QUESTION 289

Which of the following is NOT a capability provided by Distributed Device Virtualization in HarmonyOS?

- * device is virtual
- * Decision-making centre
- * Device management
- * Data Processing

QUESTION 290

When developing a HarmonyOS application, which of the following is NOT a permission that should be followed?

- * The user can know and control
- * The permission application is complete
- * Custom permissions can be renamed the same name

- * Permission requests are minimized

QUESTION 291

Which of the following items is an asynchronous task dispatch method in HarmonyOS threads?

- * asyncDispatch
- * asyncGroupDispatch
- * syncDispatch
- * delayDispatch

QUESTION 292

In HarmonyOS, which of the following can developers use the static animation feature to achieve?

- * The picture is rotated along the center point
- * The image rotates along the horizontal axis
- * The picture rotates along the edges
- * The picture rotates along the vertical axis

QUESTION 293

In what ways can developers use device-cloud integration in DevEco Studio?

- * IDE plug-in
- * Project Template
- * Command-line tool
- * Visualization Tools

QUESTION 294

Which of the following request methods is appropriate to submit form data to the server?

- * RequestMethod.GET
- * RequestMethod.POST
- * RequestMethod.PUT
- * RequestMethod.DELETE

QUESTION 295

In HarmonyOS, by default, the UI interface is displayed and updated in the main thread

- * True
- * False

QUESTION 296

When a developer develops an application based on HarmonyOS, the data used by a developer can be decomposed into multiple objects. The developer needs to add, delete, modify, and check the teaching data, but does not want to write overly complex SQL statements. In this scenario, the developer can use an object-relational mapping database to process the data.

- * True
- * False

QUESTION 297

What are the common problems in uploading software packages during the listing process of HarmonyOS applications/metaservices?

- * The release profile file in the package does not match the application of the currently uploaded package
- * The release certificate in the software package does not match the release certificate in the release profile file
- * Package Unsigned Indicates Illegal Package
- * The certificate used in the package has expired, and the expired certificate has expired

QUESTION 298

AR (HarmonyOSAbilityResources) Different HAPs (HarmonyOSAbilityPackage), HAR cannot be installed and run on the device independently, and can only be referenced as a dependency of the application module.

- * True
- * False

QUESTION 299

If a developer wants to use the device virtualization feature of HarmonyOS, which subsystem will he use?

- * Location Services subsystem
- * DV subsystem
- * Media Subsystem
- * Safety subsystem

QUESTION 300

There are two Text components in the Row component, if the justifyContent alignment method is used, which of the following properties can be aligned to the left and right ends

- * FlexAlign.Start
- * FlexAlign.SpaceEvenly
- * FlexAlign.End
- * FlexAlign.SpaceBetween

QUESTION 301

In HarmonyOS, Intents are the carriers for transferring information between objects, and which of the following items can be set through Intents?

- * Deviceld
- * BundleName
- * AbilityName
- * Action

QUESTION 302

In the declarative development paradigm, which of the following decorator decorated state variables needs to be initialized locally, and the initialized value can be overridden by the construction parameters?

- * @State
- * @ObjectLink
- * @StorageLink
- * @Prop

QUESTION 303

What are the following development languages that a developer can use to develop a mobile app using HarmonyOS?

- * Java
- * Android
- * JavaScript
- * Python

QUESTION 304

What is the minimum API version supported by HarmonyOS Cloud Development?

- * API 6
- * API 7
- * API 8
- * API 9

QUESTION 305

When a developer develops a HarmonyOSApplication, if a Text component is used as the title bar of the page, and its width is set to match_parent and its height is set to 50vp, how can the text content in the Text be centered when setting its properties in the layout file?

- * `ohos:thorizontal_center=true”`
- * `ohos:center_inparent=”true”`
- * `ohos:layout_alignment=center`
- * `ohos:text_alignment=center`

QUESTION 306

A developer uses HarmonyOS to write half of an email on his mobile phone and click the transfer button to the tablet to continue editing the email.

- * Remote FA (Feature Ability)
- * Start Remote PA (Particle Ability)
- * FA (Feature Ability) is migrated across devices
- * Connect to the remote PA (Particle Ability).

QUESTION 307

When a developer clicks the exit button of an application to release Page Ability resources, which callback method in the Page Ability lifecycle will be triggered?

- * `onForeground()`
- * `onStop()`
- * `onInactive()`
- * `onBackground()`

QUESTION 308

What is the `DeviceProfile` in HarmonyOS's `DeviceProfile` strategy?

- * mobile phone
- * Tablet
- * Watch
- * Smart screen

QUESTION 309

A developer defines an entity class Student.java and uses the following code to construct a teaching table:

```
Entity(tableName=#8221;student#8221;,ignoredColumns =[#8220;ignoredColumn1#8243;,#8221;
ignoredColumn2#8243;, indices

= (@Index(value =(#8220;firstName.#8221; ,#8221;lastName#8221;,name=#8221;name_index#8221;, unique = true)))
Public class User extends OrmObject{

@PrimaryKey(autoGenerate= true)

Private Integer userId;

Private String firstName;

Private String lastName;

Private int age;

Private double balance;

Private int ignoredColumn1;

Private int ignoredColumn2;

}
```

Which of the following descriptions of this code is wrong?

- * IgnoredColumns indicates that the field does not need to be added to the attributes of the student table
- * Indices creates a composite index name_index for the firstName and lastName fields
- * The name of the data table is student

The index value of the

- * composite index name_index is not unique

The Huawei H14-231_V1.0 exam is intended for developers who have a strong background in programming languages such as C, C++, Java, and Kotlin. Candidates must also have experience in developing applications for mobile or desktop platforms. HCIP-HarmonyOS Application Developer V1.0 certification exam provides a comprehensive understanding of HarmonyOS

architecture and its various components, including HarmonyOS distributed capabilities, user interface design, and data management.

Huawei H14-231_V1.0 (HCIP-HarmonyOS Application Developer V1.0) Certification Exam is an essential certification for professionals who want to develop applications for HarmonyOS-based devices. H14-231_V1.0 exam covers a broad range of topics related to HarmonyOS application development, and passing it demonstrates that the candidate has the knowledge and skills needed to develop high-quality HarmonyOS applications. By obtaining this certification, candidates can enhance their career opportunities and become valuable assets to their organizations in the fast-growing field of HarmonyOS development.
