You need to execute the `dotnet restore` command in your command prompt.
- * You need to install the Sitecore Serialization plugin.
- * You need to restart your Sitecore instance as this indicates a lost connection.
- * You need to reinstall your Sitecore Content Serialization tool.

NO.39 Your published layout.cshhtml file contains a static placeholder with a `main` placeholder key and you want to add renderings to the presentation details of a templates standardvalues; however you cannot see the `main` placeholder key you added to the layout. Of the available options, which is the best explanation of what happened?

- * There is a missing configuration element in web.config for placeholders.
- * The wrong layout is associated with the current template.
- * A Sitecore publish is required to show placeholder keys when editing presentation details.
- * There is no placeholder settings item for the associated `main` placeholder key.

NO.40 What are the three elements that make up a workflow? (Choose three.)

- * Actions
- * Submissions
- * Security
- * Permissions
- * States
- * Commands
- * Approvals

NO.41 When is it possible to edit a field inline with Experience Editor if the component is developed using Sitecore MVC?

- * When the field is rendered on a page with existing content
- * When the field is marked as inline editable in its definition
- * When a Field() helper method is used to render the field
- * When the field is marked as versioned rather than unversioned
