Unique Top-selling CSA Exams - New 2024 ServiceNow Practice Exam  
Certified System Administrator Dumps CSA Exam for Full Questions - Exam Study Guide

ServiceNow CSA (ServiceNow Certified System Administrator) Certification Exam is a globally recognized certification program designed for IT professionals who want to demonstrate their expertise in managing and configuring ServiceNow systems. ServiceNow Certified System Administrator certification exam is ideal for individuals who are looking to advance their careers in IT service management and want to gain a competitive edge in the job market.

**Q206.** Which of the following allows a user to edit field values in a list without opening the form?

- \* Data Editor
- \* Edit Menu
- \* List Editor
- \* Form Designer

**Q207.** IntegrationHub enables execution of third-party APIs as a part of a flow. These integrations are referred to as

- \* an action
- \* a spoke
- \* a connection
- \* an integration step

**Q208.** You have been asked to create a way for users to order a new iPhone, but only if they get two levels of approval. The approvers and users should be automatically notified at each approval level. What feature would you use to manage the approvals and notifications?

- \* Parent-Child Approvers.
- \* Approval Chains
- \* Flows
- \* Approval Criteria
- \* Approver Delegates

**Q209.** Which low components allow you to specify when a flow should be run?

- \* Trigger and Condition Pill
- \* Scope and Trigger Condition
- \* Trigger and Condition
- \* Trigger Criteria and Clock
- \* Condition and Table

Explanation

Triggers define when a flow should start running, and conditions are used to specify the specific circumstances under which a flow should run. By combining triggers and conditions, you can create flows that run only when specific events occur and only for certain types of records.
