C_IBP_2311 PDF Pass Leader, C_IBP_2311 Latest Real Test

SAP C_IBP_2311 Exam Syllabus Topics:

TopicDetailsTopic 1- Create and transform forecasts in your planning model- Use the Fiori Launchpad to customize the UI, work with Excel UI
Topic 2- General Configuration of a Planning Area- Optimize inventory in the supply chain utilizing algorithms that derive inventory targets
Topic 3- Solution Architecture & Data Integration- Configure and use Planning Operators to automate processes in your planning model

NEW QUESTION 16

You are implementing SAP IBP for sales and operations and are researching forecast mode algorithms. What are some of the algorithms that can be used? Note: There are 2 correct answers to this question

- * Data-cleansing algorithms
- * Trend models algorithms

- * Sporadic demand models algorithms
- * Naive models algorithms

NEW QUESTION 17

Model configuration allows the attributes of a master data type to be assigned as key figures Which feature is relevant for this type of object?

- * This type of key figure is not usually stored and it cannot be s itable
- * This type of key figure has better performance than a time-independent key figure
- * This object usually provides a single value for a unique planning combination
- * This object contains user-defined criteria that monitor the running of business plan

NEW QUESTION 18

What are the relevant use cases for helper key figures? Note: There are 2 correct answers to this questions.

- * Used to break down a large calculation into manageable subcalculations
- * Used by end-users in planning views to help visualize cross-period calculations
- * Used at any level of calculation level except the Request Level
- * Used when you have more than three inputs at the different planning level in one calculation

NEW QUESTION 19

What are the possible ways that an attribute intended for use as an attribute as a key figure can be created and assigned? Note: There are 2 correct answers to this question.

- * Created as type DECIMAL and assigned to an external master data type
- * Created as type INTEGER and assigned to an compound master data type
- * Created as type INTEGER and assigned to a simple master data type
- * Created as type DECIMAL and assigned to an compound master data type

NEW QUESTION 20

You are invited to review a problem with a customer's SAP IBP Excel template performance. What areas with the biggest potential performance impact would you focus on? Note: There are 2 correct answers to this question

- * Excessive SAP IBP formatting in the Microsoft Excel UI
- * Number of local members and complexity of calculation
- * Complex calculation graphs for key figures
- * Number of analytics charts displaying key figures' values

NEW QUESTION 21

Which SAP IBP planning operator can be run to delete planning objects in a certain version?

- * Purge Master Data
- * Purge Key Figure Data Outside Planning Area Planning Horizon
- * Purge Key Figure Data
- * Purge Non-Confirming Data

NEW QUESTION 22

What are the possible Master Data Maintenance options for SAP Integrated Business Planning for Supply Chain? Note: There are 3 correct answers to this question

- * The SAP IBP, add-in for Microsoft Excel
- * The Manage Master Data app
- * The Planner Workspaces app
- * The Planning Areas Model Configuration app
- * The data Integration job app

NEW QUESTION 23

What are the S&OP operator (optimizer) parameters associated with demand fair share?

- * Number of fair share segments Maximum days of coverage Number of fair share segments late delivery
- * Number of fair share segments Additional tiering costs (default) Number of fair share segments late delivery
- * Number of fair share segments Additional tiering costs (default) Maximum inventory
- * Number of fair share segments Additional tiering costs (default) Inventory days of supply

NEW QUESTION 24

You need to create time periods for the time profile in a planning area

- a. What should you be aware of when running the Create Time Periods application job?
- * The planning area to which the time profile is assigned must be active
 - * This application job can also be triggered from SAP IBP, add-in for Microsoft Excel
 - * A time profile has to be activated so that application job can proceed
 - * It is mandatory to specify the planning area in the Parameter Section of the application job

NEW QUESTION 25

Which functional capabilities are included in SAP IBP for response and supply? Note: There are 2 correct answers to this question

- * Gating Factor
- * Analyse supply Usage
- * Detailed Production Scheduling
- * Calculating buffer proposals

NEW QUESTION 26

What do you need to be aware of when using multiple pairs of key figures in one copy operator? Note:

There are 2 correct answers to this question.

- * Copying multiple key figures can be processed sequentially
- * Copying multiple key figures on different planning levels is not possible.
- * Necessary source key figures values are disaggregated.
- * Necessary target key figures value are disaggregated

NEW QUESTION 27

Which conditions have to be fulfilled as a prerequisite to maintain a key figure disaggregation? Note: There are 2 correct answers to this question.

- * The key figure is calculated and system editable
- * The key figure is calculated and all editable.
- * The key figure is stored and system editable.
- * The key figure is stored and all editable

NEW QUESTION 28

You have set up a planning area, and data is now available. You adjust the necessary time profile settings and run a consistency check. Which settings can you change and still run a successful consistency check? Note: There are 2 correct answers to this question.

- * Add a new time profile level to the time profile
- * Change the numbering hierarchy of the period IDs in the time profile.
- * Change the past and future horizon of the level in the time profile
- * Change the description of attribute in the time profile

NEW QUESTION 29

Which sourcing methods are required to identify the product flow through the network? Note:

There are 3 correct answers to this question.

- * Sourcing via Production
- * Sourcing via Demand Prioritization
- * Unspecified Sourcing
- * Customer sourcing Rule
- * Sourcing via Costs

NEW QUESTION 30

You are working with inventory key figures. What are some of the business scenarios where you can use the Last Period Aggregation function? Note: There are 2 correct answers to this question.

- * Calculating the value of inventory on a weekly basis, using static aggregation from the daily level
- * Calculating how many periods inventory is going to last based on the planned demand
- * Searching for and returning the last not-full value of the inventory key figure
- * Calculating the value of inventory on any level from the time profile, ensuring flexibility of calculation
