Sample Questions of UiPath-SAIv1 Dumps With 100% Exam Passing Guarantee [Q38-Q60

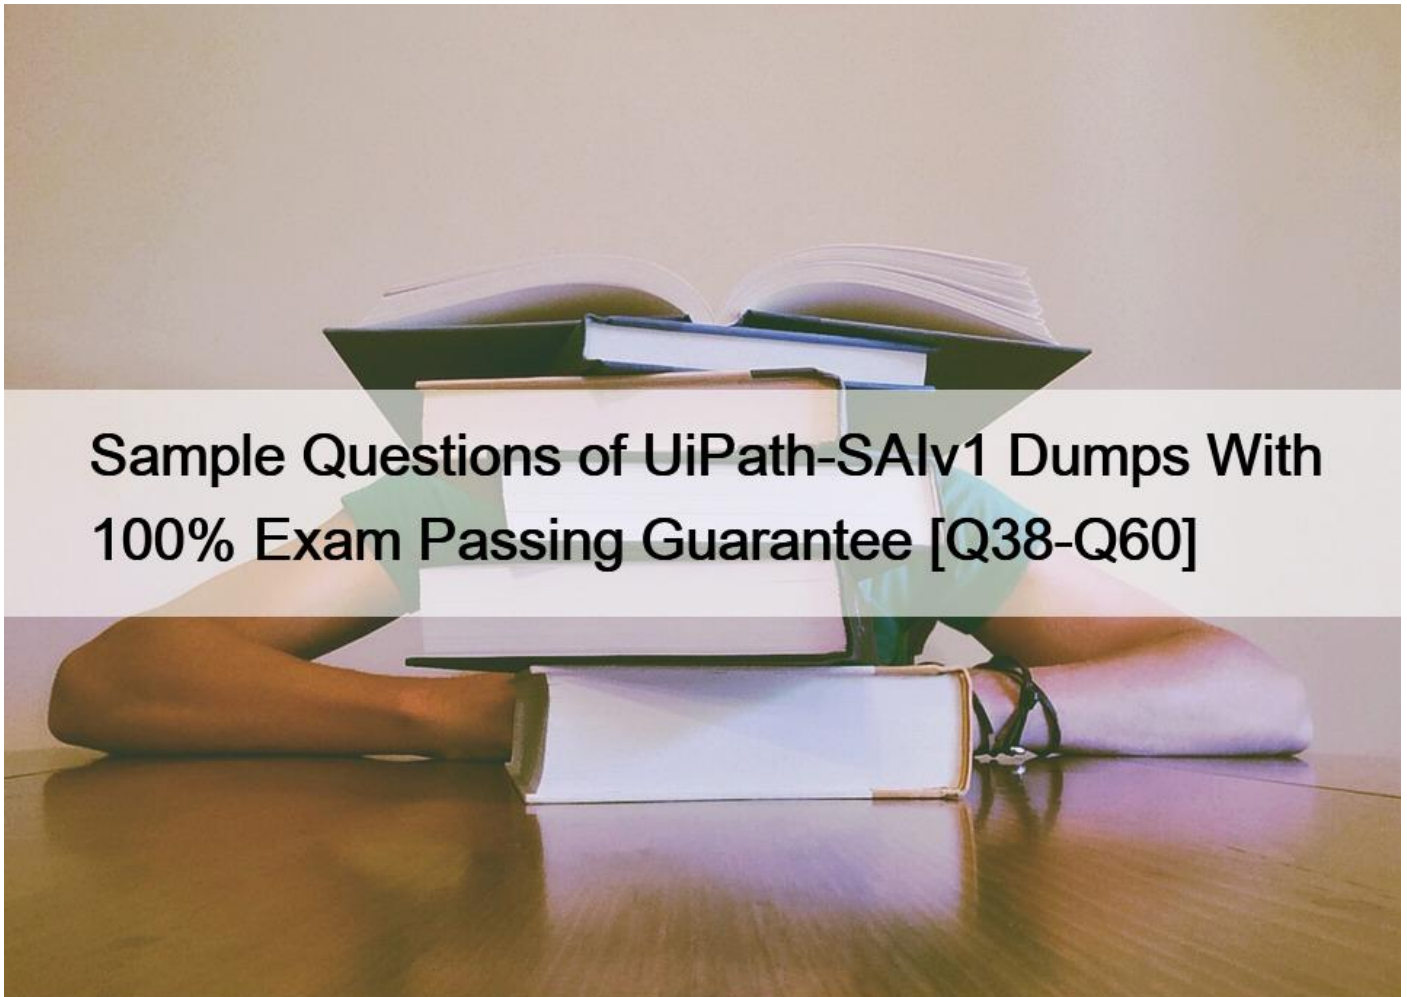

Sample Questions of UiPath-SAIv1 Dumps With 100% Exam Passing Guarantee
Pass Key features of UiPath-SAIv1 Course with Updated 82 Questions

