NEW QUESTION 28

Which two are phases in the Salesforce Application Event propagation framework? Choose

2 answers

- * Bubble
- * Default
- * Capture

NEW QUESTION 29

Universal Hiring is using Salesforce to capture job applications. A salesforce administrator created two custom objects; Job c acting as the master object, Job application.___: acting as the detail.

What is the recommended tool a developer should use to meet the business requirement?

- * Record-triggered flow
- * Process Builder
- * Formula field
- * Apex trigger

NEW QUESTION 30

How should a custom user interface be provided when a user edits an Account in Lightning Experience?

- * Override the Account's Edit button with Lightning Flow
- * Override the Account's Edit button with Lightning Action
- * Override the Account's Edit button with Lightning page.
- * Override the Account's Edit button with Lightning component.

NEW QUESTION 31

Which three Salesforce resources can be accessed from a Lightning web component?

Choose 3 answers

- * SVG resources
- * Third-party web components
- * Content asset files
- * Static resources
- * All external libraries

NEW QUESTION 32

Einstein Next Best Action Is configured at Universal Containers to display recommendations to internal users on the Account detail page.

If the recommendation is approved, a new opportunity record and task should be generated. If the recommendation is rejected, an Apex method must be executed to perform a callout to an external system.

Which three factors should a developer keep Hi mind when implementing the Apex method?

Choose 3 answers

- * The method must use the @AuraEnabled annotation.
- * The method must use the @Future annotation.
- * The method must use the @invocableMethod annotation.
- * The method must be defined as static.
- * The method must be defined as public.

NEW QUESTION 33

An Apex method, getAccounts, that returns a List of Accounts given a search Term, is available for Lightning Web components to use. What is the correct definition of a Lightning Web component property that uses the getAccounts method?

- * @AuraEnabled(getAccounts, ‘\$searchTerm’)

accountList;

- * @wire(getAccounts, ‘\$searchTerm’)

```
accountList;  
* @AuraEnabled(getAccounts, {searchTerm: '&#8216;$searchTerm&#8217;});
```

```
accountList;  
* @wire(getAccounts, {searchTerm: '&#8216;$searchTerm&#8217;});
```

accountList;

https://developer.salesforce.com/docs/component-library/documentation/en/48.0/lwc/lwc.data_wire_service_about

NEW QUESTION 34

Given the following trigger implementation:

```
trigger leadTrigger on Lead (before update){  
  
final ID BUSINESS_RECORDTYPEID = '&#8216;012500000009Qad&#8217;;  
  
for(Lead thisLead : Trigger.new){  
  
if(thisLead.Company != null && thisLead.RecordTypeId != BUSINESS_RECORDTYPEID){ thisLead.RecordTypeId =  
BUSINESS_RECORDTYPEID;  
  
}  
  
}  
  
}
```

The developer receives deployment errors every time a deployment is attempted from Sandbox to Production.

What should the developer do to ensure a successful deployment?

- * Ensure BUSINESS_RECORDTYPEID is retrieved using Schema.Describe calls.
- * Ensure a record type with an ID of BUSINESS_RECORDTYPEID exists on Production prior to deployment.
- * Ensure BUSINESS_RECORDTYPEID is pushed as part of the deployment components.
- * Ensure the deployment is validated by a System Admin user on Production.

NEW QUESTION 35

Which three statements are true regarding custom exceptions in Apex? (Choose three.)

- * A custom exception class must extend the system Exception class.
- * A custom exception class can implement one or many interfaces.
- * A custom exception class cannot contain member variables or methods.
- * A custom exception class name must end with '“Exception”.
- * A custom exception class can extend other classes besides the Exception class.

NEW QUESTION 36

Universal Containers wants to assess the advantages of declarative development versus programmatic customization for specific use

cases in its Salesforce implementation.

What are two characteristics of declarative development over programmatic customization?

Choose 2 answers

- * Declarative development has higher design limits and query limits.
- * Declarative development can be done using the Setup UI.
- * Declarative development does not require Apex test classes.
- * Declarative code logic does not require maintenance or review.

NEW QUESTION 37

In the Lightning Component framework, where is client-side controller logic contained?

- * Apex
- * Visualforce
- * HTML
- * JavaScript

NEW QUESTION 38

Cloud Kicks Fitness, an ISV Salesforce partner, is developing a managed package application. One of the application modules allows the user to calculate body fat using the apex class, Bodyfat, and its method, calculateBodyfat(). The product owner wants to ensure this method is accessible by the consumer of the application when developing customizer outside the ISV's package namespace. Which approach should a developer take to ensure calculateBodyFat() is accessible outside the package namespace?

- * Declare the class and method using the global access modifier.
- * Declare the class as public and use the global access modifier on the method.
- * Declare the class as public and use the public access modifier on the method.
- * Declare the class and method using the public access modifier.

NEW QUESTION 39

What should a developer do to check the code coverage of a class after running all tests?

- * View the Code Coverage column in the list view on the Apex Classes page.
- * View the Class Test Percentage tab on the Apex Class list view in Salesforce Setup.
- * View Use code coverage percentage for the class using the Overall Code Coverage panel in the Developer Console Tests tab.
- * Select and run the class on the Apex Test Execution page in the Developer Console.

