QUESTION 13

An administrator is using vRealize Operations to optimize capacity within a vSphere Datacenter. The administrator will use the main categories for reclamation that are shown under the Reclaim view on the Home Screen navigation.

Which three main categories are available to the administrator in this view? (Choose three.)

* Unused Datastores
* Orphaned Disks
* Snapshots
* Powered Off VMs
* VM Disks utilized %10 or less
* Unused Hosts

QUESTION 14

How is Business Intent applied to objects in vRealize Operations?

* Groups
* Policies
* Tags
* Roles

QUESTION 15

An administrator is unable to move a storage resource when using Workload Management.

What is the underlying reason for this problem?

* DRS is not enabled for this cluster.
* Storage DRS is not enabled for this cluster.
* Storage DRS is configured only for cross-datacenter migrations.
* DRS is not set to fully automated.

QUESTION 16

An administrator has been notified of a critical alert associated with a VMware vCenter cloud account. The alert states that “Objects are not receiving data from adapter instance”. The administrator investigated the problem and resolved the underlying issue. The administrator nowneeds to stop the alert from triggering again, unless the problem occurs in the future.

Which alert action should the administrator take to meet the criteria?

* Suspend
* Cancel Alert
* Release Ownership
* Disable the alert in all polices

QUESTION 17

An administrator is configuring and managing multisite deployments.

Which Association Member Status is an invalid status?

* Inactive
* Unreachable
* Asymmetric
* Active

QUESTION 18

To meet a requirement for protection against data loss in the event of a physical rack failure, an administrator is deploying a vRealize Operation cluster in a Continuous Availability configuration.

Which three node types will be configured within this scenario? (Choose three.)

* Secondary Replica node
* Remote Collector node
* Primary Replica node
* Primary node
* Witness node

* Secondary node

QUESTION 19

An administrator is working on a non-credential based service discovery in a virtualization environment using vRealize Operations.

Which package is a base requirement of the virtual machine?
* Telegraf Agent
* .NET
* Remote Collector
* VMware Tools

QUESTION 20

A system administrator creates a common catalog to be used by all customers. For availability purposes, the catalog will be consumed by a different VMware Cloud Director instance in a different country.

Which catalog setting enables the catalog to be shared across VMware Cloud Director instances?
* Published catalog
* Subscribed catalog
* Content library catalog
* Shared catalog
Explanation

https://www.vmware.com/content/dam/digitalmarketing/vmware/en/pdf/vcat/vmware-architecting-a-vcloud-dire (67)

QUESTION 21

What are the two required components of an alert definition? (Choose two.)
* Symptom
* Version
* Node
* Action
* Recommendation

QUESTION 22

Which three key benefits does vRealize Operations provide within an environment? (Choose three.)
* Capacity optimization
* Service catalog for end users
* Performance optimization
* Monitoring and troubleshooting
* Infrastructure orchestration
* Provides self-service portal

QUESTION 23

A system administrator wants to create a dashboard from widgets.

Which three widgets are available? (Choose three.)

* Top-N Widget
* Metric Chart Widget
* Symptoms Widget
* Weather Map Widget
* Report Widget
* Interaction Widget

QUESTION 24

For the past 12 hours, a vRealize Operations Cluster has exhibited erratic behavior, and the remote collectors appear to be the cause. The administrator has contacted VMware support, and they have requested all relevant logs.

Because of bandwidth constraints, the customer will only be able to send the minimum amount of information to VMware support.

Which support bundle should the customer send that fits these constraints?
* Full-support bundle from the Primary nodes only
* Light-support bundle from the Primary nodes only
* Full-support bundle from all nodes
* Light-support bundle from all nodes

QUESTION 25

An organization’s owner has invited a new user to consume VMware Cloud Services.

How long is the invitation valid before it is revoked?
* 1 hour
* 3 days
* 7 days
* 24 hours

QUESTION 26

An administrator has deployed a vRealize Operations (vROps) cluster in a Continuous Availability configuration across the two racks in two fault domains. Following a network outage that occurred for several minutes, the administrator has been tasked to ensure that the vROps deployment is still healthy. They have noted that one cluster can still contact the witness node.

Which two events will occur as a result of the outage? (Choose two.)
* The vROps cluster will bring the fault domain back automatically once the network has been restored.
* The administrator will need to bring the other fault domain online manually.
* The administrator will need to restart and resync the vROps cluster.
* One fault domain will go offline.
* Both fault domains will be offline.