NEW QUESTION 38

Which UiPath Communications Mining model performance factor assesses the proportion of the entire dataset that has informative label predictions?
* Average label performance.
* Coverage.
* Balance.
* Underperforming labels.

NEW QUESTION 39

What is one of the purposes of the Config file in the UiPath Document Understanding Template?

* It contains the configuration settings for the UiPath Robot and Orchestrator integration.
* It stores the API keys and authentication credentials for accessing external services.
* It specifies the output file path and format for the processed documents.
* It defines the input document types and formats supported by the template.

NEW QUESTION 40

Which of the following time periods can be selected when viewing Trends in UiPath Communications Mining?

Which of the following time periods can be selected when viewing Trends in UiPath Communications Mining?
* Daily, Monthly, Quarterly, Yearly.
* Daily, Weekly, Monthly, Yearly.
* Daily, Bi-weekly, Monthly, Yearly.
* Daily, Bi-weekly, Quarterly, Yearly.

NEW QUESTION 41

What is the definition of Deep Learning?
* A sub-field of artificial intelligence that enables systems to learn from data.

Systems learn from previous experience and information to deduce and predict future information. To do this they use algorithms that learn to perform a specific task without being explicitly programmed.
* The theory and development of computer systems that are able to perform tasks that normally require human intelligence and decision making.
* A field of artificial intelligence that enables computers to gain high-level understanding from digital images or videos. If AI is the brain, then this is the eye that enables the computer to observe and understand. It works the same as the human eye.
* An area of machine learning concerned with artificial neural networks.These are a series of algorithms that aim to recognize relationships in a set of data through a process that mimics biological neural networks.

NEW QUESTION 42

What is the correct order of uploading a package exported from UiPath AI Center?

Instructions: Drag the steps found on the “Left” and drop them on the “Right” in the correct order.

Steps	Order of Steps	
Export the package from AI Center.	First	Export the package from AI Center.
In the Upload package field, add the zip file downloaded using the Downloading ML Packages procedure. With the same procedure, download the JSON file and add it to the Upload metadata JSON field.	Second	In the ML Packages page, click the Import ML Package button. The Import new package page is displayed.
Click Create.	Third	In the Upload package field, add the zip file downloaded using the Downloading ML Packages procedure. With the same procedure, download the JSON file and add it to the Upload metadata JSON field.
On the ML Packages page, click the Import ML Package button. The Import new package page is displayed.	Fourth	Click Create.

NEW QUESTION 43

Which is the correct description of the Configure Extractors Wizard?

* A mandatory step in the extractor configuration that allows choosing which extractors are applied to each field.
* A mandatory step in the extractor configuration that allows choosing which extractors are applied to each document type and field.
* A mandatory step in the extractor configuration that allows choosing which extractors are applied to each document type.
* An optional step in the extractor configuration which allows choosing which extractors are applied to each document type.

NEW QUESTION 44

When is it recommended to use Main-ActionCenter in the context of the Document Understanding Process?

* When implementing an attended process.
* When testing locally or implementing an attended process.
* When testing locally.
* When testing locally or implementing an unattended process.

NEW QUESTION 45

What is the purpose of the "Explore" phase in UiPath Communications Mining?

* To fully review and correctly tag the model version, regardless if it's "Live" or "Staging".
* To use the bulk label functionality, a helpful tool to quickly train the model when searching for specific terms.
* To provide each label/entity in a taxonomy with enough training examples so the model can make accurate predictions at scale.
* To review the clusters of similar communications from a data set that unsupervised learning automatically found.

NEW QUESTION 46

What is the name of the web application that allows users to prepare, review, and make corrections to datasets required for Machine Learning models?

* Document Manager.
* Digitization.
* Data Manager.
* ML Extractor.

NEW QUESTION 47

What do entities represent in UiPath Communications Mining?
* Structured data points.
* Concepts, themes, and intents.
* Thread properties.
* Metadata properties.