NEW QUESTION 40

A developer executes the following code in the Developer Console:

```
List<Account> fList = new List<Account> ();For(integer i= 1; I <= 200; i++){fList.add(new Account ( Name  
= '&#8216;Universal Account &#8216; + i));}Insert fList;List <Account> sList = new List<Account>();For (integer I = 201; I  
<
```

20000; i ++){sList.add(new Account (Name = '‘Universal Account ‘ + i));}Insert sList;How many accounts are created in the Salesforce organization ?

- * 20000

- * 0
- * 200
- * 1000

NEW QUESTION 41

An Opportunity needs to have an amount rolled up from a custom object that is not in a master-detail relationship.

How can this be achieved?

- * Write a trigger on the child object and use a red-black tree sorting to sum the amount for all related child objects under the Opportunity.
- * Write a Process Builder that links the custom object to the Opportunity.
- * Write a trigger on the child object and use an aggregate function to sum the amount for all related child objects under the Opportunity
- * Use the Streaming API to create real-time roll-up summaries.

NEW QUESTION 42

What are three ways for a developer to execute tests in an org? Choose 3.

- * Bulk API
- * Tooling API
- * Setup Menu
- * Salesforce DX
- * Metadata API.

https://developer.salesforce.com/docs/atlas.en-us.sfdx_dev.meta/sfdx_dev/sfdx_dev_testing.htm

https://developer.salesforce.com/docs/atlas.en-us.api_tooling.meta/api_tooling/tooling_api_objects_apextestsuite.htm

NEW QUESTION 43

A developer Edition org has five existing accounts. A developer wants to add 10 more accounts for …

The following code is executed in the Developer Console using the Executor Anonymous window:

```
Account myAccount = new Account (Name = 'MyAccount');
insert myAccount;

Integer x = 1;
List<Account> newAccounts = new List<Account>();
do {
    Account acct = new Account (Name = 'New Account ' + x++);
    newAccounts.add(acct);
} while (x < 10);
```

How many total accounts will be in the org after this code is executed?

- * 5
- * 6
- * 10
- * 15

NEW QUESTION 44

A developer creates a Workflow Rule declaratively that updates a field on an object. An Apex update trigger exists for that object. What happens when a user updates a record?

- * No changes are made to the data.
- * Both the Apex Trigger and Workflow Rule are fired only once.
- * The Workflow Rule is fired more than once.
- * The Apex Trigger is fired more than once.

NEW QUESTION 45

A company has been adding data to Salesforce and has not done a good Job of limiting the creation of duplicate Lead records. The developer is considering writing an Apex process to identify duplicates and merge the records together.

Which two statements are valid considerations when using merged?

Choose 2 answers

- * The field values on the master record are overwritten by the records being merged.
- * Merge is supported with accounts, contacts, cases, and leads.
- * External ID fields can be used with the merge method.
- * The merge method allows up to three records, including the master and two additional records with the same sObject type, to be merged into the master record.

NEW QUESTION 46

A developer identifies the following triggers on the Expense__c object:

DeleteExpense,

applyDefaultstoexpense

validateexpenseupdate;

The triggers process before delete, before insert, and before update events respectively.

Which two techniques should the developer implement to ensure trigger best practice are followed?

- * Unify the before insert and before update triggers and use Process Builder for the delete action.
- * Maintain all three triggers on the Expense__c object, but move the Apex logic out for the trigger definition.
- * Create helper classes to execute the appropriate logic when a record is saved.
- * Unify all three triggers in a single trigger on the Expense__c object that includes all events.

NEW QUESTION 47

Universal Containers has a support process that allows users to request support from its engineering team using a custom object,

Engineering_Support__c.

Users should be able to associate multiple engineering_Support__c records to a single Opportunity record.

Additionally, aggregate Information about the Engineering_support__c records should be shown on the Opportunity record.

What should a developer Implement to support these requirements?

- * Master-detail field from Engineering_Support__c to Opportunity.
- * Master-detail field from Opportunity to Engineering_Support__c
- * Lookup field from Engineering_support__c to Opportunity
- * Lookup field from Opportunity to Engineering_Support__c

NEW QUESTION 48

Which three resources in a Lightning Component Bundle can contain JavaScript functions? Choose 3

- * Renderer
- * Design
- * Helper
- * Controller
- * Style

NEW QUESTION 49

A credit card company needs to implement the functionality for a service agent to process damaged or stolen credit cards. When the customers call in, the service agent must gather many pieces of information. A developer is tasked to implement this functionality.

What should the developer use to satisfy this requirement in the most efficient manner?

- * Apex trigger
- * Approval process
- * Screen-based flow
- * Lightning Component

NEW QUESTION 50

A developer is building custom search functionality that uses SOSL to search account and contact records that match search terms provided by the end user. The feature is exposed through a Lightning web component, and the end user is able to provide a list of terms to search.

Consider the following code snippet:

```
@AuraEnabled
public static List<List<sObject>> searchTerms(List<String> termList){
    List<List<sObject>> result = new List<List<sObject>>();
    for(String term : termList){
        result.add(new List<List<sObject>>({
            Contact (FirstName, LastName) }]);
    }
    return result;
}
```

What is the maximum number of search terms the end user can provide to successfully execute the search without exceeding a governor limit?

- * 20
- * 150
- * 200
- * 2,000