QUESTION 27

A customer has multiple vCenter Servers in an East Coast datacenter (primary site) and one vCenter Server in each remote datacenter location (Chicago, Japan, and San Francisco).

The following information is known:

They want to monitor vCenter Server Instances in all these datacenter locations from single product UI.

Network latency between these datacenters is 50 milliseconds.

Which vRealize Operations cluster configuration is valid?

* Deploy vRealize Operations cluster in the primary site and Data nodes in each remote site.
* Deploy vRealize Operations cluster in the primary site and a Remote Collector node in each remote site.
* Deploy vRealize Operations cluster in the primary site and a Witness node in each remote site.
* Deploy vRealize Operations cluster in the primary site and a Primary Replica node in each remote site.

QUESTION 28

Which type of node in a vRealize Operations (vROps) design allows an administrator to scale out vROps to monitor very large environments?

* Remote collectors
* Replica Primary nodes
* Primary nodes
* Data nodes

QUESTION 29

An administrator has been tasked with configuring vRealize Operations to ensure that workload performance across the VMware SDDC is the main priority. In the event of an issue, remediation activities should be automatically completed to minimize any impact to running workloads. A maximum of 10% cluster resources should be reserved for burst capacity.

Which option should the administrator configure to meet these requirements?

* Business Intent
* Reclamation
* Operational Intent
* Rightsizing

QUESTION 30

Which Grouping Option in vRealize Operations allows the configuration of Tiers?

* Tags
* Applications
* Cloud Zones
* Custom Datacenter

QUESTION 31

Which two statements accurately characterize reports in vRealize Operations? (Choose two.)

* Views and Dashboards are the only data types available for a report.
* Only PDF type reports can be used to schedule a report generation.
* A report layout can contain table of contents, cover page, and footer.
* Scheduling of reports can be done hourly, daily, weekly, and monthly.
* Reports scheduled for generation can only be shared out via email.

QUESTION 32

An administrator is asked to onboard an on-premises vCenter instance into an existing vRealize Operations Cloud instance.

Which two steps are needed to accomplish this goal? (Choose two.)
* Deploy and configure a Data node.
* Deploy and configure a cloud proxy.
* Add a vRealize Operations Cloud account.
* Deploy and configure a Primary node.
* Add a vCenter cloud account.

QUESTION 33

An active policy has been enabled with this alert definition:

“Virtual machine CPU usage is at 100% for an extended period of time.”

This is causing alerts to be triggered frequently by test/development VMs, so the administrator would like to exclude alerts triggered by the test/development VMs, but not other VMs.

Which action would help achieve this goal?
* Create a policy inherited from the current active policy, set the alert definition state to “Disabled”, and then assign to test/development VMs.
* Under Alerts, select Alerts Definitions, and then remove the Symptoms Definition.
* On the Environment tab, select all test/development VMs, and then unassign the active policy that is currently assigned to the test/development VM.
* Under Alerts, select Alerts Definitions, and then set the alert definition to “Disabled” for test/development VMs.

QUESTION 34

Which two additional parameters are taken into account when sizing a vRealize Operations cluster using the sizing tool? (Choose two.)
* Time Series Data Retention
* Number of nodes
* Projected Growth
* Node size
* Number of current users

QUESTION 35

A customer is using multiple vRealize Operations (vROps) instances and has one central development vROps instance for creating dashboards. The administrator is tasked to share the newly created dashboards with other vROps instances, and the dashboards must be editable in the other instances.

Which action should the administrator take to accomplish this goal?
* Generate a custom URL, set the expiration to “never expire”, and import this URL into the other instance.
* Use the Embed option to import the HTML code into the other instances.
* Connect the vROps instances together, and synchronize the dashboards.
* Export the dashboard from the development instance, and import the dashboard into the other instance.

VMware 5V0-35.21 is an advanced certification exam that is designed to test the expertise of IT professionals in managing VMware vRealize Operations. VMware vRealize Operations Specialist certification is ideal for those who are looking to take the next step in their IT career and become a VMware vRealize Operations Specialist. VMware vRealize Operations Specialist certification exam covers a wide range of topics, including capacity planning, performance optimization, and troubleshooting, making it a comprehensive exam that tests the knowledge of IT professionals.