NEW QUESTION 48

Which of the following is an indicator that sufficient training has been completed for a model in UiPath Communications Mining?
* A model rating of 30-40.
* A model rating of 40-50.
* A model rating of 50-60.
* A model rating of 70-90 or better.

NEW QUESTION 49

While training a UiPath Communications Mining model, the Search feature was used to pin a certain label on a few communications. After retraining, the new model version starts to predict the tagged label but infrequently and with low confidence.

According to best practices, what would be the correct next step to improve the model’s predictions for the label, in the “Explore” phase of training?
* Use the “Rebalance” training mode to pin the label to more communications.
* Use the ‘Teach” training mode to pin the label to more communications.
* Use the “Low confidence” training mode to pin the label to more communications.
* Use the “Search” feature to pin the label to more communications.

NEW QUESTION 50

What happens when multiple users try to label the same document concurrently?
* The changes made by one user override the changes made by others.
* The changes made by all users are saved successfully.
* Concurrent labeling is not allowed.
* A warning message is displayed to the other user(s) indicating unsuccessful changes.

NEW QUESTION 51

What are the two main data extraction methodologies used in document understanding processes?
* Hybrid and manual data extraction.
* Rule-based and model-based data extraction.
* Rule-based and hybrid data extraction.
* Manual and model-based data extraction.

NEW QUESTION 52

What can the Custom Named Entity Recognition out-of-the-box model be used for?
* Understand sentiment in product reviews, customer surveys, social media posts, and emails.
* Classify text in resumes, emails, web pages, and other formats.
* Relate customer questions to FAQ documents and automatically pull responses from these documents.
* Extract and classify text in emails, letters, web pages, research papers, and call transcripts.

NEW QUESTION 53

Why might labels have bias warnings in UiPath Communications Mining, even with 100% precision?

* They were trained using the “Search” option extensively.

* They were trained using the “Shuffle” option extensively.

* They have low recall.

* They lack training examples.

NEW QUESTION 54

Can you use Queues in the Document Understanding Process?

* The Document Understanding Process can’t use Queues because items waiting for Human Validation for more than 10 days will be marked as Abandoned.

* The Document Understanding Process can use Queues but the Auto Retry Functionality should be disabled.

* The Document Understanding Process can use Queues but the Auto Retry Functionality should be enabled.

* The Document Understanding Process can’t use Queues because items waiting for Human Validation for more than 24h will be marked as Abandoned.

NEW QUESTION 55

How long does the typical Machine Learning model deployment process take in UiPath AI Center?

* Less than 5 minutes.

* Between 5 and 10 minutes.

* Between 10 and 15 minutes.

* More than 15 minutes.

NEW QUESTION 56

Which role consumes ML Skills within customized workflows in Studio using the ML Skill activity from the UiPath.MLServices.Activities package?

* Data Scientist.

* Administrator.

* RPA Developer.

D Process Controller

NEW QUESTION 57

What is the difference between the Document Understanding Process and the Document Understanding Framework?

* The Document Understanding Framework contains the activities that can be used in a Library, while the Document Understanding Process is the template that can be found in Studio.

* The Document Understanding Framework contains the activities that can be used in a Process, while the Document Understanding Process is the template that can be found in Studio.

* The Document Understanding Process contains the activities that can be used in a Library, while the Document Understanding Framework is the template that can be found in Studio.

* The Document Understanding Process contains the activities that can be used in a Process, while the Document Understanding Framework is the template that can be found in Studio.

NEW QUESTION 58

Which of the following statements is true regarding reviewing and applying entities in UiPath Communications Mining?

* A single entity value can be split across multiple paragraphs.
* If the entity value is correctly predicted, but the entity type is wrong, it cannot be changed.
* All of the entities within a paragraph should be reviewed.
* All of the entities in a communication must be reviewed.

NEW QUESTION 59

What components are part of the Document Understanding Process template?
* Import. Classification. Text Extractor, and Data Validation.
* Load Document. Categorization. Data Extraction, and Validation.
* Load Taxonomy, Digitization. Classification, Data Extraction, and Data Validation Export.
* Load Taxonomy, Digitization. Categorization. Data Validation, and Export.

NEW QUESTION 60

What happens during the Classify stage of the Document Understanding Framework?
* The OCR engine is used to extract text from the image document.
* The extracted data is exported as a dataset.
* The target fields are extracted from the document and sent to Action Center for human validation.
* The documents are included in one of the taxonomy document types or skipped.
