* Set the creation indicator for purchase requisitions on initial screen of MRP run
* Add the agreement to the source list and mark it for MRP revalance.
* Add the agreement to the quota arrangement and mark it for MRP revalance.

QUESTION 50

Why would you use phantom assemblies?
* To simplify the structure of bills of materials
* To make the assignment of components easier
* To reduce the number of changes required in bills of materials
* To reduce the number of material masters
* To increase the number of planning levels

QUESTION 51

In your project, you have several materials that are planned by different people. How can you assign the planning responsibility?
* MRP type
* MRP group
* MRP planning file
* MRP controller

QUESTION 52

Your quality department detect a deviation in a raw material batch. Unfortunately, this batch has already been used in producion. How can you indentify all affected finish goods stocks?
* Use the batch information cockpit.
* Use the material staging report.
* Use the material where-used report.
* Use batch determination.

QUESTION 53

What are the consequences if the Dispatched operation status is set for a production order operation?
* You can reschedule the operation using midpoint scheduling in a planning table.
* You can reschedule the operation using finite scheduling in planning table
* You can reschedule the operation using lead time scheduling in a planning table
* You can reschedule the order using infinite scheduling in a planing table

QUESTION 54

How would you define pegging in the context of Advanced Planning?
* An evaluation that is ordered according to the network structure of all related products and represents the coverage of issue elements
* An evaluation that is ordered according to the bill-of-material structure of all related products and represents the relationship between the receipt and the issue elements
* An evaluation to verify if there are overstock situations in the balance between receipt and issue elements after the production

planning run
* An evaluation to verify if there are material or capacity shortages in the network after the production planning run.

QUESTION 55

Which of the following is valid sequence of the main activities in production order processing?
* Creation, availability check, release, material widrawal, confirmation
* Creation, release, printing, goods issue, confirmation, goods receipt
* Creation, printing, release, goods issue, confirmation, goods receipt
* Creation, release, settlement, goods issue, confirmation, goods receipt

QUESTION 56

You set up a material as a phantom assembly by entering the special procurement key in the material master.

How can you switch off the phantom assembly in a specific bill of material (BOM)?
* Change the special procurement key of the phantom assembly in the BOM.
* Change the explosion type of the phantom assembly in the BOM.
* Change the phantom item indicator for the phantom assembly in the BOM.
* Change the item category of the phantom assembly in the BOM.

QUESTION 57

What could be the reason for multiple commitment of invidula capacities, where several operations have the same scheduled dates on a work center (or resource) after planing?
* The work center has several invidula capacities.
* The finite Scheduling indicator is NOT set in the strategy profile.
* The Change Planning Direction indicator is set in strategy profile.
* Alternative work centers are fully occupied.

QUESTION 58

Where do you maintain the work center that represents the production line for repetitive manufacturing?
* Production version
* Routing
* Repetitive manufacturing profile
* Production cost collector

QUESTION 59

Which SAP solutions support the supplier area in the portfolio of the Digital Value Network?
* SAP Ariba
* SAP Hybris
* SAP Concur
* SAP Fieldglass
* SAP SuccessFactors

QUESTION 60

What do you use to dispatch operations from planned orders so that the production plan can be fulfilled?

* Material Requirements Planning (MRP)
* Capacity Requirements Planning (CRP)
* Supply Network Planning (SNP)
* Demand Planning (DP)

QUESTION 61

Which materials have a negative quantity in a bill of materials or in a recipe?
* Bulk materials
* Co-products
* By-products
* Waste products
* Continuous flow materials

QUESTION 62

Which actions does the system preform by default when you save a confirmation for a finished product in repetitive manufacturing?
* Posting of production costs to the production cost collector
* Material staging for nex order in sequence
* Archiving of documents for assembly scrap
* Posting of goods receipt for the product
* Reduction of associated capacity requirements

QUESTION 63

What detremines whatherthe planned independent requirements in MRP are consumed by other requrements?
* Consumption sequence procedure
* Requirements profile
* Order type
* Requirements type

QUESTION 64

You want to insert an operatio at a certain time on work center. The planning direction is forward. The disired dispatching time concides with an operation that has previously been dispatched. How does the insertion take place?
* The previously dispatched operation stays as is; the new operation is inserted after the the dispatched operation.
* The previously dispatched operation stays as is; the new operation is inserted before the the dispatched operation.
* The new operation is inserted at the desired time; the previously dispatched operation is moved forward.
* The new operation is inserted at the desired time; the previously dispatched operation is moved backward.

QUESTION 65
